Advances not accounted for: J. B. Charleson.

AUDIT OFFICE, OTTAWA, Feb. 9, 1906.

SIR,—Let me call your attention to Cheque R—76842 for $2,500, issued Aug. 9, 1904, in favour of Mr. J. B. Charleson, being an advance to enable him to make expenditure on the following services (as shown in the present report for 1904-1905):

Telegraphs, maintenance and repairs—

Yukon District: (page V—361	$1,000
British Columbia: (page V—350)	500
Northwest Territories: (page V—348)	500

Telegraphs, construction—

Wood Mountain to Willow Bunch: (V—316	250
Edmonton to Athabasca	250

On enquiry by telephone to-day, Accountant Kingston informs me that no vouchers have yet been received by him, showing the disposition of these advances.

Mr. Charleson explains orally, that he is still in communication with Mr. J. Y. Rochester (superintendent at Vancouver) about these accounts; and he hopes to be able to close them up shortly.

As the most of the work was probably done in the fall of 1904, the book-keeping should have been completed over a year ago, and any balances refunded.

This complaint is not a new one, in connection with Mr. Charleson's affairs.

In future please have different arrangements made, which will ensure a speedy accounting by Mr. Charleson, or by any other officers of similar dilatory business habits.

The vouchers now under discussion should be sent at the earliest possible moment.

I am, sir, your obedient servant,

The Deputy Minister Public Works. J. FRASER, *A.G.*

Letters-of-Credit: Conditions to Observe.

AUDIT OFFICE, OTTAWA, May 11, 1905.

SIR,—Let me acknowledge receipt of your application No. 512, for a letter-of-credit for $200,000 in favour of the deputy minister and accountant.

I beg to call your attention to a Treasury-minute of December 2, 1895 (page A—18, of 1903-04), directing that all departmental employees at Ottawa (other than those extra clerks and messengers who are paid from civil government contingencies, and labourers and mechanics) be paid on pay-lists certified by the Auditor General before payment.

At pages V—17 to V—21 of my report for 1903-4, you will find the names of a number of departmental employees who were not paid in the manner prescribed in the Treasury minute. Please consider that your letter-of-credit is not available for payment of such departmental employees, until this preliminary audit of their pay-lists has been made.

Moreover, departmental services should be charged only to the five votes specifically provided therefor in the Supply Bill. The pay-lists sent here for audit should mention which vote is to be charged.

Another class of payments which you will please hold to be outside of the scope of your letter-of-credit, is payments of any kind (whether salaries or expenses) to persons who are holding balances of cash advances for an unduly long period after the completion of the service for which the advance was obtained.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, May 18, 1905.

DEAR SIR,—I have the honour to acknowledge the receipt of your letter of the 11th instant.

As much as possible we are gradually placing all the temporary employees of our department under one or the other of the several appropriations given to us by Parliament for the payment of our additional clerical assistance. When at the end of this month the department is preparing the list for the next fiscal year, I shall make it my duty to include in that list all of the temporary clerks who are now paid from other votes than the above. You must have noticed that during the past months several Orders in Council have been passed to that effect.

I will also have the accountant see that action be taken in the sense of the last paragraph of your letter.

I am, sir, yours very truly,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, May 20, 1905.

SIR,—Let me acknowledge receipt of your letter of May 18, which reads as follows: "As much as possible we are gradually placing all the temporary employees of our department under one or other of the several appropriations given to us by Parliament "for the payment of our additional clerical assistance. When at the end of this month "the department is preparing the list for the next fiscal year, I shall make it my duty "to include in that list all of the temporary clerks who are now paid from other votes "than the above."

A fair paraphrase of this appears to be, 'We are gradually approaching obedience "to the law; but we will defer full compliance therewith until some time in the future."

Compliance with law cannot be postponed. The accounts at present under my consideration are those running from July 1, 1904, to June 30, 1905; and I have no authority to recognize any irregularity in them which can be overcome by sufficient effort.

Please transfer to the votes for 'Departmental Services' all such payments as have been made from other votes since July 1, 1904; and do not use the letter-of-credit to cash unaudited pay-lists during the balance of the year.

I should be pleased to see a copy of your instructions to the accountant, which you mention in the last paragraph of your letter.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, June 2, 1905.

SIR,—With reference to your letter to me concerning the charging of all the salaries for temporary clerks of this department against the four votes for the Chief Engineer's, the Chief Architect's, the Telegraph Services and General Clerical and other assistance, in order that none of the salaries of the clerks so employed be charged to any votes outside of the above, I beg to inform you that I am at present taking the necessary steps in order that this may be done in an absolute and complete manner.

For that purpose, as soon as the Minister returns to Ottawa, the usual recommendation for the employment of temporary clerks during the next fiscal year will be made to contain such temporary employees without exception.

I realize myself that in so far as this department is concerned, it is better that it be so, the work of making those payments of salaries being thereby rendered easier while putting us in agreement with the lines laid down by you in the previous correspondence exchanged on this matter.

I do not think that in any of my former letters, the opinions which I expressed regarding the intentions of the department, justify the paraphrase referred to in your last commuication.

At that moment there was before Council a recommendation to place on the lists several of the employees of the department which had lately been given employment, and as I was not aware that the Order in Council had passed, I could only qualify the action of the department by stating that, as much as possible, action was being taken in the direction of meeting the desires expressed by you.

I need only repeat that the course to be followed hereafter by the department will be in the direction of placing every person now employed, as well as those to be employed, as a charge against the appropriations granted by Parliament for the payment of all employees not on the civil service list, such appropriations being made sufficient to cover all such expenditure.

I am, sir, yours very truly,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, June 19, 1905.

SIR,—I have passed your application No. 592, for a letter-of-credit of $200,000 in favour of yourself and Accountant Kingston.

It is noticed that large payments are made through your letter-of-credit for dredging under contract. In 1903-4 these payments amounted to $357,024.57.

In future please send similar accounts to this office, for audit before payment, as is done with other expenditure for large works.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, January 26, 1906.

SIR,—In connection with the Letter-of-Credit system, and Audit after payment, it is absolutely necessary that this office should be furnished with prompt replies to letters asking for information in reference to payments made out of the Credit.

On looking over the past records, I find that, very frequently, letters written to your department have had no reply. This is particularly noticeable in the correspondence for the fiscal year 1904-05.

It is easy to understand that, in the press of business of such a department as the Public Works, it may be difficult at times to attend promptly to all its affairs; but a speedy audit of the accounts is of such importance that every reasonable effort should be made to give immediate replies while the matters are fresh in the minds of those having to deal with them.

In the course of a recent conversation between us, you very kindly expressed your desire to assist me in the examination and settlement of your accounts; and I think you remarked that my requests for information have so far been reasonable. It is intended that they shall continue reasonable, although they may not always appear so to those who see only one side of the question.

The audit-work would be greatly facilitated by your giving instructions to your various officers, to make as prompt replies as circumstances will permit, to my requests for information in future; and when the information is not obtainable, to make mention (at least) of that fact without delay.

Please favour me with a copy of whatever instructions may be issued by you in this sense.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT. OTTAWA, 29th Jan., 1906.

SIR,—I have received your letter of the 26th January, in reference to the correspondence which takes place, from time to time, between the Audit Office and this department, *re* the information required by you concerning payments made out of the credit of this department.

Of course there are many reasons which may concur to delay the answers to the letters sent by your office. Very often the information sought cannot be obtained without referring back the accounts either to the Resident Engineer or Architect in charge of the work, or sometimes to the local foreman in charge, for the elucidation of the points raised, and the answers to the questions asked.

It may be also that in cases some replies might be sent sooner.

I have discussed the matter with the Hon. the Minister, and he agrees with me that it is most desirable that, whenever at all possible, immediate replies should be sent to questions asked by your office; and I am arranging with the officers in charge of the several branches to whom your requests are sent, to furnish the needed information with the most possible diligence.

I intend to see myself that no undue delay shall occur.

I agree with you as regards the importance of having such correspondence attended to immediately, and I must say that, in conversing with the Minister, I was quite pleased to tell him that I thought your requests for information were, in the main, very reasonable, and that I had not yet seen any reason why the information should not be cheerfully given, as such would only tend to render clearer the transactions of this department, and thereby expedite the completion of our payments.

I do not propose to issue any special instructions in the department, further than to ask that, as soon as a request is received from your office, the information required

be prepared forthwith, or that when such information cannot be given at once the reasons for delay be given to me, in which case I would order said reasons to be made known to you at once. ....

I am, sir, yours very truly,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, 5th Feb., 1906.

SIR,—Let me acknowledge receipt of your letter of January 29, concerning delays in answering correspondence *re* Public Works Expenditure.

Please have early replies prepared on five subjects, of which reminders were sent to you under date of January 18, 1906, as follows:—

Travelling-Express: Chief Engineer Lafleur: Jan. 23, 1905.
Travelling-Express: Secretary Gélinas; April 22, 1905.
Ottawa Observatory: Ahearn & Soper: Oct. 23, 1905.
Trois Pistoles: Construction of Breakwater: March 16, 1905.
Port Burwell: Hardwood Timber: Oct. 23, 1905.

There is also a letter of May 11, 1905, concerning the Warren Paving Company's account, in which most of the requests for information are still unanswered.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

Travelling-Expenses: Chief Engineer Lafleur.

AUDIT OFFICE, OTTAWA, January 23, 1905.

SIR,—Let me acknowledge receipt of a Civil Government pay-list in favour of Chief Engineer Lafleur (now appointed permanently), to pay his December and January permanent salary at $3,500.00 a year, as follows:—

December, $291.66; January, $291.66	$583 32
Less 5 per cent for Retirement Fund	29 16
Net pay-list in favour of Mr. Lafleur	$554 16

Your department has overlooked the fact that the December pay-list for 'Chief Engineer's Staff' contained an item of $250.00 for Mr. Lafleur's services as Acting Chief Engineer. This should be subtracted from the Application now in hand, which is returned herewith. A transfer-entry for $250.00 will keep the appropriations straight.

The following advances were made to Mr. Lafleur in August, 1904, charged to 'Surveys and Inspections' of 1904-5:—

44314: Aug. 6: On acct. travel and disbursements	$ 700
44724: August 23: On acct. disbursements	1,000

We have not received any statement of the expenditure made from these advances. Please have this omission rectified.

It would be well, in connection with advances from all of your votes, to observe the rules laid down for advances from 'Civil Government Contingencies' by the Order-in-Council of March 4, 1897, shown at page A—12 of my Report for 1902-3, namely: All advances to be accounted for at the end of each quarter; and no advance to be made until previous advances are settled.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, Feb. 6, 1905.

SIR,—In reference to your letter of the 23rd January, concerning the payment to the Chief Engineer, Mr. Lafleur, of his permanent salary since his recent appointment, I understand the pay-list has been corrected by the deduction of the December salary received by Mr. Lafleur as Acting Chief Engineer.

As regards the advance made to Mr. Lafleur, to which you refer, I beg to state that this gentleman is now preparing a statement of such expenditure, which I will have the pleasure to send you as soon as made. I may however say here that the second advance to Mr. Lafleur was made while he was in the course of an inspection tour in the Maritime Provinces, and that it was not in the full sense of the word a second advance, but practically one and the same, as he did not return to Ottawa before the second cheque was sent to him.

In connection with the last paragraph of your letter, with which I agree, I may say that instructions will be given in the department in order that the rule thus laid down be followed in future.

Yours very truly,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, May 12, 1905.

SIR,—Let me call your attention to my letter of Jan. 23, 1905, concerning two advances to Chief Engineer Lafleur, for travel and disbursements, as follows:—

44314: Aug. 6, 1904	$ 700 00
44724: Aug. 23, 1904	1,000 00

No accounts of the disposition made of these advances had been received, up to the date of that letter, Jan. 23, 1905.

In a letter of Feb. 6, 1905, you replied: "As regards the advance made to Mr. "Lafleur, I beg to state that this gentleman is now preparing a statement of such ex-"penditure, which I will have the pleasure to send you as soon as made."

The statements of expenditure thus promised have not yet been received, nor has any refund by Mr. Lafleur yet come to account. A pay-list, however, covering Mr. Lafleur's salary for January and balance of December, amounting to $333.32, was held in this office; so that it is only the balance from $1,700, namely, $1,366.68, which is now under discussion.

Please try to have Mr. Lafleur's accounts reach me before the departmental pay-sheets for May 15 are certified. Otherwise I shall have to hold his item in suspense. suspense.

Then I must report this matter without delay to the Treasury Board. It seems to me to indicate a great disregard of reputation, for an official in Mr. Lafleur's high position to delay the settlement of large accounts. This is particularly the case if he has disbursed most of the amount, as I have no doubt he has.

I am, sir your obedient servant.

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, June 10, 1905.

SIR,—Let me call your attention to my letter of May 12, concerning $1,700 advanced to Chief Engineer Lafleur in August, 1904.

No refunds or vouchers have yet been received here; and the Accountant answers me by telephone that he does not know of either having come into his branch.

The $1,700, which was reduced by $333.32 by holding Mr. Lafleur's salary for January and part of December, was still further reduced by holding his May salary of $277.08, leaving now $1,089.60 outstanding.

Please have Mr. Lafleur prepare his accounts before June 15, and refund any unexpended balance. There can be no salary passed for him until this is done.

I am totally unable to comprehend Mr. Lafleur's inaction in this matter.

Copies of this correspondence will be sent to the Treasury Board.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, June 12, 1905.

SIR,—Enclosed please find, for the information of the Treasury Board, copies of correspondence with Deputy Minister Gobeil, on the subject of cash advanced to Chief Engineer Lafleur, charged to 'Surveys and Inspections' of 1904-5.

Mr. Lafleur's account now stands as follows:—

Advance of Aug. 6, 1904	$ 700 00	
Advance of Aug. 23, 1904	1,000 00	
Dec. and Jan. salary held in Audit Office		$ 333 32
May salary held in Audit Office		277 08
Still due by Mr. Lafleur, June 12		1,089 60
	$1,700 00	$1,700 00

I have not been able to obtain from Mr. Lafleur any accounts or refunds for the balance, $1,089.60, shown above.

I am, sir, your obedient servant,

The Secretary, Treasury Board. J. L. McDOUGALL, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, July 12, 1905.

SIR,—With reference to previous correspondence, I beg to inform you that the Chief Engineer of this Department, Mr. E. D. Lafleur, has placed in the hands of the Accountant a full supply of vouchers covering the advances made to him on account of travelling expenses.

Yours very truly,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, July 17, 1905.

SIR,—I have received, from the Accountant's Branch of your Department, a statement of the disposal of $1,700 advanced to Chief Engineer Lafleur, as follows:—

Advance, Aug. 6, 1904	$ 700 00	
Advance, Aug. 23, 1904	1,000 00	
Expenditure, Aug. 6, 1904, to July 10, 1905		1,434 78
Balance refunded, July 10, 1905		265 22
	$1,700 00	$1,700 00

Mr. Lafleur's May and June salary have therefore been released. There are however some points on which further information is necessary.

Second Advance was not required.

My letter of Jan. 23, 1905, contained this paragraph: "The following advances "were made to Mr. Lafleur in August, 1904, charged to Surveys and Inspections of "1904-5: Aug. 6, acct. travel and disbursements, $700; Aug. 23, acct. disbursements, "$1,000. We have not yet received an account of the expenditure made from these ad-"vances. Please have this omission rectified."

Your reply of Feb. 6, 1905, said: "This gentleman is now preparing a statement "of such expenditure, which I will have the pleasure to send to you as soon as made. "I may however say here that the second advance to Mr. Lafleur was made while he was "in the course of an inspection tour in the Maritime Provinces, and that it was not in "the full sense of the word a second advance, but practically one and the same, as he "did not return to Ottawa before the second cheque was sent to him."

Mr. Lafleur returned to Ottawa from the Maritime Provinces on the 7th of September, 1904. An analysis of the $1,434.78 vouchers now sent in by him indicates that the outlay was made in the following months:—

		Spent in month.	Total to end of month.
1904:	Aug. 6 to 31	$292 98	$292 98
"	September	122 33	415 31
"	October	121 10	536 41
"	November	151 04	687 45
"	December	181 80	869 25
1905:	January	50 18	919 43
"	February	88 90	1,008 33
"	March	126 04	1,134 37
"	April	96 29	1,230 66
"	May	85 03	1,315 69
"	June	112 09	1,427 78
"	July 1 to 10	7 00	1,434 78
		$1,434 78	

These figures show that Mr. Lafleur's first advance of $700, dated Aug. 6, 1904 did not run until December, as he had spent only $687.45 up to Nov. 30. Why did he draw the $1,000 on Aug. 23, 1904? Please let me have this information at an early date.

No Sub-vouchers have been given.

There should be receipted bills for all the larger items of hotel expenses, and for the items 'Satchel $8,' 'Dress-suit case $10,' and 'Rifle and cartridges $46.' I suppose these were turned into the Department at the conclusion of the trip.

In what manner was the rifle involved in Mr. Lafleur's performance of his public duties in the Maritime Provinces?

Vouchers not signed by the Deputy Minister.

Please attach your approval to the account of $1,434.78, returned herewith for that purpose.

I am, sir, your obedient servant,

The Deputy Minister Public Works. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, January 18, 1906.

SIR,—Let me call your attention to Mr. McDougall's letter of July 17, 1905, on the subject of Chief Engineer Lafleur's travelling expenses.

After asking for sub-vouchers, and remarking on the purchase of a rifle, Mr. McDougall went on to say, to yourself as Deputy Minister, "Please attach your approval to the account of $1,434.78, returned herewith for that purpose."

No answer has yet been received to the letter in question.

Please have this matter taken up and disposed of satisfactorily at an early date.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

Travelling Expenses: Secretary Gélinas.

AUDIT OFFICE, OTTAWA, April 22, 1905.

SIR,—Let me call your attention to some items in the accounts of Mr. F. Gélinas for travelling-expenses.

28 trips from Ottawa in 1903-4.

The sum of $1,096.80 is charged as the cost of 28 trips between July 1, 1903 and June 30, 1904; 25 trips being to Montreal and return, and 3 to Montreal and Quebec and return. The time consumed was 82 days, or parts of days.

The charges for 'Letters, Telegrams, Telephones,' have been entered together each day in gross, at sums which appear too round to represent actual transactions; and they are also much larger than those claimed by any other government officer within the range of my memory. For 79 days the entries for these services are: 3 days at $2.50, 2 at $2.75, 21 at $3, 1 at $3.25, 42 at $3.50, 4 at $3.75, 5 at $4, 1 at $4.50; total $265.75. The three items (letters, telegrams, telephones), should be shown separately, at the exact amounts expended.

Similarly, the charges for 'Cabs and Street-cars' in Montreal and Quebec are in round sums of unusual size. For 50 days the entries for these services are: 1 day at $2.50, 1 at $3, 1 at $3.25, 19 at $3.50, 2 at $3.75, 17 at $4, 7 at $4.50, 1 at $5, 1 at $5.50; total $192.75. The two classes of outlay should be kept separate, and the cab-hire should be itemized.

Cab-hire in Ottawa in 1903-4.

Mr. Gélinas' charges for 'Cab-hire in Ottawa' from office to house and station, and from station to house, in connection with the above-mentioned 28 trips, amount to $59. His other charges for 'Cab-hire in Ottawa' during the year amount to $404. Total $463. This is much larger than any sum ever charged before by any one of lower than ministerial rank. There should be a statement from Mr. Gélinas that only tariff-rates were paid, and that the service to the government could not have been as efficaciously performed by using the street cars. The directory gives Mr. Gélinas' residence as 582 Lisgar street, only 2½ blocks from the Somerset street car line.

13 trips from Ottawa: July 1 to Oct. 31, 1904.

The sum of $464.50 is charged as the cost of 13 trips between July 1 and October 31, 1904: 12 trips being to Montreal and return, and 1 to Montreal and Quebec and return; the time consumed was 33 days or parts of days.

The charges for 'Letters, Telegrams and Telephones' for which no further details are given, amount for 30 days to $110.20 as follows: 1 day at $3.20, 22 at $3.50, 3 at

$4, 4 at $4.50. The charges for 'Cabs and Street-cars' in Montreal and Quebec (no items given) amount for 22 days to $84, as follows: 1 day at $2, 2 at $2.50, 6 at $3.50, 5 at $4, 8 at $4.50. Details are given for $20 additional cab-hire in Montreal, being 12 trips at $1.50 and 1 at $2. See remarks as to 1903-4 for additional information necessary.

Cab-hire in Ottawa: July 1 to Oct. 31, 1904.

Cab-hire to and from house and Ottawa station, in connection with trips out of Ottawa, amounted to $31.75; other cab-hire in Ottawa during the same period, $62.50; total for 4 months now under consideration, $94.25. Previous remarks apply.

General Principles:

It is, I think, the duty of the Deputy Minister to supervise and control all accounts of this nature which in any way diverge from Departmental routine. Please do this in future. Any past accounts which you cannot approve should be rectified.

In view both of the indefiniteness of the details, and of the unusual largeness of the items, I would like to have Mr. Gélinas make a categorical declaration that the sums were all actually spent. He should also give the calculations by which he established the amount to charge for each day. It may be that he considered himself entitled to an allowance for these expenses, in proportion to his time.

Of the 41 trips mentioned above, 37 were to Montreal, and 4 to Montreal and Quebec. Now, the Departmental duties which would take Mr. Gélinas out of Ottawa, would (at first sight) lead him in several directions, instead of in one. The Deputy or Minister should therefore approve explicitly the fact of his going constantly to one place, and should certify that it is on public service.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, 18th Jan., 1906.

SIR,—Let me call your attention to Mr. McDougall's letter of April 22, 1905, on the subject of the accounts rendered by Mr. Secretary Gélinas for travelling-expenses.

No answer has yet been received to the letter in question.

Please have this matter taken up and disposed of at an early date.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

Travelling-Expenses: Proposed Regulations.

AUDIT OFFICE, OTTAWA, June 30, 1905.

SIR,—I have examined your draft 'Memorandum of Instructions to the Accountant of the Department of Public Works, concerning advances to officials for travelling-expenses or for other disbursements.'

In the main, the provisions are satisfactory. I have however made a few alterations, and send you herewith a copy as amended.

Please have the new system (as enclosed) put into force from July 1, 1905.

I would be glad to see a copy of your letter to the Accountant, making these rules a part of the constitution of his office.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

(Proposed) Instructions to Accountant, concerning Advances to Officials for Travelling-Expenses or Other Disbursements.

1. An advance for travelling-expenses must not exceed by more than 25 per cent the statement of probable travelling-expenses, made out by the applicant, and approved by the Accountant.

2. No second advance shall be made to any officer of the Department for travelling-expenses, should he return to head-quarters after the first advance, until he has accounted for the first advance, and deposited the balance.

3. The same course will be followed if the employee has fixed headquarters outside, to which he periodically returns.

4. A second advance will only be allowed before the rendering of the account for the first advance, when the employee is in course of performing the travel intended when the first advance was made, and the funds so given at first are found insufficient to enable the trip to be completed.

5. Every advance for travelling-expenses is to be accounted for within 30 days after the completion of the trip.

6. For resident-engineers and other officers not resident at Ottawa, whose employment is of a permanent nature, the practice in vogue during the past few years may be continued, namely: An advance limited in amount to absolute requirements is made at the officer's first appointment; each account is paid in full when certified; at the close of the fiscal year a cheque is drawn against the appropriation of the coming year, and refunded to close that of the former year; and an advice of this action is sent to the officer during the month of July in order to refresh his memory as to the exact state of his account.

7. All officers resident at Ottawa, however, and others not at Ottawa whose employment is not of such a permanent nature as those above referred to, shall be called upon to deposit unused balances out of funds in their own hands, and no other advance shall be made from the Department in order to enable them to do so.

8. All accounts must be made in duplicate, properly certified, and approved by the Chief of the Branch, before being sent in for payment.

9. All accounts of moneys advanced to disbursing officers for disbursements, other than travelling-expenses, must be covered by vouchers within 30 days from the date of such advances; and, as in the case of travelling-expenses, no subsequent advance in the succeeding fiscal year shall be made for recouping any advances made and not accounted for during the fiscal year to be closed.

10. Along with the vouchers for each month, the Accountant shall send to the Auditor General a statement of the advances outstanding and not accounted for, showing names, dates, and amounts.

11. No payments shall be made on salary-account to officers in arrears for advances, who fail to comply with the regulations above prescribed.

AUDIT OFFICE, OTTAWA, 18th Jan., 1906.

SIR,—Let me call your attention to Mr. McDougall's letter of June 30, 1905, returning (with amendments) your proposed Instructions to the Accountant *re* Advances for Travelling-Expenses.

Please let me have a copy of whatever Instructions were subsequently issued to the Accountant on this subject.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

Arbitrations and Awards: Extra Payments to Messrs. Gobeil, Lafleur and Brophy.

AUDIT OFFICE, OTTAWA, March 13, 1905.

SIR,—Let me call your attention to three payments charged to 'Arbitrations and Awards,' on vouchers reading 'Services as arbitrator on Board of Arbitrations and Awards, in the cases of Messrs. Pigott, Crane, Tompkins and McDonald & Moffatt: Dec. 1, 1903, to June 30, 1904.' The cheques are as follows:—

43448: A. Gobeil, chairman	$400
43449: E. D. Lafleur, arbitrator	400
43450: Geo. P. Brophy, arbitrator	400

The wording of the Votes for 'Arbitrations and Awards' in the Supply Bills of 1903 and 1904 is: 'Arbitrations and Awards, including payments authorized notwithstanding anything in the Civil Service Act, $5,000.'

In view of the positive categorical inhibitions throughout all Civil Service Acts, against making extra payments to permanent Civil Servants, any exceptions to the universal negative practice should have been voted explicitly by name, rank and amount.

Moreover, under Sec. 52 of the Civil Service Act of 1886, all payments to permanent employees (other than salaries) shall be made only under the authority of the Governor-in-Council.

It will still be necessary, I think, to obtain the authority both of Council and of Parliament.

I shall be glad to have your reasons for making the payments.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

DEPT. OF PUBLIC WORKS, OTTAWA, 10th April, 1905.

SIR,—I have the honour to acknowledge the receipt of your letter of the 13th ultimo, having reference to certain payments made to officers of this Department out of the vote for Arbitrations and Awards. In that letter you call attention to the fact that certain provisions of the Civil Service Act should be made to apply in the present case, and you ask me to state my reasons for making the payments in question.

In reply, I may say that there is no payment, out of the many which have been made by the Department, which I think comes more within the intention of Parliament and has been made more in accordance with the provisions of the vote granting the money which enabled it to be made.

It seems to me that in granting money for any purposes there are two points required in order to conform with the instructions of Parliament: the first is that the payment shall be made for the purposes only for which the money is voted within the stipulations of the vote; and the second, that Parliament shall in due course be notified and made aware of what payments have been made on the said vote.

The vote for Arbitrations and Awards explicitly states that it conveys authority for making payments notwithstanding anything to the contrary in the Civil Service Act. To my mind, this means that under ordinary circumstances the provisions of the Civil Service Act would prevent certain payments intended to be made under that vote, and that it was intended plainly to ask Parliament for authority to make these payments, whatever might be the objections under ordinary circumstances to be found in the Civil Service Act.

As a matter of fact, in so far as these particular payments were concerned, Parliament authorized the setting aside of the Civil Service Act so that any prohibition

therein contained would be of no account, the will of Parliament in this matter being clearly and specifically expressed.

As regards the information to be given to Parliament of the payments made under such specially authorized vote, I find that at page V—20 of your annual report, you specifically reported those payments, so that Parliament has been made aware of the action taken under the special vote which it was its pleasure to grant.

I have never had any doubt whatever as to the propriety of making the payments in question, neither had the Hon. the Minister when his authority was asked for making said payments.

I have not the least doubt that when the vote will again be brought to the attention of Parliament under the same wording, the Minister will give to Parliament, if required, full explanations which will very likely bring to the attention of the Members of the House the report made by you at page V—20 of your book of the expenditure made, but I hope you will agree with me that in this case the authority granted by Parliament was so explicit and was so clearly intended to lay aside any provision of the Civil Service Act, that there could be no doubt in the minds of any of the officers of the Department that full authority existed for taking the action which resulted in the making of the payments referred to by you.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, May 6th, 1905.

SIR,—Let me acknowledge receipt of your letter of April 10, concerning the following three payments in 1903-04 out of the Vote for 'Arbitrations and Awards':—

43448:	A. Gobeil, chairman	$400 00
43449:	E. D. Lafleur, arbitrator	400 00
43450:	Geo. P. Brophy, arbitrator	400 00

Since writing my letter of March 13 on this subject, I notice that you have drawn another cheque, No. 85966, of March 15, for $500 in favour of yourself, charged to the Vote for 'Arbitrations and Awards' in 1904-05.

The full wording of the Vote is the same in each year, namely: 'Arbitrations and Awards, including payments authorized notwithstanding anything in the Civil Service Act.'

Limitations imposed by Civil Service Act.

The restraints of the Civil Service Act may be classified according to their nature, into the following groups:

A: Examinations, age-limit, certificates of health and morals, limit to entrance-salaries.

B: No extra salary unless specially voted.

C: Appointments, increases and promotions must be authorized by Council.

A: Examinations, Age, Certificates, Limited Entrance Salary.

These sections, in the case of a candidate who does not satisfy them, raise objections which are (at the time of action) insurmountable except by waiver. The Candidate may not have passed the examination; he may be under or over age; he may be unable to obtain good certificates; and he may not be content to accept the entrance-salary fixed for an examined and certificated appointee into the other Departments.

These are the restrictions which have always been held to be waived by the wording (now too common in the Supply Bills) 'Notwithstanding anything to the contrary in the Civil Service Act.'

B: No Extra Salary unless Specially Voted.

There have been two methods of providing in the Supply Bill for extra pay to permanent officers:—

(1) Naming the officer, and fixing the amount when known beforehand;

(2) Using some phrase which shows categorically that extra pay to permanent officials is intended: such as that given under the Vote for Labour Department, namely: "Including $500 each for an accountant and a French translator, *which sum may be "paid to anyone in the Civil Service*, notwithstanding anything in the Civil Service "Act."

As far as my memory serves me, the clause 'Notwithstanding anything to the contrary in the Civil Service Act' (with no further modification), has never been used to cover extra pay to permanent officials.

C: Appointments, Increases and Promotions must be authorized by Council.

These are restrictions by the whole Executive on the individual Departments; and there seems no reason for considering them as waived by the Supply Bill, since Council is always at hand to act for itself, and give authority when necessary.

This is why no previous effort has been made to use the ordinary 'Notwithstanding' Vote, to free the Department from a wholesome limitation which it may find temporarily inconvenient.

Why should the Department seek to evade Council in the present instance?

Objections on the Merits of the Case.

Extra pay might, I think, be fairly sought by a subordinate officer who has happened to be unusually serviceable in an emergency; but only on account of special qualifications different from those which obtained his appointment to his present office,—though existing at that time, or since acquired outside his official duties.

Extra pay should not be sought by officers whose special qualifications have been acquired in the exercise of the duties for which they have received their regular pay. This is the case with the three officers now under consideration, namely, Messrs. Gobeil, Lafleur and Brophy—especially the first of the three.

Extra pay should not be given to permanent officers for work which falls within the scope of their routine duties. Who are to settle claims against the Department, if not the Deputy Minister and the Chief Engineer?

Extra pay is most certainly superfluous for work performed in Government time, or in time which would otherwise be devoted to the usual Departmental duties.

Extra pay should not be given to themselves by the controlling officers of a Department, who are expected to resist similar claims from subordinates. Their efficiency for such resistance is seriously impaired, by the fact of their own hands not being free.

Requirements by Auditor General.

The three items paid in 1903-04, of $400 each to Messrs. Gobeil, Lafleur and Brophy, should be included specially in the Supplementary Estimates, mentioning the names, official positions, and amounts.

The same three items should be authorized by Order-in-Council.

The $500 paid to Mr. Gobeil in 1904-5 should be specially voted in the Supplementary Estimates, mentioning name, official position and amount.

The item of $500 should also be authorized by Order-in-Council.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, 18th May, 1905.

SIR,—I have the honour to acknowledge the receipt of your letter of the 6th instant, in reference to payments made to the Deputy Minister, Messrs. Lafleur and Brophy, out of the vote for 'Arbitrations and Awards.'

As I think no further argument would have the effect of smoothing over the difference which exists in our views on that matter, I have taken the course of seeking the advice of the law officers of the Crown, as it is a matter purely of law to find out whether the vote, as made and expressed by Parliament, does or does not justify the course which has been followed under the circumstances.

Were it not that some of the statements made in that part of your letter, bearing upon the merits of the case, are, unwittingly, I suppose, not in accordance with facts as they exist, I would not, as I do, take the liberty of referring shortly to them.

For instance, I may say that the services which I have rendered to the Departmental Board are exactly of the nature mentioned in the first paragraph of your objections on the merits of the case. Whatever qualifications I may possess as a member of the bar, are the qualifications which have enabled me to do the work connected with the investigations which have been made. Those qualifications I acquired since my appointment as Deputy Minister and are entirely of a different order from those which I possessed when I was appointed to my office.

In fact, not only was I chairman of the investigation board, but I also carried on the examination and cross-examination of the witnesses, and generally watched the cases on behalf of the Department, saving thereby a fairly large expense, as the services of counsel would probably have amounted to a much larger sum than the total paid to me.

The above remarks will apply also to the second paragraph of the objections above referred to.

Concerning the third paragraph, I may say that the work which was done in the special investigations of claims made is not work which falls within the scope of the routine duties of the officers in question. As a matter of fact, ordinary claims not requiring special investigation are daily dealt with by the Department without any expectation on the part of the officers of any extra payment.

As regards the last paragraph of the objections in question, I may say that the said extra pay has not been given to the officers named, by themselves, as you state, but was given under the authority of the Minister, of whom they are the subordinates.

The vote with the special condition attached to it was placed by the late Minister in the estimates, and it is in accordance with the spirit of that vote and the intention of Parliament that the Minister authorized the payments which have already been made.

As soon as I have obtained the opinion of the Department of Justice on the point raised by you, I will hasten to communicate it to you; and allow me to repeat what I said in my last letter, that I have no doubt whatever that, when the vote for this year comes before Parliament for its consideration, the Minister will give such information, as to names, payments, etc., as will fully satisfy any enquiry which may be made in the matter.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, 20 May, 1905.

SIR,—Let me acknowledge receipt of your letter of May 18, concerning the payments to yourself and others, out of the Votes for 'Arbitrations and Awards.

I notice that the Supplementary Estimates for 1904-5 have just been laid before the House of Commons, and that they do not include items to provide explicit author-

ity for these payments, although such a Vote was requested in previous correspondence.

Please have a Special Supplementary Estimate for these items prepared at an early date, so that they can be passed in the same Supply Bill.

Unless the authority of Parliament and of Council is obtained, giving names and amounts, I shall be obliged to withhold the sums from the Departmental pay-lists.

You have of course the usual statutory appeal to the Treasury Board.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, June 13, 1905.

SIR,—Let me call your attention to my letter of May 20, on the subject of payments to yourself, Chief Engineer Lafleur, and Engineer G. P. Brophy, out of the Votes for 'Arbitrations and Awards.'

The conclusion of that letter was: "Unless the authority of Parliament and of "Council is obtained, giving names and amounts, I shall be obliged to withhold the "sums from the Departmental pay-lists. You of course have the usual statutory appeal "to the Treasury Board."

There does not appear to have been any answer received from you yet in this office.

Please let me know what progress you have made towards obtaining the authority of Parliament and of Council, in the manner described above. I would like to have this information before June 15, the date of passing the Civil Government salaries.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, June 12th, 1905.

SIR,—With reference to previous correspondence concerning the payments by the Department out of the vote 'Arbitrations & Awards,' I beg to state that in accordance with the last paragraph of your letter of the 28th May, I have taken steps to have the matter laid before the Treasury Board.

With a view to this early submission, I have asked a report from the Department of Justice of which I am in receipt.

As soon as the Minister returns to the Department, the necessary report will be prepared and sent over. His absence alone has prevented me from laying the matter before him before now.

If the Treasury Board coincides with your view, there will be plenty of time to have an item inserted in the Supplementary Estimates. Should the view of the Department be sustained, no further action will be required.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, June 14, 1905.

SIR,—Inclosed please find, for the information of the Treasury Board, a copy of correspondence between Deputy Minister Gobeil and myself, on the subject of payments to himself, Chief Engineer Lafleur and Engineer Brophy, for Extra Services.

I am, sir, your obedient servant,

The Secretary, Treasury Board. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, July 6, 1905.

SIR,—Let me call your attention to my letter of June 14, 1905, inclosing (for the information of the Treasury Board) copies of correspondence with Deputy Minister Gobeil, on the subject of payments to himself, Chief Engineer Lafleur and Engineer G. P. Brophy, for Extra Services.

In the Supplementary Estimates laid before Parliament yesterday, I find no item intended to legalize these payments, as far as they are defective in Parliamentary authority. Neither have I yet received any intimation that the necessary Order-in-Council has been passed or prepared.

I now submit, for a ruling by the Treasury Board, the three following objections:

Under 32 A: There was no parliamentary authority for making extra payments to permanent officials;

Under 32 C: The payments, even had they been sanctioned by Parliament, were not legal without a Special Order-in-Council;

Under 32 C: The money was not justly due, as the services were covered by their ordinary salaries (at least in the cases of Messrs. Gobeil and Lafleur).

I am, sir, your obedient servant,

The Secretary, Treasury Board. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, 18th January, 1906.

SIR,—Let me call your attention to Mr. McDougall's letter of July 6, 1905, submitting three objections to payments to Messrs. Gobeil, Lafleur and Brophy for Extra Services.

Please inform me of any action which may have been taken by the Treasury Board in this matter.

I am, sir, your obedient servant,

The Secretary, Treasury Board. J. FRASER, *A.G.*

Georgian Bay Canal Survey: Hobbs Hardware Co.

AUDIT OFFICE, OTTAWA, Sept. 23, 1905.

SIR,—With this please find a file of vouchers for supplies purchased by the Public Works Department from the Hobbs Hardware Co. of London, Ontario, for the Georgian Bay Canal Survey.

These accounts contain bills for surveyors' instruments, &c., bought by the Hobbs Hardware Co. from the following firms, as indicated on the vouchers:

C. L. Berger & Son, Boston	$6,329 00
Keuffel & Esser Co., New York	5,812 80
G. N. Saegmuller, Washington	3,916 00
W. & L. E. Gurley, Troy	197 00

Please let me know whether these supplies could not have been purchased at lower rates through the Government Stationery Office; and if so, the amount which could have been saved.

I am, sir, your obedient servant,

The King's Printer. J. FRASER, *A.G.*

PUBLIC PRINTING AND STATIONERY DEPT., OTTAWA, Sept. 25, 1905.

SIR,—Replying to your letter of the 23rd instant I beg to say that upon examining the accounts submitted to me I find full catalogue prices have been paid for articles supplied from the firms mentioned in your letter. It will appear upon referring to the accounts sent in as vouchers to your department, from time to time, that this department is in the habit of supplying goods of this nature at discounts varying from five to twenty per cent. Some of the items are new to us, but the most of them we have been supplying, and I presume that the average discount would be about fifteen per cent.

My remarks apply to the goods furnished by Messrs. Keuffel and Esser, Messrs. W. & L. E. Gurley, Mr. G. N. Seagmuller, and Messrs. C. L. Berger & Sons.

I am, sir, your obedient servant,

The Auditor General. S. E. DAWSON, *K.P. & C.S.*

Valleyfield Post Office: Théo. Bélanger.

AUDIT OFFICE, OTTAWA, Feb. 24, 1905.

SIR,—Let me acknowledge receipt of your Application No. 418 for $5,150 in favour of Théodore Bélanger, being Estimate No. 6 on Valleyfield Post Office.

There is a bill of extras of $1,385, described as 'Substituting copper for galvanized iron work,' which is certified fair and just by Mr. Edmond Lemay, the resident Clerk-of-works.

I would prefer to have the rates explicitly certified by the Chief Architect as well.

The papers are returned herewith, for completion in the direction indicated.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

Ottawa Observatory: Ahearn & Soper.

AUDIT OFFICE, OTTAWA, Oct. 23rd, 1905.

SIR,—In your expenditure during 1904-05 on 'Ottawa Astronomical Observatory,' I find four payments to Ahearn & Soper on account of Electric Wiring, which amount to $8,000 in all, as follows:—

78325: 1904, Sept. 12	$2,000 00
78326: 1904, Sept. 12	2,000 00
88064: 1905, May 19	2,250 00
88061: 1905, May 19	1,750 00

No voucher or estimate in final settlement appears to have reached this office, up to the present date. Please have this omission rectified as soon as possible.

What steps were taken to obtain competition, before awarding the contract?

I am, sir, your obedient servant,

The Secretary, Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, 18th Jan., 1906.

SIR,—Let me call your attention to my letter of Oct. 23, 1905, concerning four payments to Ahearn & Soper for electric wiring at the Ottawa Astronomical Observatory, amounting to $8,000.

No voucher or estimate has been supplied to this office; and no information has been given as to the manner of awarding the contract. No answer has been received to my request for the missing particulars.

Please have this matter taken up at an early date.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

Ottawa, Parliament Buildings: Warren Paving Co.

AUDIT OFFICE, OTTAWA, May 11, 1905.

SIR,—Let me call your attention to the expenditure in 1904-5 for 'Ottawa: Paving in front of Parliament Building.'

Votes, Agreements and Vouchers.

The two votes for this service were as follows:—

1904—July 18: Paving in front of Parliament Building, tar macadam	$6,900 00
1904—Aug. 10: Paving in front of Parliament Building.	3,000 00

The two agreements made by the Chief Architect with the Warren Bituminous Paving Co. were for the amounts below:—

1904—April 6: Warren's Bitulithic pavement, 2,900 yds. at $2.25	$6,525 00
1904—June 25: Warren's Bitulithic pavement, 1,350 yds. at $2.25	3,037 50

The vouchers for the work as performed are these:—

1904—Sept. 1: Paving, 2,222 yds. at $2.25	$4,999 50
1904—Sept. 1: Paving, 2,160·76 yds. at $2.25	4,861 71

Vote for Tar Macadam.

The main vote designated tar macadam. I am not familiar enough with the subject to know whether the specification for 'Warren's Bitulithic Pavement' comes under the wording of the Supply Bill. Please let me have a certificate in this direction from the Chief Architect or his pavement-expert.

Diagram required.

The agreement of April 6, 1904, refers to a tracing which showed the place where the 2,900-yd. pavement was to be laid. I should like to be supplied with a copy of this tracing.

Public Works Act not observed.

By section 13 of the Public Works Act as amended in 1903 (see page A—8 of my report for 1903-4), all works in excess of $5,000 must be let by advertised tender. The agreement of April 6, 1904, being for $6,525, should have come under this rule. Please let me know why tenders were not called for.

Further calculations needed.

The areas, corresponding to the 2,900 yds. and 1,350 yds. of the agreements, and to the 2,222 yds. and 2,160·76 yds. of the vouchers, might be marked on the diagram in such a way that the calculations of these four amounts can be checked.

Without such a diagram, showing a natural division between the 2,222 yds. and 2,160·76 yds. it would appear probable that the division had been so made merely to get the amount of the $4,999.50 voucher inside of the statutory limit of $5,000 above-mentioned.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, May 19, 1905.

SIR,—I beg to acknowledge the receipt of your letter of the 11th instant, calling attention to expenditure in 1904-1905 for 'Ottawa, paving in front of Parliament Building,' and asking to be supplied with information in the matter.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secretary.*

AUDIT OFFICE, OTTAWA, June 13, 1905.

SIR,—Please let me know what progress has been made in the preparation of an answer to my letter of May 11, 1905, concerning the accounts of the Warren Bituminous Paving Co. for paving in front of Parliament Buildings.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, July 21, 1905.

SIR,—I find that no answer has been received from you to my letter of May 11, asking for information concerning the account of the Warren Bituminous Paving Co. for 'Paving in front of Parliament Building.'

Please have this matter looked up, and send me a reply at an early date.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, Sept. 29, 1905.

SIR,—Under date of May 11, 1905, Mr. McDougall wrote to your Department, asking for information concerning payments to the Warren Bituminous Paving Co. for Bitulithic Pavement in front of the Parliament Building.

As no answer was received from you, letters of reminder were sent by Mr. McDougall on the 13th of June and 21st of July, 1905.

Please have the matter taken up at an early date, and supply the necessary information.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, Oct. 16, 1905.

SIR,—With further reference to the different letters written by Mr. McDougall and having reference to the work of paving in front of Parliament Building by the Warren Bituminous Company, we have endeavoured as much as possible to find out all the par-

ticulars that you require, but so far, and in the absence of Mr. Ewart, the Chief Architect, we are only able to cover the first paragraph of Mr. McDougall's letter, bearing date the 11th of May, 1905. The explanation of the Acting Chief Architect is embodied in the following memorandum addressed to me:—

"Having reference to the accompanying correspondence from the Auditor General "*re* pavement in front of the Parliament Building, I beg to say that with regard to the "wording of the Supply Bill, 'tar macadam' is applicable to the Warren Bitulithic "pavement, which is a variety of the macadam. In Mr. Ewart's absence, I am unable "to furnish the tracing asked for."

As to the balance of information required, I may state that Mr. Ewart will be back here in the latter part of next week, and we will then endeavour to supply you with the balance of information required in the above-mentioned letter of the 11th May, 1905.

I may add that the Warren Bituminous people, who have since completed a contract for paving on Wellington street, an entirely different work from the one mentioned in the above correspondence, are strongly pressing the department for payment of the moneys that are due on that second contract.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secretary.*

AUDIT OFFICE, OTTAWA, 18th Jan., 1906.

SIR,—Let me call your attention to letters from this office, dated May 11, June 13, July 21 and Sept. 29, 1905, asking for information concerning payments made to the Warren Bituminous Paving Co. for bitulithic pavement in front of the Parliament Buildings at Ottawa.

No answer has yet been received to the letters in question.

Please supply the required information at an early date.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, 20th Jan., 1906.

SIR,—I have received your letter of the 18th instant, concerning payments made to the Warren Bituminous Paving Co., for work in front of the Parliament Buildings in Ottawa.

In that letter you state that no answer has yet been received to the four letters which you have written on the question. It may be that the reply sent to you by the department on the 13th October was not absolutely satisfactory, but it seems to me that it is hardly fair to us for you to say that we have given no reply, as I find that the Secretary of the department wrote you, under No. 153054, on the 16th October last.

I am obtaining from the Chief Architect the balance of the information which the Secretary was then unable to furnish you with.

Yours very truly,

The Auditor General. A. GOBEIL, *D.M.P.W.*

Sault Ste. Marie Post Office: McPhail, McCarty & Wright.

AUDIT OFFICE, OTTAWA, Oct. 19th, 1905.

SIR,—Let me acknowledge receipt of your Application No. 306 for $1,000, in favour of McPhail, McCarty & Wright, on account of Fittings supplied for Sault Ste. Marie Public Building.

Attached is an agreement signed by this firm, which reads as follows: 'We will put fittings in Post Office as per plan and specifications, for the sum of $4,175.'

By the new 'Act respecting Contracts for Government Works' (1905, chapter 7), tenders are to be invited, except "in cases where the estimated cost of the work is less "than $5,000, and it appears to the Minister, in view of the nature of the work, that it "is not advisable to invite tenders."

It will be well, I think, to keep the records of the transaction complete, by having on the file a copy of the Minister's opinion that it was not advisable to advertise for tenders. Please supply this.

In the absence of public competition, the agreement should be certified 'Price fair and just' by the Chief Architect.

I am, sir, your obedient servant,

The Secretary, Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, Nov. 18, 1905.

SIR,—In reply to your letter of the 19th October ultimo, having reference to a last estimate in favour of Messrs. McPhail, McCarty & Wright on post office fittings, passed by the Chief Architect on the 17th of the same month, and requesting certain information more especially as to the advertising of this work, I may say that the Chief Architect, to whom your letter was communicated, has since reported as follows:

'I have noted that the agreement should be certified that 'the prices are fair and just. (Signed) D. EWART, Chief Architect. 27/10/05.'

'The tender $4,175 was sent to the Minister and he was told that it was a reasonable price and the Minister O.K'd. it. See tender in 282144 herewith.

'(Signed) D. EWART, Chief Architect. 30/10/05.'

I may add the contractors have been wiring and writing anxiously inquiring for the payment of their account.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secretary.*

AUDIT OFFICE, OTTAWA, 21st Nov., 1905.

SIR,—Let me acknowledge receipt of your letter No. 153578 of November 18, concerning the Estimate of Messrs. McPhail, McCarty & Wright for Post Office Fittings at Sault Ste. Marie.

Neither of the two requests in my letter of October 19 has yet been quite fully answered.

The certificate 'Prices fair and just' should be sent to this office. It is not sufficient for the Chief Architect to endorse the certificate on a document which remains in his own possession.

There should be a statement that it appeared to the Minister, in view of the nature of the work, that it was not advisable to advertise for tenders.

Please have these two defects remedied at an early date.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

Copy of tender.

SAULT STE. MARIE, ONT., 10th Aug., 1905.

The Chief Architect, Public Works Dept., Ottawa, Ont.

DEAR SIR,—We will put fittings in the Post Office as per plan and specifications for the sum of Four Thousand One Hundred and Seventy-five Dollars ($4,175.00).

Yours truly,

McPHAIL, McCARTY & WRIGHT.

Note by Chief Architect:

In order to avoid complaints and disputes between different contractors it has been found advisable to award the contract for post office, &c., fittings to contractors having the contract for the building, provided the price asked be reasonable.

This tender amounting to $4,175.00 from McPhail, McCarthy & Wright, contractors for the building is a fair and just price; recommend it be accepted in lieu of inviting tenders by public advertisement.

D. EWART,
Chief Architect.

O.K.—*C.S.H.*

AUDIT OFFICE, OTTAWA, 25th January, 1906.

SIR,—In further discussion of the Estimate of McPhail, McCarty & Wright, for fittings at the Sault Ste. Marie Post Office:—

The following memorandum has been received from Chief Architect Ewart: "In "order to avoid complaints and disputes between different contractors, it has been found "advisable to award the contract for post office (&c.) fittings to contractors having the "contract for the building, provided the price asked be reasonable."

A previous treatment of the same subject will be found at page Q—257 of the Auditor General's Report for 1897-8, in connection with Fittings for Portage-la-Prairie Post Office. Under date of June 28, 1898, Mr. McDougall wrote: "When ten-"ders are asked for a public building by public advertisement, the plans and specifica-"tions in the first place might include, I presume, all fittings; and when they do not "why might not new tenders be called for in the same way for the fittings, instead of "leaving it to the contractor and Chief Architect to make a price for the fittings, with-"out getting the benefit of public competition? The method of putting fittings by "themselves to public competition was adopted in the case of the Victoria Post Office."

The only answer received to the above-quoted letter was from the Assistant-Secretary, under date of July 7, 1898, as follows: "I am directed to state that these letters "will be laid before the Honourable the Minister, so that the question of principle "raised by you therein may be discussed; and the decision of the Minister will be duly "communicated to you."

The argument for advertising the Fittings along with the main contract is now strengthened by the Chief Architect's statement, that it has been found advisable to have them under the same contractor, to avoid disputes.

Please have this question taken up again at an early date, and see whether it is not feasible to obtain competition on the Fittings, by including them in the advertised contract for the Main Building.

If I remember rightly, an explanation was made some years ago, that it was impossible to foresee the requirements of the departments who were to occupy the buildings. This objection should now have removed itself, after experience in so many places.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

Edmonton Jail: Chas. May.

AUDIT OFFICE, OTTAWA, Jan. 27th, 1905.

SIR,—Let me acknowledge receipt of your application No. 363 for $4,340 in favour of Chas. May, being Estimate No. 10 for Construction of Edmonton Jail.

There are two new items of extras, under the heading of 'Filling-in around jail,' as follows:—

Hauling earth, 938 c.y. at 75c.	703 50
Digging drain, 741 c.y. at 40c.	296 40

Please send me copies of the Engineer's written order, describing the work, and fixing the prices before the service was begun.

If this will cause any delay, the present application (returned herewith) might be broken up into $900 and $3,440, the latter of which will be passed at once.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

JUSTICE DEPT., OTTAWA, 21st Feb., 1905.

SIR,—I have the honour to acknowledge receipt of your letter of the 2nd instant, in which you submit for opinion a question arising in connection with contracts for the construction of public works.

You state that the Auditor General has lately refused to certify for the payment of any moneys for extra work unless he is supplied with the order in writing of the Chief Engineer given previously to the execution of the work which is called for by clause 5 of the form of contract in use in your Department; and the question upon which you require advice is, as I understand it, whether when extra work is recognized by its inclusion in the final estimate, the Auditor is justified in refusing payment unless the order in writing is produced.

In reply I beg to state that in my opinion under this form of contract the inclusion of any work in the final certificate as an extra dispenses with the necessity for an order in writing. By the terms of the contract the Chief Engineer's decision is final as to whether or not the work is an extra, and his certificate is conclusive (in the absence of fraud) even where the condition precedent has not been performed.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. E. L. NEWCOMBE, *D.M.J.*

PUBLIC WORKS DEPT., OTTAWA, April 4th 1905.

SIR,—The Chief Architect refers to me a final estimate in favour of Mr. Charles May, contractor for the construction of the Edmonton jail, portion of which you have declined to pay upon the general principle that (as in the case of extras, clause 5 of all our contracts required orders to be in writing), documentary evidence requires to be given to you, before you may be justified in issuing the cheque in full payment.

As I took the liberty of differing with your view of that matter, I concluded to take the opinion of the Department of Justice as to whether the final certificate of the responsible officer (in this case the Chief Architect) to all work executed, whether contract or additional work, was not sufficient to authorize payment in full of all the amount certified.

I duly received on the 21st February a reply from the Department of Justice of which I inclose a copy, and I would like to know from you whether, in the future,

the opinion of the law officers of the Crown will be taken as our guide in the certificates to be affixed to final estimates for works performed under the direction of this Department.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, April 27, 1905.

SIR,—I have received a communication from the Department of Public Works, dated April 4, enclosing an opinion from the Deputy Minister of Justice in the case of Chas. May, contractor for Edmonton Jail.

I find much difficulty in accepting Mr. Newcombe's conclusion, that the Chief Engineer or Architect can dispense with an explicit provision of the contract, by including in a Progress Estimate an item which that provision would shut out. The same process, applied to each section of the contract, would render the whole contract nugatory. The contractor would, I think, remonstrate against this interpretation of the Architect's power, for any sections which favoured the Contractor himself.

Apparently, Mr. Newcombe has not had his attention directed to section 29 of the Contract, whereby the Progress Estimates are to be made up "at the prices agreed upon "or determined under the provisions of the Contract." Orders-in-writing being demanded by section 5, section 29 shuts out other work from the estimates, and the Chief Architect had no right to include it.

Please let me have your opinion as to the necessity for Written Orders, under the Contract-Form which is attached to this correspondence.

A similar difficulty has occurred several times with the Department of Railways and Canals; and I have accepted in each case a special Order in Council recognizing the irregularity, and stating that it was not to form a precedent.

I am, sir, your obedient servant,

Hon. A. B. Aylesworth, K.C., Toronto. J. L. McDOUGALL, *A.G.*

TORONTO, 20th May, 1905.

Re Edmonton Jail Contract.

DEAR SIR,—I have yours of 17th inst. reminding me of this matter, and must apologize for my delay in writing you in regard to it.

I have, however, during the last three weeks been in Ottawa more than in Toronto, and it has been impossible for me to give this matter consideration till now.

A contract for construction of a Gaol at Edmonton in the Northwest Territories was entered into by the Department of Public Works with Mr. Charles May, on 25th June, 1903. The price for construction and completion was fixed at $50,150.

The contract contains a provision that the architect at any time may order extra work to be done, but the contractor shall not be entitled to any payment for any extra work unless such extra work shall have been first directed in writing by the architect, and the price to be paid therefor previously fixed by the architect in writing and approved of by the Minister.

The decision of the architect as to whether any change in or deviation from the works described in the contract increases the cost, and as to the amount to be paid in respect thereof, shall be final.

Section 8 of the contract further provides that the architect shall be the sole judge of work in respect of both quantity and quality, and his decision on all questions in

dispute in regard to work, or as to the meaning of the contract, shall be final, and no extra work shall be deemed to have been executed, nor shall the contractor be entitled to payment for the same unless the same shall have been executed to the satisfaction of the architect, evidenced by his certificate in writing.

Section 38 of the contract further provides that all matters of difference arising out of the contract shall be referred to the award of the Chief Architect for the time being having control over the works, and the award of such architect shall be final and conclusive.

Under these provisions of the contract the architect is the sole and supreme judge of the quantity of work done, and of the meaning of the contract, as of all matters of difference arising out of the contract. Any decision of the architect under these provisions of the contract is quite as binding upon the Crown as upon the contractor, and if he chooses to decide that extra work shall be paid for, even though it may not have been done under a previous direction in writing, there is, in my opinion, no power to go behind such decision of the architect, or avoid payment for the work he may so certify as having been done.

Under a contract of the character here in question it is generally the contractor who complains as being made to feel that he has put himself literally under the thumb of the architect, but decisions and certificates of the architect are quite as binding upon the one party as upon the other, and if the architect gives to the contractor any final certificate pursuant to the provisions of the contract, such final certificate is, in my opinion, decisive in the contractor's favour, even though it may in fact include extras for which no orders have previously been given in writing. In such a case, and with a contract such as this, I think any court would say it would not enquire whether the architect had allowed extras properly or improperly, though of course if it were shown that his conduct was fraudulent his determination would be void.

But progress certificates are by no means of the same character as the final certificate of the architect. Progress certificates are given for the benefit of the contractor, to enable him to obtain payments on account during the progress of the work, and such certificates are not conclusive as against either party in respect to quantities or similar matters which may be contained in them.

In the present case, I presume no final certificate has yet been given by the architect, but if one is ultimately given by him, and any items of extra work are included in it, I am quite confident no court would inquire behind the certificate. The final certificate would be considered by any judge as the clearest possible proof that any extra work included in it had been previously ordered by the architect in accordance with the terms of the contract, and no court would inquire into that question once a final certificate was given. To do so would make the court the judge in the matter, and that would be contrary to the contract of the parties. The contract is that the architect shall be the sole and final judge on this point, and it seems to me it would be changing that contract altogether if any judge, or any minister, or any official, of the Crown, or of the contractor, could review in any way the decision the architect had given.

Of course, I have not before me the whole fyle of papers in connection with the matter, but I may point out that even if the question was one to be inquired into by any one else than the architect himself, there is no evidence among these papers that the extra work in question was not ordered in writing by the architect before it was done. I notice the Progress Estimate No. 10 which you sent me speaks of this work as ordered by 'telegram,' and the date, 24th October, 1904, is given. Is it not to be assumed when the architect certifies these extras for payment that he does so because he is aware of his own knowledge that they were ordered by him?

I may point out that there is possibly another view of the matter open on the facts of the present case. The work contemplated by this contract appears to be simply the construction and completion of the gaol building. The items of work in question as

extras are for filling in around the gaol, hauling earth and digging a drain. I think it might be at least open to argument that such works were not extras at all, but constituted work outside of and independent altogether of this contract. If this view is the correct one the contractor who did the work would not need any antecedent order in writing to entitle him to pay, as his work would be outside this contract altogether, and be something which, like any other piece of work one man did for another, the man who did it could recover his pay for by suit, if he could not get it otherwise.

Yours truly,

The Auditor General. A. B. AYLESWORTH.

AUDIT OFFICE, OTTAWA, May 23, 1905.

SIR,—In further discussion of the claim of Chas. May for Extras at Edmonton Jail—such extras not having been ordered in writing:

I am corresponding with Mr. Aylesworth on this subject, but our exchange of views may not be terminated. His letter of May 20 provides, however, a temporary solution which will release the contractor from his present difficulty.

Mr. Aylesworth says: "Progress certificates are by no means of the same char-"acter as the final certificate of the Architect. Progress certificates are given for the "benefit of the contractor, to enable him to obtain payments on account during the "progress of the work; and such certificates are not conclusive as against either party "in respect to quantities or similar matters which may be contained in them."

In view of this opinion, the progress-estimate now in hand will be passed on account; and the objection to the disputed items may be raised when the Final Estimate is presented.

As the subject now under attention is one of great general interest, the discussion will be continued independently of the item which evoked it.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

Medicine Hat Post Office: J. F. Fisher.

AUDIT OFFICE, OTTAWA, August 9, 1905.

SIR,—Let me acknowledge receipt of your Application No. 43 for $5,000.00 in favour of James F. Fisher, being purchase-price of 75 x 130 ft. site for Medicine Hat Public Building.

The Appraiser, Mr. L. Fennings Taylor of your Department, makes the following certificate: 'So far as I could learn by comparison with the prices of other pro-"perties in that town, I think the amount asked, $5,000.00 is a reasonable figure."

This certificate is not quite positive enough to suit Sec. 33 of the Audit Act. Please obtain from Mr. Taylor, and forward to this office, the information from which he draws his conclusion.

Also we shall need the records of recent sales in the vicinity, as supplied in the cases of Hamilton and Toronto purchases.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, September 2nd, 1905.

The Chief Architect, D.P.W.

SIR,—In reply to the letter of the Auditor General of August 9th, in which he says my certificate *re* the price for the purchase of the Fisher site for the proposed Post Office, &c., Medicine Hat, N.W.T., 'is not quite positive enough to suit Section 33 of the Audit Act.'

I beg to quote the following information from a source which I consider to be absolutely reliable:—

"Prices for lots in that neighbourhood show a strong advancing tendency. The "corner lot immediately opposite, 25′ x 130′, was lately sold for $2,600 cash; a lot same "size, south, inside lot, recently changed hands for $2,000. The proposed P.O. site is "75′ x 130′ and the price asked is I believe $5,000. I would consider this a very fair "price for the property. The Commerce paid that figure for their lot, and Real Estate "men consider the P.O. site equally as good proprety if not better."

I therefore beg to state the price $5,000 for the Fisher property 75′ x 130′ is fair and just.

Hoping that this will meet with the requirements of the Audit Act.

I am, sir, your obedient servant,

L. FENNINGS TAYLOR.

Glace Bay: Dominion Coal Co.

AUDIT OFFICE, OTTAWA, Feb. 20, 1905.

SIR,—I beg to acknowledge receipt of your letter of Feb. 6, concerning the arrangement to pay $25,000.00 to the Dominion Coal Company, for works at Glace Bay, N.S.

It does not appear, from any of the documents previously in this office, that $25,000.00 is necessarily only a part of the value of the whole works to be done. The specification contains very few of the dimensions, and refers to the plans for fuller information; and as the plans have not been supplied to this Office, we can form no idea of the magnitude of the construction.

The Engineer might perhaps be asked to calculate the approximate value of each separate feature of the Company's enterprise, as outlined in the Order-in-Council; and if the total of $25,000.00 is reached by those items which would be usually included by the customary wording of the Parliamentary Votes for Harbours, the objection raised under this heading in my previous letter will not be maintained.

Another difficulty, however, has occurred to me in Section Four of the Order-in-Council and Contract, namely: "The public shall be allowed the use of the harbour, "works and wharves, and of the harbour itself at Glace Bay, upon the payment of tolls "to the Coal Company in accordance with the schedule now existing and approved by "the Council of the Town of Glace Bay, which is attached hereto."

Under all previous Votes for Wharves, as far as my memory serves me, whatever revenue accrues is for the benefit of the Dominion Treasury. The Vote for Glace Bay is the first, I think, where the wharf-revenue goes to a private corporation.

If the $25,000.00 is, as you claim, only a partial aid or subsidy to a much greater undertaking, all these difficulties could be removed (from our point of view) by having the item re-voted in the Supplementary Estimates, with a full description of its variance from the ordinary Harbour Vote.

At present, under the Public Works Act, the money can only be spent after public tender, or (if more expedient) for direct payment of materials and days' labour.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, 6th March, 1905.

DEAR SIR,—I have received in due time your letter of the 28th February, in reference to a payment to the Dominion Coal Company, on account of work at Glace Bay, N.S., and I am directing the Chief Enginoer to obtain the information referred to in the third paragraph of that letter.

As regards the purpose of the vote for this work, I would like to draw your attention to the discussion which took place in the House of Commons, on the 24th February, between Mr. Perley, M.P., for Argenteuil, and the Minister of Public Works, as reported on pages 1818 and 1819 of unrevised *Hansard*. The Minister in a few words laid the position clearly before the Committee of the House, and I fancy that when the whole item for Nova Scotia shall have been approved by the Committee, Parliament will have been fully apprised of the purposes for which the vote in question was given.

Believe me, dear sir, yours very truly,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, July 18th, 1905.

SIR,—Let me call your attention to my letter of Feb. 20, 1905, concerning the Dominion Coal Co's Estimate of $25,000 for works at Glace Bay, and your reply thereto dated March 6.

I should like to be informed of any subsequent progress which you may have been able to make in this matter. This is important, I being about to leave this office at an early date.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, 19th July, 1905.

SIR,—With reference to the payments concerning the work done by the Dominion Coal Company at Glace Bay, I beg to refer you to the statements made by Hon. Mr. Hyman and Hon. Mr. Fielding during the discussion which took place in the House of Commons on the 14th instant in connection with this work, and which is reported on pages 9900 and 9901 of unrevised *Hansard*.

I may add that in compliance with a request made by Mr. Blain, M.P. for Peel, the Minister laid on the table the agreement passed between the department and the company for the performance of the work.

I should think that the explanation given by the Minister, and the placing on the table of the Houseof the agreement, should remove all objections that may have been in your mind when you originally discussed the payments to the company under the application of this department.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, July 21, 1905.

SIR,—Let me acknowledge receipt of your letter of July 19, concerning the Dominion Coal Company's claim for work at Glace Bay.

Two objections were raised in my letter of Feb. 20, 1905, namely:—

First: "That the specification contained items (such as railway-construction) "which are not generally part of a harbour-improvement as built by the Government "out of funds voted by Parliament;"

Second: "That tolls from a public work always accrue to the Dominion Exche- "quer, and not a private corporation."

With regard to the second objection, I asked that the new Revote mention this variance from the ordinary Harbour Vote, that the Glace Bay revenue is to go to the Dominion Coal Company; and I still do not see why this could not have been done. However, I shall accept the Minister's explanation to the same effect, recorded on pages 9900 and 9901 of unrevised *Hansard*.

As to the first objection, about the railway-construction: Since that was described neither in the Supply Bill nor in the discussion thereon, we must now revert to the alternative mentioned in the third paragraph of my letter of Feb. 20, viz.: "The En- "gineer might be asked to calculate the approximate value of each separate feature of "the company's enterprise, as outlined in the Order-in-Council; and if the total of "$25,000.00 is reached by those items which would be usually included by the custom- "ary wording of the Parliamentary Votes for Harbours, the objection raised under this "heading in my previous letter will not be maintained."

Please have this calculation prepared at once so that it may reach here during my tenure of office.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, 26th July, 1905.

SIR,—I beg to acknowledge the receipt of your letter of the 21st July, concerning the Dominion Coal Company's contract with this Department for work at Glace Bay.

In the latter part of your letter you state that, in connection with the railway construction, the matter was described neither in the Supply Bill nor in the discussion thereon, and you therefore ask for certain calculations as to the work done by the company.

I desire to call your attention to the fact that the statement you make is not entirely in accordance with what took place, although I am ready to admit the statement is made by you in perfect good faith. In my letter to you I informed you that the Minister had laid on the table of Parliament the agreement made with the company as well as the plans, and that he called the special attention of the House to the fact that he was making the deposit in question. A record of the same will be found in the Votes & Proceedings of the date at which the deposit of the contract and plans was made. In the pages of *Hansard*, to which I referred in my letter of the 19th, the Minister gave a full explanation of what was intended to be done at Glace Bay.

Under the circumstances, it seems to me that nothing further is required in the matter but to pay the amount of the estimate rendered.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

AUDIT OFFICE, OTTAWA, July 28, 1905.

SIR,—Let me acknowledge receipt of your communication of July 26, with reference to the Dominion Coal Company's Estimate for work at Glace Bay.

The Estimate No. One, now in hand, is for $11,430.00 on account of a Vote for $25,000.00.

The $25,000.00 can only be paid, I think, when the work is completed, or when completion is within reach.

When the whole construction (as specified) is so far advanced, that $25,000 will more than finish it, we can then begin to make payment; always holding back enough to complete the work if the company should fail.

Please have a new Estimate prepared in this sense.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

Laprairie Ice Pier: Amiot & Lemay.

AUDIT OFFICE, OTTAWA, August 30th, 1905.

SIR,—Let me acknowledge receipt of your Application No. 130 for $8,619.68 in favour of Amiot & Lemay, being their Second Estimate for Extra Concrete work at Laprairie Ice Pier.

The Final Estimate on the original contract was dated Sept. 10, 1904, and paid on the 6th of October of the same year.

Please inform me as to the manner in which competition was invited for the new work.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, Sept. 15th, 1905.

SIR,—In further discussion of the Progress Estimate of Messrs. Amiot & Lemay, for concrete work at Laprairie Ice Pier:—

My letter of August 30th asked for information as to the manner in which competition was invited for the new work. I also pointed out that the original contract had been closed by a Final Estimate dated Sept. 10, 1904.

You have to-day favoured me with a perusal of the Departmental report to Council, asking for authority to pay Amiot & Lemay for the new work (although let without tender), on the ground that it is an addition to their original contract.

It would not be wise, I think, to make a precedent of this nature, which would reopen all contracts, no matter how long closed. The Final Estimate should mark the termination of all works awarded under the original call for competition.

In accordance with the general principles of this office, we are anxious to avoid causing inconvenience to the public creditors, when they have been unwittingly placed in a false position by ignorance of the regulations. We are more anxious to have the regulations recognized, and followed in the future.

If an Order-in-Council is to be obtained in support of the departmental action in the present instance, please see that it contains an admission that the terms of the Public Works Act have not been rigidly observed, inasmuch as the work was given out without public advertisement; and that the Order also contains an explicit recommendation that this provision of the Act be adhered to in all subsequent dealings.

If this is done, the payment will be released without further delay.

The Report to Council in favour of Amiot & Lemay quotes the fact that "They "have on the site all the necessary appliances in the way of stone-crushers and con-"crete-mixers, and they are in a better position than others to carry on the work ex-"peditiously and to the satisfaction of the Department." This fact, it appears to me, is an argument rather for than against the calling for new tenders. If Amiot & Lemay,

before the work was begun, were in a position to build the concrete wall for $44.23 per lineal foot—out of which they had to provide the necessary plant: they would probably have been able to ask a lower price for the Extension, having all the necessary plant already on hand.

I am, sir, your obedient servant,

The Secretary, Public Works. J. FRASER, *A.G.*

Order-in-Council, Sept. 30, 1905.—On a Memorandum dated 19th September, 1905, from the Minister of Public Works, submitting that Parliament at its session of 1903, granted the sum of $10,000 and the following year $22,400 towards the construction of protection works in the St. Lawrence river at Laprairie, Quebec, consisting of a concrete wall and two ice-piers, these works having been rendered necessary for the protection of the village of Laprairie against the inroads of the ice fields which, every year, caused considerable damage to property.

That tenders were duly invited for the construction of the concrete wall, and the contract for the same was awarded to the lowest tenderers, Messrs. Amiot & Lemay, for the sum of $29,650, or at the rate of $44.23 per lineal foot, the wall being completed last Autumn for a length of 742 feet.

The Minister states that Parliament at its last session voted the sum of $20,000 for the purpose of continuing the construction of these protection works, and as they had given on many instances clear evidence of their thorough effectiveness, it was recommended by the Chief Engineer of the Department of Public Works to substitute the building of another section, 452 feet in length, of this wall, in lieu of the ice-breakers above referred to.

The Minister further states that this new section of the wall being urgently required for the protection of the village, it was deemed advisable under the provisions of section 13 of the Public Works Act, to dispense with the calling of tenders; and as the contractors, Messrs. Amiot & Lemay, having on hand their plant, materials, etc., were thus in a better position to do the work at conditions more favourable than other people, it was reported advisable by the Chief Engineer of the Department of Public Works and in the public interest, to give them this new work at the prices of their former contract, given after public advertisements and under authority of an Order in Council, said prices being $44.23 per lineal foot, and reported upon as being reasonable by the Chief Engineer of the Department of Public Works. In view of the above, the ordinary conditions regulating the calling of tenders, advertisements, etc., were not rigidly observed.

The Minister, concurring in the opinion of the Chief Engineer of the Department of Public Works expressed above and considering it to be in the public interest, recommends that the work of construction of a further section of 452 feet of concrete wall at Laprairie, Quebec, be entrusted to Messrs. Amiot & Lemay, at $44.23 per lineal foot.

The Committee submit the same for approval.

JOHN J. McGEE, *C.P.C.*

Sorel Wharf: McAuliffe, Poupore, Malone & Weddell.

AUDIT OFFICE, OTTAWA, 13th Jan., 1906.

SIR,—Let me acknowledge receipt of your Application No. 552 for $25,000 in favour of McAuliffe, Poupore, Malone & Weddell, for Extra Dredging at Sorel Deep Water Wharf.

The calculation is as follows:

Slopes of 4 to 1, instead of 2 to 1: 27,652 c.y. at 25c.	$ 6,913 00	
Extra depths of 9 in.: 47,400 c.y. at 25c. . . .	11,850 00	
Silting: 63,166 c.y. at 25c.	15,791 50	
Held at present.		$ 9,554 50
Application.		25,000 00
	$34,554 50	$34,554 50

Order-in-Council necessary.

For additional allowances of this magnitude, outside of the strict provisions of the Contract, it would be preferable (I think) to obtain the authority of the Governor-in-Council. Please have this arranged.

Calculations and Diagrams would be of use.

I would like to be supplied with detailed calculations of the quantities involved, and diagrams in elucidation of them. As these are of course on file in your Department already, the delay will be only that necessary for copying.

Silting might perhaps have been anticipated.

Against the payments for extra slopes and depths, I am not at present prepared to make any objection. But unless the contract-time was greatly extended, to suit the Government and not the Contractor, the silting might have been foreseen by all the tenderers; and it would not now be a matter for additional compensation.

* * * * * * *

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

Trois Pistoles: Construction of Breakwater.

AUDIT OFFICE, OTTAWA, March 16, 1905.

SIR,—Let me call your attention to the expenditure in 1904-5 of $3,742.32 for 'Trois Pistoles: Construction of Breakwater.'

Charged to two different Appropriations.

This sum has been charged to two different Parliamentary Votes, as follows:

Trois Pistoles: Vote of $3,000, for Breakwater:

June: Spruce timber.	$ 742 50	
July: Wages and accounts.	1,043 65	
Aug.: Wages and accounts.	1,405 93	
		$ 3,192 08
Harbours & Rivers: Quebec Generally:		
Sept.: Wages and accounts.		550 24
		$3,742 32

As frequently explained before, in previous correspondence, a Vote for a special work should be treated as a limit of the expenditure on that work. The general Votes should not be used to supplement a special Vote when the latter runs short. If they are so used, the limit is rendered nugatory.

In the present instance, the Trois Pistoles Breakwater passed Parliament at $3,000; a higher estimate might not have passed. When it was found that the Vote of $3,000 was exhausted, and if the work was too emergent to be arrested, a Governor-General's warrant might have been obtained, on account of the emergency.

Transfer $550.24 to 'Trois Pistoles Breakwater.'

But since the expenditure is now made, the lack of funds must not prevent a correct classification; otherwise an over-expenditure might be concealed as long as the general Votes lasted.

Please apply for a transfer of $550.24, crediting 'Harbours & Rivers, Quebec Generally' and charging 'Trois Pistoles Breakwater.' The excess of the expenditure over the Vote, or $742.32, should be included in the Supplementary Estimates for 1904-5.

Vouchers written and certified by Sub-foreman.

I notice that, with the exception of an account for $742.50 in the name of Jos. Garant, all the vouchers are made out in one handwriting, apparently that of Mr. Auguste Lavoie, the sub-conductor. Moreover, since the conductor, Mr. Eloi Lavoie, is unable to write (as shown by his cross to receipt the pay-list), his name is written by the same hand, that of Mr. Auguste Lavoie, under the certificates of 'Materials received.'

As frequently explained before in previous correspondence, there should always be original bills, made out in the handwriting of the creditors themselves, or their own agents, and not by any Government officer. Please obtain the original bills in this case.

Certificates from Illiterate Officers.

With an unlettered foreman or conductor, there has been no hard-and-fast rule laid down yet, as to who shall certify the accounts. If Mr. Auguste Lavoie is a man of standing, his signature would be of value in either of the two forms: 'Aug. Lavoie, Sub-conductor,' or 'Aug. Lavoie, for Eloi Lavoie'; The third form, however, 'Eloi Lavoie,' as found on the vouchers now in hand, should not have been signed by any one but the Conductor himself.

Other unlettered foremen have certified with a cross. When this happens, the witness should be a person in whom the Department has confidence, and he should certify that he has read out the details of the account to the Foreman.

The subject of certificates by persons of insufficient educational qualifications may be taken up in a separate letter. For the case now under consideration, the vouchers might be corrected in one of the two ways mentioned above: if Engineer Tremblay has confidence in Mr. Aug. Lavoie's ability.

Spruce Timber from St. Romauld: $742.50.

The only voucher not written out by Auguste Lavoie is No. 47038 in favour of Joseph Garant of St. Romuald, for the following service: '1904, June 30: 4,500 pds. d'épinette de 12 pcs. carrés à 16½c.: $742.50.'

This account is written out in the hand of Resident Engineer J. A. Tremblay; and the conductor's name 'Eloi Lavoie' is also in Mr. Tremblay's writing, under the

certificate 'Ouvrage executé; materiaux livrés; mésurés et reçus par ——.' The summary to which this voucher is attached is dated Aug. 6, 1904.

Mr. Eloi Lavoie would not be held responsible in any of these cases where other people sign his name. Please warn Engineer Tremblay of the irregularity, and obtain a valid certificate for this supply of spruce.

Another voucher dealing apparently with the same bill-of-timber will be found under Cheque 48505, in the name of Capt. Napoleon Simard, of St. Alphonse de Chicoutimi. The service is described in the voucher as, '1904, 31 août: transport de bois, de St. Romuald à Trois Pistoles, $141'; this is in the handwriting of Aug. Lavoie. A note in Engineer Tremblay's writing says: '4,700 pds. 11 et 12 pcs, carré à 3c.'

Why is the spruce billed at 4,500 ft. and carried at 4,700 ft.? Why is it billed as 12-inch and carried as 11 and 12-inch? Why was it certified as received at Trois Pistoles before August 6, if it was not brought from St. Romuald until August 31? It may be that these difficulties will all be cleared up by the production of the original bills, as made out by the creditors themselves.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, Mar. 25, 1905.

SIR,—I am directed to acknowledge the receipt of your letter of the 16th instant, calling attention to the expenditure in 1904-1905 of $3,742.32 for Trois Pistoles, construction of breakwater, and asking for information regarding the same.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secretary.*

AUDIT OFFICE, OTTAWA, June 16, 1905.

SIR,—Let me call your attention to my letter of March 16, asking for information concerning the expenditure for Trois Pistoles Breakwater.

Your 149153 of March 25 acknowledged the receipt of my letter; but I do not find that any further answer has yet been received.

Please ask the officer who prepares the reply, to include also an explanation of the delay in its preparation: both at an early date.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, 18th Jan., 1906.

SIR,—Let me call your attention to two letters written by Mr. McDougall under dates of March 16 and June 16, 1905, on the subject of 'Trois Pistoles: Construction of Breakwater.'

No answer has yet been received to the two letters in question.

Please have a reply prepared at an early date.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

Depot Harbour: Davis, Haney & Miller.

AUDIT OFFICE, OTTAWA, Nov. 8th, 1905.

SIR,—Let me call your attention to three cheques in favour of Davis, Haney & Miller, for Quarry Stone deposited at outer end of Depot Harbour Breakwater, at $2.50 a yard, as follows:—

71954: June 1 to 10, 1905: 1,800 c.y.	$4,500
71953: June 11 to 21, 1905: 1,780 c.y.	4,450
71952: June 21 to 28, 1905: 620 c.y.	1,550
	$10,500

Messrs. Davis, Haney & Miller were the contractors for the previous work at Depot Harbour, and they seem to have received the $10,500 order as an extra.

Please inform me whether it could not have been handled as a separate contract, and competition invited. If so, under Chap. 7 of 1905, a certificate will be needed, that this was a case of pressing emergency, in which delay would have been injurious to the public interest. The nature of the emergency should be described.

Why were these vouchers paid through your Letter-of-Credit, instead of by Application to this office?

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, Jan. 5, 1906.

SIR,—Referring to your letter of the 8th November last, calling attention to three cheques in favour of Davis, Haney & Miller for quarry stone deposited at the outer end of Depot Harbour breakwater, I beg to enclose herewith copy of a memorandum from the Chief Engineer containing the information desired by you.

As regards the last question in your letter, I beg to state that it is owing to a misunderstanding that these vouchers were paid through our letter of credit instead of by application to your office. Care will be taken in future to prevent a repetition of this irregularity.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secretary.*

CHIEF ENGINEER'S OFFICE, OTTAWA, 21st Nov., 1905.

SIR,—With reference to file No. 284,820, herewith inclosed, in which the Auditor General asks for information regarding certain payments made to Messrs. Davis, Haney & Miller for quarry stone deposited at the outer end of the breakwater at Depot Harbour, I have to inform you that the work was performed by the contractors at their contract price of $2.50 per cubic yard in the work, as no other parties either at Depot Harbour or in its vicinity had the plant required to perform the work. Moreover, I may say that this was certainly a case of pressing emergency in which delay would have been injurious to the public interests, as the outer end of the work had already settled about 1½ feet owing to undermining, and that the stone had to be deposited with the least possible delay in order to prevent farther and much greater damage to the work.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. EUGENE D. LAFLEUR, *Chf. Eng.*

Port Burwell: Hardwood Timber.

AUDIT OFFICE, OTTAWA, Oct. 23rd, 1905.

SIR,—Let me call your attention to two vouchers for Hardwood Timber for Port Burwell Harbour, purchased in 1904-5:

48609: W. Dennis, hardwood timber:

10 x 12-in.: 10 to 30 ft.: 8,340 ft. at $30	$250 20
6 x 10-in.: 1,990 ft. at $30	59 70
10 x 12-in.: 12 to 16 ft.: 2,840 ft. at $14	39 76

50813: J. A. Dease, hardwood timber:

10 x 12-in.: 10 to 30 ft.: 17,320 ft. at $16	277 12
8 x 12-in.: 10 to 20 ft.: 4,240 ft. at $16	67 84

There should be, on the vouchers, a description of the quality of the timber in each case, to explain the difference between the prices of $30 and $16, as the dimensions are the same. Please supply this information at an early date.

I am, sir, your obedient servant,

The Secretary, Public Works Dept. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, 18th Jan., 1906.

SIR,—Let me call your attention to my letter of Oct. 23, 1905, asking for an explanation of the different prices paid for Hardwood Timber at Port Burwell.

No answer has yet been received to the letter in question.

Please have this information supplied at an early date.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

Port Colborne Breakwater: M. J. Hogan.

AUDIT OFFICE, OTTAWA, Aug. 17, 1905.

SIR,—Let me acknowledge receipt of your Application No. 733 for $9,000 to pay Michael Joseph Hogan for placing 3,000 cubic yards of Large Stone along the south or exposed face of the Western Breakwater at Port Colborne, as follows:

June 15: 1,600 c.y. at $3	$ 4,800 00
June 30: 1,400 c.y. at $3	4,200 00

Please inform me of whatever steps were taken to secure public competition, before this contract was awarded.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, Oct. 9, 1905.

SIR,—Referring to your letter of the 17th August last in regard to our application No. 733 for $9,000 in favour of M. J. Hogan, for placing 3,000 cubic yards of large stone along the south or exposed face of the western breakwater at Port Colborne, I beg to state, in reply to your enquiry as to what steps were taken to secure public com-

petition, that the work in question was given as an extension to the contract of Hogan & Macdonnell for work at Port Colborne, which addition is permitted by the original contract itself.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secy.*

PUBLIC WORKS DEPT., OTTAWA, Nov. 4, 1905.

SIR,—Adverting to your letter of the 17th August last, referring to our application No. 733 for $9,000.00 to pay Mr. Michael Joseph Hogan for placing 3,000 cubic yards of large stone along the south or exposed face of the Western Breakwater at Port Colborne, and asking to be informed of whatever steps were taken to secure public competition before this contract was awarded, I have the honour to inform you that our Chief Engineer, to whom the matter was referred, reports as follows:—

'No steps were taken to secure public competition as it was absolutely necessary that the breakwater be immediately protected to prevent serious damage and that Mr. Hogan was the only contractor who had, on the site of the works, the plant required to ensure the prompt delivery of the large stone required. Moreover, the price of $3.00 per cubic yard was deemed most fair and reasonable, which opinion was proved by the facts that when public tenders were called for the delivery of an additional quantity of 12,000 cubic yards of the same class of stone, only one tender was received (and that from Mr. Hogan) for $3.25 per cubic yard. Under the circumstances, I think the Auditor General would be fully justified in no longer delaying payment.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secy.*

St. Andrew's Rapids: Kelly Bros. & Co.

Order-in-Council, Feb. 19, 1904:—On a report dated 17th Feb., 1904, from the Minister of Public Works, stating that on the 18th July, 1900, a contract was entered into for the sum of $469,000 for the construction of a dam and lock at the foot of the St. Andrew's Rapids, Red River, Man., the formation of Canal approaches to the lock, etc.

The Minister further states that owing to the peculiar circumstances which attended the prosecution of the work, as regards the possibility of obtaining proper material, the increase in the cost of labour, &c., the contractors have been unable to proceed with the same with any degree of celerity.

That in addition to the above an application has been made by the Can. Pac. Ry. for the construction, in connection with the said lock and dam, of a bridge to span the stream at that point, said construction being represented to be of great importance, and that in order to admit of the said additional work, changes will be required to be made in the plans and specifications, which will not permit of the original plans being carried out without some very material and important changes in the nature of the work, and consequently of the prices to be paid therefor.

The Minister also states that in a communication addressed to the Dept. of Public Works on the 13th Jany. last, the contractors themselves have represented that they could not possibly undertake the work proposed to be done at the St. Andrew's Rapids under the changed conditions unless they were given the additional prices specified in the schedule attached to the original contract for any further work to be performed, and that the Chief Engineer of the Dept. of Public Works could not recommend the

execution of the work at those schedule prices, the bulk to be performed being so large that at the said schedule prices it would entail a much larger expenditure than that officer could recommend for the acceptance of the Minister of Public Works.

The Minister considers it advisable, under the circumstances, not to proceed further with the construction of the work as at present designed, but to close the contract at the present stage by returning the security deposit to the contractors, paying for work done, and materials delivered and plant supplied, and preparing amended plans providing for the construction in connection with the work of a commodious double track railway-and-traffic bridge.

The Minister therefore recommends that authority be granted to him to take the necessary steps in order to arrive at a proper and final settlement with the present contractors, to pay them for the work done and plant and material on the ground at contract rates, to return to them the security they have deposited in connection with their contract, and to call for new tenders for the execution of the work upon plans so altered as to meet the additional features which it has been strongly represented they should contain in addition to the present design.

The Committee submit the same for approval.—J. J. McGee, *C.P.C.*

Order-in-Council, July 22, 1905.—On a memo. dated 23rd June, 1905, from the Minister of Public Works, submitting that on the 18th July, 1900, a contract was entered into with Messrs. Kelly Bros. & Co., for the masonry of the proposed lock and dam at St. Andrew's Rapids, in the Province of Manitoba, the consideration of said contract being the sum of $469,000.

The Minister states that upon the contract having proceeded to a certain extent, it was deemed advisable to take steps to bring the same to a close at the point which it had then reached, and on the 19th Feb., 1904, an Order-in-Council was passed authorizing the Minister to take the necessary action in order to arrive at a proper and final settlement with the present contractors; to pay them for the work done and plant and material on the ground at contract rates; to return to them the security they had deposited in connection with their contract.

The Minister, in order to arrive at the settlement authorized to be made with the contractors, under the Order-in-Council above referred to, directed the Deputy Minister of Public Works to inquire into the value of the work performed to date, and to report to him the said value as well as that of the materials supplied and the plant upon the site of the work; and that in order to give to the matter the best and most satisfactory consideration and to submit the most reliable report possible, the Deputy Minister, for the said examination, secured the services of the Chief Enginer of the Dept. of Public Works ,and Mr. G. P. Brophy, Superintending Engr. of the Ottawa River Works, who has already investigated with him other claims preferred against the Dept. of Public Works; and that the result of a long and searching examination has been a report handed in by the Deputy Minister of Public Works and those two other officers.

The Minister observes that in this report the total allowance made for the plant supplied by the contractors and now on the site of the works has been found to amount to the net sum of $33,907, while the amount claimed therefor was $62,772.99.

That as regards the materials delivered, upon a claim preferred by the contractors of $60,447, the allowance made amounts to the sum of $27,270.60.

That with regard to the execution of the work, while the contractors claimed for earth and rock excavation done to date the sum of $123,750, the amount awarded was $76,740.50. The total sum of the claim amounting to $246,969.99, while the amount awarded thereon is $137,911.17.

That if from the above sum of $137,911.17 be deducted the amount already paid by the Dept. of Public Works to the contractors up to date, namely, $75,800, the

balance of $62,111.17 is found due, which, by the three officers above named, is recommended to be offered to the contractors in full and final settlement of their claims.

The Minister in view of the above facts of the Order-in-Council of the 19th Feb., 1904, and also of the report of the officers of the Dept. of Public Works, 4th Feb., 1905, recommends that the sum of $62,111.17 be offered and, if accepted, paid to the contractors in full and final settlement of their claims for work done, materials delivered and plant supplied in connection with their contract, the said amount to be paid out of the balance remaining unexpended on the Vote of $80,000 granted by Parliament for expenditure during the current year 1904-5.

The Committee submit the same for approval.—J. J. McGee, *C.P.C.*

Audit Office, Ottawa, 24th Nov., 1905.

Sir,—On the 19th of August I received from your Department an Application (No. 738), for $62,111.17 in favour of Kelly Bros. & Co., for balance in connection with Contract and plant, 'as per Arbitrators' award of Feb. 4, 1905, and Orders-in-Council of Feb. 19, 1904, and Aug. 22, 1905.' It was proposed to charge the payment to the Vote of 1904-5, which has since lapsed.

Attached to the Application was a note from Accountant Kingston, as follows: 'I find that papers containing Kelly Bros.' original claim, and the details of the 'Award, have been carried away from Departmental files. I am writing for them, and 'hope to have them in a few days.'

The papers mentioned have never reached this office, and further progress was therefore impossible.

As there is no Vote for this Service in 1905-6, the Application is returned to you herewith, for completion by the time that new parliamentary funds are available.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

Public Works Dept., Ottawa, 9th December, 1905.

Sir,—With reference to your letter of 24th November, regarding application No. 738 of 1904-05 for payment of the amount awarded to Messrs. Kelly Bros. & Co., in connection with their work at St. Andrew's Rapids, I am directed to say that this Department recognizes the fact that it is now too late to pay this amount from the appropriation voted for last fiscal year, and that in preparing the estimates to be submitted to Parliament at its next session an item will be included sufficient to meet this claim.

In the meantime I am forwarding a certified copy of the original details of the claim of Messrs. Kelly Bros. which was required to complete the record of this case. I trust that the matter will now be taken up by your examiners, and any questions that may arise in connection with this case disposed of before next session, in order that payment may be made without delay as soon as the votes are made available.

The vouchers and application are herewith returned. The latter will be replaced by a fresh application bearing proper number and date when time for payment arrives.

I am, sir, your obedient servant,

The Auditor General. A. G. KINGSTON, *Acct.*

Dredging Plant: Purchase of Used Vessels.

AUDIT OFFICE, OTTAWA, February 24, 1905.

SIR,—Let me acknowledge receipt of your Application No. 415 for $1,500.00 in favour of Honoré Bonenfant, being purchase-price of Tug *Nora*.

I would like to be supplied with additional information as follows: (1) The probable price of a similar tug, newly constructed; (2) The approximate life of a new tug, at such work as the *Nora* is expected to perform; (3) The age of the *Nora* at the present time; and (4) The number of years she may yet be expected to work.

The same questions were asked and answered in the case of the dredge *Mudlark*, at pages C—386 to 388 of my Report for 1892-3. Please anticipate them in all future purchases of second-hand vessels.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, Apr. 18, 1905.

SIR,—Referring to your letter of the 24th February last, respecting our application No. 415, for $1,500.00 in favour of Honoré Bonenfant, being the purchase price of the tug *Nora*, I beg to state, in reply to your inquiry:

(1) $6,000 is the probable price of a similar tug newly constructed;

(2) Fifteen years is the approximate life of a new tug at such work as the *Nora* is expected to perform;

(3) The tug *Nora* was rebuilt in the year 1899;

(4) She may yet be expected to work 8 or 9 years.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secy.*

AUDIT OFFICE, OTTAWA, 19th Oct., 1905.

SIR,—Let me acknowledge receipt of your Application No. 272 for $3,750.00 in favour of Mr. R. Crawford, of Kingston, being purchase-price of Schooner *E. H. Rutherford*, to be charged to 'New Dredging Plant, Generally.'

The voucher is certified 'Goods received, price fair and just, E. B. Godwin'; and Supt. James Howden attached the following note, under date of April 12, 1905: 'The 'Schooner *Rutherford* was rebuilt at Port Dalhousie in 1888; her cost when new 'would be at least $20,000; with some slight repairs the vessel should be serviceable 'for at least eight years to come.'

It has been usual to associate the Dept. of Justice with the purchase of vessels, in order that the necessary legal transactions may be flawless. Please have this done in the present instance. The Application is returned herewith for that purpose.

In addition to the vessel's value when new, and the date of its re-building (1888), Mr. Howden might be asked to give the date of its original construction, and its value after re-building in 1888.

As this is apparently the first instance of a schooner being bought for the Dredging Fleet (outside of the St. Lawrence Ship Channel) we would like to be able to publish in the Report, in connection with the vessel's cost, the particular function which it is expected to perform.

I am, sir, your obedient servant,

The Secretary, Public Works. FREDERICK HAYTER, *for A.G.*

PUBLIC WORKS DEPT., OTTAWA, Dec. 7, 1905.

SIR,—Referring to your letter of the 19th October last, in regard to the purchase of the schooner *E. H. Rutherford*, I beg to state, in reply, that the date of the original construction of the vessel, as shown in the certificate of registry, is 1881. The value of the vessel after rebuilding was over $10,000. It is to be used as a coal barge.

I am, sir, your obedient servant,

FRED. GELINAS, *Secy.*

Telegraph, Ashcroft to Quesnel: James Trodden.

PUBLIC WORKS DEPT., OTTAWA, 19th July, 1905.

SIR,—In the course of last year an application, No. 613, was issued by this Department for $5,513.38 in favour of Mr. James Trodden, being for the balance due to him on a contract for the reconstruction of our telegraph line from Ashcroft to Quesnel, but in the absence of information which you sought to obtain from this Department, the appropriation to cover that payment lapsed in August of last year, and the payment could not be made.

The vote in question has been renewed in the supplementary estimates for the year just passed, and I have to request that authority be given for the issue of a cheque to cover the balance due Mr. Trodden.

Apparently the difficulty which lay in the way was the production, for your information, of the contract entered into for the execution of that work, and as the correspondence took place last year during my absence, the information could not be vouchsafed.

I may state for your information that prior to the amount being placed in the estimates, I was ordered by the Minister to inquire into the matter of that contract, which had been entered into by Mr. J. B. Charleson for the Department in pursuance of the authority given to him for the construction of the telegraph line in the Yukon.

On the 14th and 22nd of September, 1903, by direction of Hon. Mr. Sutherland, I heard in my office Mr. Trodden, the contractor, and Mr. J. B. Charleson, the officer in charge, and although no contract in writing could be produced before me, I however ascertained and received the acknowledgement of Mr. Charleson that upon communicating verbally with Mr. Trodden with reference to the reconstruction of the line from Ashcroft to Quesnel, which was to become part of the Yukon line, an agreement was arrived at whereby, in consideration of the sum of $14,000 which was then voted by Parliament for the reconstruction of that line, Mr. Trodden undertook to reconstruct the same under the direction of Mr. J. B. Charleson. It was before me acknowledged by Mr. Charleson that such a contract was made and carried out to completion, the amount paid on account on various occasions being that shown by the Accountant of this Department and voted by Parliament.

The acknowledgement in question in my presence left no doubt whatever in the mind of the Department that such a contract existed binding upon the Department, and the evidence also produced before me showed that the contract in question was fully and faithfully carried out and completed.

Under the circumstances, and although no written copy of the contract can be produced, there is no doubt whatever, in view of the acknowledged agreement between the two parties, that the liability of the Department fully exists for the payment of the balance due.

If you thought it necessary, I would be willing to give a declaration to the effect of my hearing the parties in question and to the statements made by them to me.

I would beg that you would kindly attend to this matter without delay, as the appropriation which is made for the past fiscal year will again lapse if the matter is not settled at once.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

Ashcroft-Barkerville Telegraph Line: Estimate One and Final.

Contractor, James Trodden: Final Estimate of work done and material delivered on Contract, from the beginning of the work to the 5th August, 1904:

Re-construction of line, Ashcroft to Quesnel, lump sum.	$14,000 00
Deduct amount already paid through Charleson & Hardy's letter of credit in 1900-01 and 1901-2, as per vouchers filed in August, 1902.	8,486 62
Balance due to James Trodden.	$5,513 38

J. B. CHARLESON, *Supt. P.W.Y.D.*

AUDIT OFFICE, OTTAWA, July 27, 1905.

SIR,—I beg leave to acknowledge receipt of your letter of the 19th instant, concerning $5,513.38 balance due James Trodden on a contract for the reconstruction of a telegraph line from Ashcroft to Quesnel.

In the absence of a written contract or other information, it will be necessary for Mr. Charleson to make a declaration that he entered into an agreement verbally with James Trodden for the reconstruction of a telegraph line from Ashcroft to Quesnel for the sum of $14,000, and that the price is fair and just, and work completed satisfactorily.

The giving of an oral contract for such a large sum, with no written specification, was almost incredibly careless. Please explain to Mr. Charleson that public business must be done in a different manner.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. L. McDOUGALL, *A.G.*

Dominion of Canada, Province of Ontario, County of Carleton:

I, the undersigned, John B. Charleson, an employee of the Department of Public Works of Canada at Ottawa do declare as follows, that is to say:

1:—That in the year 1899 I was entrusted by the Minister of Public Works of Canada with the superintendence of the construction of the line of telegraph extending from Ashcroft, in the province of British Columbia, to Dawson, in the Yukon Territory, said telegraph line being commonly known as the Yukon Telegraph Line;

2:—That, as a part of the said system of the Yukon Telegraph Line, was included the reconstruction of a line of telegraph then in existence and extending between Ashcroft and Quesnel;

3:—That in connection with the reconstruction of the said length of telegraph line between Ashcroft and Quesnel, the sum of $14,000 was voted by the Parliament of Canada and was placed at my disposal for said reconstruction;

4:—That in order to provide for said reconstruction I, during the month of September of the year 1901, made a verbal arrangement with Mr. James Trodden, then a resident of British Columbia, to undertake and complete the said reconstruction under my instructions, and that it was arranged mutually between said James Trodden and myself that for the said reconstruction to my satisfaction the said James Trodden was to receive the full sum and amount of $14,000;

5:—That in the course of the said reconstruction which was duly undertaken by him, I caused to be paid to said James Trodden the total sum or amount of $8,486.62, thereby leaving a balance due him of $5,513.38, which up to the present date has remained unpaid;

6:—That there was no written agreement between said James Trodden and myself, but that the verbal agreement has always been and is considered by me as having been duly made and as being binding in so far as the execution of the work was concerned and the payment therefor of the sum and amount of $14,000;

And I make this solemn declaration conscientiously believing it to be true and knowing that it is of the same force and effect as if made under oath, and by virtue of the Canada Evidence Act, 1893.

J. B. CHARLESON.

Declared before me at Ottawa, in the County of Carleton, Province of Ontario, this 14th day of the month of August, 1905.—HAROLD FISHER, *A Commissioner, etc.*

AUDIT OFFICE, OTTAWA, August 16, 1905.

SIR,—Let me acknowledge receipt of Mr. J. B. Charleson's declaration, dated August 14, 1905, to the effect that he, during the month of September, 1901, made a 'verbal arrangement' with Mr. James Trodden, to reconstruct the Ashcroft-Quesnel Telegraph Line under Mr. Charleson's instructions, for the lump sum of $14,000.

Since Mr. Trodden (as well as Mr. Charleson) must have been aware that Government contracts are not let on oral arrangements, with no written specifications, the former gentleman cannot now complain if the Audit Office declines to relax all of its rules and precedents, and pay out large sums of money on no documentary evidence or calculations.

It will be necessary for Mr. Trodden to produce his account-books and vouchers, or certified copies thereof; and to give a detailed statement of the work done by him.

Mr. Charleson should be asked to commit to writing whatever he now remembers of his instructions to Mr. Trodden, as to the requirements for rebuilding the telegraph line.

I understood from Mr. Jardine that he had a telegram from Mr. Charleson to Mr. Trodden, instructing him to proceed with the work; that he handed this telegram to the Hon. Minister of Public Works and that it was afterwards lost. I believe the Telegraph Company keeps the originals of all telegrams sent, and no doubt could furnish a certified copy. If this is so, a copy should be obtained.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

OTTAWA, Oct. 17th, 1905.

SIR,—Referring to a paragraph in a letter of the Auditor General to your department, *re* the Trodden work on the Ashcroft-Quesnel section of the Yukon telegraph lines. In that letter there appears a sentence that is not in accord with the facts of the

case. There was no intention on the part of 'Mr. Charleson' to give a contract for $14,000 to James Trodden in the first instance.

The facts of the case as I remember them and which are set forth in my declaration are these:—

In the year 1900 Trodden was instructed by me, in pursuance of instructions from the Minister of Public Works to me, to repole and transfer the old wire off the old poles to the new poles set up by Trodden. For that work $14,000 was voted. I gave Trodden $5,000 for repoling a section, but from a personal examination of the poles, it was decided by me to replace all of the old poles by new ones.

This would require 6,600 poles, or thirty-three to the mile of two hundred miles.

I therefore decided, as Trodden had his men on the ground, to allow him to proceed with the work. We further discovered that the old wire having been in use for twenty-five years, would have to be replaced by No. 8 galvanized.

This also was given to Trodden with the strict understanding that the whole work was not to exceed the $14,000 voted.

It will have to be borne in mind that my reason for changing from the old wire to the new wire was that that section of the line had to be or ought to be of the same quality of wire as the Dawson-Quesnel wire.

A paragraph in the Auditor's letter makes it appear in the first instance that there was a direct contract for $14,000, which the facts set forth by me would not bear out. As for calling for tenders for all amounts over $5,000, that would be applicable in the older parts of Canada, but in the Yukon section it would be impossible to advertise for tenders.

But in any case there is no evasion of the law referred to by the Auditor General.

Yours truly,

The Secretary, Public Works. J. B. CHARLESON.

PUBLIC WORKS DEPT., OTTAWA, Oct. 23, 1905.

SIR,—Referring to your letter of the 16th August, *re* construction of the Ashcroft-Barkerville telegraph line, I beg to enclose herewith copy of a statement which I have obtained from Mr. Charleson on the subject. As requested by you, I have endeavoured to procure from the telegraph company a copy of the telegram from Mr. Charleson to Mr. Trodden, instructing him to proceed with the work; but I am informed by the manager of the company that the business of the office is destroyed every six months, and it is therefore impossible to have a copy of the telegram in question.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, Secy.

AUDIT OFFICE, OTTAWA, Oct. 24, 1905.

SIR,—Let me acknowledge receipt of your letter No. 153209, enclosing a report from Mr. J. B. Charleson on the claim of James Trodden, for reconstruction of Telegraph line, Ashcroft to Quesnel.

The claim is calculated as follows:—

Reconstruction, Ashcroft to Quesnel: lump sum	$14,000 00
Less amounts already paid	8,486 62
Balance now claimed by James Trodden.	$ 5,513 38

In Mr. Gobeil's letter of July 19, 1905, wherein he strongly endorses this account, he understood Mr. Charleson as stating that "Upon communicating verbally with Mr. "Trodden with reference to the reconstruction of the line from Ashcroft to Quesnel,— "an agreement was arrived at whereby, in consideration of the sum of $14,000, which "was then voted by parliament for the reconstruction of that line, Mr. Trodden under- "took to reconstruct the same under the direction of Mr. J. B. Charleson." This acknowledgement by Mr. Charleson (Mr. Gobeil said) left no doubt whatever in the mind of the Department, that such a contract existed, binding upon the Department.

Mr. Charleson's report of Oct. 17, 1905, is however so clear as to leave now no uncertainty on the subject. He says: "This (200 miles) also was given to Trodden with "the strict understanding that the whole work was not to exceed the $14,000 voted.— "A paragraph in the Auditor's letter makes it appear in the first instance that there "was a direct contract for $14,000, which the facts set forth by me would not bear out."

If, as Mr. Charleson says, there was no contract for $14,000, the whole claim lapses.

I am, sir, your obedient servant,

The Secretary, Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, 15th November, 1905.

SIR,—The Minister has laid in my hands your letter to him of the 24th October in reference to the claim of Mr. James Trodden for the reconstruction of the Government telegraph line from Ashcroft to Quesnel.

In your letter you allude to mine of the 19th July in endorsation of that claim, and to a subsequent letter of the 17th October, in which Mr. Charleson gives the history of the case, which is somewhat at variance with my understanding of the same as expressed in my letter above referred to.

My information in reference to the whole of this matter was obtained when, by order of Hon. Mr. Sutherland, then Minister of Public Works, I made, at the request of Mr. (now Justice) Morrison, an investigation into that claim.

In the course of that investigation Mr. Charleson stated, in corroboration of Mr. Trodden's affirmation, that he had made a contract, a verbal one, with Mr. Trodden when at Ashcroft for the reconstruction of that telegraph line, that contract being for the sum of $14,000. Mr. Charleson then agreed that the sum stated by Mr. Trodden to have been received on account was correct, and it was easy enough to arrive at the balance due. Subsequently Mr. Charleson made a declaration to the same effect.

My knowledge of the case begins and ends with the information conveyed to me at the investigation; and if Mr. Charleson now chooses to vary the statements he made, I have only of course to accept, as he, being the principal acting for the Department at the time, must be the one who knows best what took place.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *D.M.P.W.*

PUBLIC WORKS DEPT., OTTAWA, Jan. 29, 1906.

SIR,—I beg leave to hand you herewith a Summarized Statement of the Telegraph Revenue for 1904-5 and in explanation of the entries in arrear that will be found in it, I have to submit that as regards the Escuminac Quarantine and North Shore W. B. Lines the delay in getting the returns after April was due to confusion at Quebec consequent upon a fire in the G. N. W. Telegraph premises which necessitated removal to new quarters and the inability under the circumstances of the District Superintendent, who looks after these lines for us in conjunction with the G.N.W. system, to present them early enough for inclusion in the statement.

As to the Kamloops, Nicola and Penticton Line a new appointment was made to the local superintendency in May following the opening up of the extension to Penticton and there has been some delay attending the compilation of the returns. The statements for June, with the Deposit Receipt No. 1435 of November 21, 1905, for $369.06 have since come to hand.

The Pelee Island cable was interrupted for some time and the local traffic was so trivial that the returns after May were allowed to stand over. The statements for June were received in August and covered by the Ottawa Deposit Receipt 7412 for $3.55.

Of the fifty odd offices on the North Shore St. Lawrence, East of Bersimis, with which we keep direct reckonings and bring to account the revenue by transfers to the credit of the Receiver-General of amounts deducted from payments in the way of guaranteed commissions, charges for line repair service, etc., there are only four appearing as outstanding after April or May, viz, English Point, Mingan, Musquaro and Watichou. I have not so far found it possible to follow up closely the circumstances occasioning the delays in getting in these returns and effecting settlements, but the percentage of those in arrear is very small and I fully expect to have them all in on time hereafter.

I am, sir, your obedient servant,

The Auditor General. A. H. KEELEY, *General Superintendent.*

AUDITOR GENERAL'S REPORT
1904-1905

	$ cts.
Kitchen, Willard, work under contract. (Tenders were invited by poster and newspaper advertisement. Mr. Kitchen was the only person who responded. His tender moneyed out to a sum which was higher than the engineer's estimate. For this reason the Minister decided not to award him the contract at his tender price; but the Minister offered the contract to him at the engineer's estimate, which, as stated, was less than the competition figure; and Mr. Kitchen accepted.) Railways and Canals Contracts: Extensions of Time.

AUDIT OFFICE, OTTAWA, February 12, 1904.

DEAR SIR,—My attention has been called recently to the many Orders in Council relieving public works contractors from the obligation of completing their contracts within the time limit.

From the wording of the Orders it seems that those representing the government in the transactions consider that, while the contractors are accommodated, the government is saved from any loss, because there is not developed by the postponement of the date of completion a means of exacting a heightened charge from the government by the contractor. This seems a manifestly inaccurate conclusion.

When it was determined by the government to have a particular work done, it was concluded that the direct advantage, or the indirect one, or both together, would be at least as great as all the outlay, and would, therefore, besides recouping the country for the salaries of engineers and other servants engaged, reimburse eventually the money paid to contractors, and in the meantime, the interest as it would periodically mature.

In the case of a wharf, a bridge, or a railway line, you may have entered into no obligation to provide at a particular time the accommodation to the neighbourhood which the work when completed will afford, but as trustees for the people you came to the conclusion that the completed work would provide to the public an advantage equal in value to the interest on the expenditure.

By the privilege given to the contractor the country has been deprived of the use of the work for the length of the postponement, while the interest is accumulating each day.

The magnitude of the donations from public funds to contractors will be understood, to some extent, by considering one of the large works—for instance the Hillsboro. bridge. It was to have been completed on April 8, 1902. The time was first extended to November 30, 1902, later to December 31, 1903, and now to December 31, 1904. The following is a statement of the interest in this case:—

M. J. Haney, Hillsboro. Bridge:

Estimates 1-10 (inclusive) to April 21, 1902, paid		$243,714 55
Interest on $243,714.55 from April 21, 1902, to December 31, 1904, at 3½ p.c.	$22,995 95	
Estimates 11-18 (inclusive) to November 30, 1902, paid		368,319 98
Interest on $368,319.98 from November 30, 1902, to December 31, 1904, at 3½ p.c.	26,877 26	
Estimates 19-28 (inclusive) to December 31, 1903, paid		313,010 79
Interest on $313,010.79 from December 31, 1903, to December 31, 1904, at 3½ p.c.	10,955 38	
Total payments		$925,045 32
Total interest as above	$60,828 59	

Respectfully yours,

J. L. McDOUGALL, *A.G.*

Hon. H. R. EMMERSON,
Minister Railways and Canals.

AUDIT OFFICE, OTTAWA, May 10, 1905.

SIR,—Let me call your attention to my letter of February 12, 1904, on the subject of extension of time to contractors, who have not finished their work at the date required by the specification.

A copy of that letter is inclosed herewith, in case the original may have been mislaid.

I endeavoured to show that, in every such instance, the Dominion is at a loss at least equal to the interest on the sum invested, during the period of completing the work, from the date fixed in the contract up to the date allowed by the Order in Council. The contractor, on the other hand, obtains all the advantage.

The subject comes up again, from the number of Orders-in-Council of the same effect now going through. For example, seven extension-orders were passed by Council on April 18 for works on the Intercolonial Railway: Thos. A. Barnhill, buildings at Canaan, Debert, Mulgrave and McKay's ; Faulkner & Falconer, station and shed at Granton; W. Marchand, freight shed at St. André; and Oxford Furniture Company, freight shed extension at Oxford.

Please let me know at an early date your views on this subject, and whether you think it possible to reduce the number of such time-extensions in the future; and whether the contractors should not be asked to pay for these privileges when granted to them.

I am, sir, your obedient servant,

J. L. McDOUGALL, *A.G.*

Hon. H. R. EMMERSON,
Minister of Railways.

RAILWAYS AND CANALS DEPT., OTTAWA, May 12, 1905.

SIR,—I have the honour, by direction, to acknowledge the receipt of your letter of the 10th instant, addressed to the Minister, calling attention to your previous letter of February 12, 1904, a copy of which you inclose, in respect of the grant of extensions of time to contractors for the completion of their work.

You state it to be your impression that those representing the government in these transactions 'consider that, while the contractors are accommodated, the government is saved from any loss, because there is not developed by the postponement of the date of completion a means of exacting a heightened charge from the government by the contractors.' You observe that this seems to be a manifestly inaccurate conclusion. The department, I am to say, would quite agree with your observation. It is not, however, aware that the consideration you mention had actuated it.

You observe further, as follows:—'When it was determined by the government to have a particular work done, it was concluded that the direct advantage or the indirect one, or both together would be at least as great as all the outlay, and would therefore, besides recouping the country for the salaries of engineers and other servants engaged, reimburse eventually the money paid to contractors, and, in the meantime, the interest as it would periodically mature.' The department, I am to say, has not been made acquainted with the view of the government recited by you.

You further observe that 'as trustees for the people you (presumably, the government) came to the conclusion that the completed work would provide to the public an advantage equal in value to the interest on the expenditure,' and you go on to say 'that by the privilege of extension given to a contractor, the country has been deprived of the use of the work for the length of the postponement, while the interest is accumulating each day.' The department is not, I am to say, aware that the governing reason for ordering any particular work is that stated by you, nor is it able fully to follow your further line of argument.

In reply to your two letters, I am directed to observe as follows:—As in the letting of contracts, so in the extension of the time for their completion, the discretion of the government appears to be an ample check, and its authority sufficient.

The circumstances of each case of course vary, and are duly considered by those in immediate control of the work, and finally by the Minister himself. Delays in the provision by parliament of the necessary funds, conditions of weather, labour complications, and difficulties in the way of supply of materials are all elements to be regarded carefully in judging as to the expediency of granting or refusing further time; while the general character of a contractor, his ability and his conscientious efforts to perform his work, or otherwise, constitute important features to govern the Minister's decision. In the cases directly cited by you these various causes of hindrance have been operative, and have led to his recommendations to Council upon which the orders you refer to have been based.

I need scarcely draw your attention to the fact that the Minister's review of the circumstances, and his estimate of the qualities of a contractor have, in some cases, resulted in his refusal to allow further extension of time, and that the work has, accordingly, been taken out of the contractor's hands and completed at his cost, including the expenditure of his deposit security, under the stringent clauses of his contract, which clauses are not, you will allow me to point out, made ineffective by the concession of a longer period for the performance of the work under the Orders in Council you mention; the public interests being duly protected in such contingencies.

With regard to your specific request to be informed whether the department considers it possible to reduce the number of such time-extensions in the future, and whether the contractors should not pay for these privileges when granted, I am directed to say that until the conditions causing delay such as those above mentioned can be more closely and accurately predicated than at present, the department can give no estimate of the number of extensions it may be advisable to grant; and in answer to your second question, that the concession is an act of grace, by way of recognition of a contractor's difficulties, made in the interests of the public, and that to penalize him in the matter would be neither fair to him, nor in the public interests; either he deserves the extension of time or he does not. If the latter, his contract carries its own sufficient penalty.

I am, sir, your obedient servant,

The Auditor General, Ottawa. L. K. JONES, *Secretary.*

Cornwall Canal: Electrical Power.

AUDIT OFFICE, OTTAWA, January 6, 1905.

SIR,—The press of work incident to preparing our Annual Report for Parliament at an earlier date than usual, has delayed the taking up of your application for $2,981.74 in favour of the St. Lawrence Power Company, to pay them for 180 h.p. of electric energy instead of 125 h.p. between October 23, 1903, and September 1, 1904, at $63 per h.p. per year.

Whatever payment is ultimately made for the period between October 23, 1903, and April 30, 1904, can of course be paid only to Mr. M. P. Davis, in whose name the original accounts for 125 h.p. were rendered.

The 180 h.p. is the 4th term in the proportion—

165 : 238 :: 125 : 180 :

165 being the h.p. in motors up to July 1, 1903; 238 h.p. in motors up to September 1, 1904, as given by yourself in a list dated September 26, 1904; 125 the line-load on July 1, 1903; and 180 the line-load as calculated for September 1, 1904.

The figure of 238 h.p. in motors includes 176 h.p. for 11 lift-locks, being 4 h.p. for each gate.

By the attached report from Mr. Hayter of this office, who visited the canal on June 22, 1904, you will see that the 4 motors on Old Lock 15 had been taken off in the fall of 1903, and were still stored in sheds at the time of his visit. (See page W—321 of 1903-4.)

Also, on account of the unwatering of the Basin between Old Locks 16 and 17, no navigation was possible through Old Locks 15, 16 and 17.

Moreover, one of the motors of Old Lock 19 had been detached, and placed on new Lock 19, in substitution for a disabled motor.

No information is on record in this office, as to the dates when the continuity of the electrical mechanism (and therefore the possibility of electrical operation) was suspended or restored in any of these cases. Please have these dates ascertained.

Mr. Stewart's certificates should have said that these motors were disconnected, and that consequently no electric current could pass through them.

Your application for $2,981.74 is returned herewith, for whatever alteration you may think necessary, in view of the information now given.

I would like to be supplied with summaries of whatever statistics are on record in your department, showing the actual number of lockages through Old Locks 15, 16, 17, 18, 19 and 20 during the navigation season of 1904.

I have the honour to be, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, January 17, 1905.

SIR,—I have to acknowledge the receipt of your communication of the 6th instant, returning the application of October 5, 1904, in favour of the St. Lawrence Power Company, Limited, for Company, Limited, for $2,981.74, in which you express the opinion that part of the amount can be paid to Mr. M. P. Davis, only.

In looking further into the matter, I find that I am wrong in crediting the whole amount to the St. Lawrence Power Company. Upon reference to the assignment from Mr. Davis to the St. Lawrence Power Company, which was approved by the Minister on May 2, 1904, I find it mentioned therein that all moneys payable *thereafter,* will be paid to the *Company.* In all other respects, the legal advisors of the department inform me, my certificate is drawn out in full accord with the terms of the lease and contract and the assignment of the same; the actual amount $9,734.71, being correct. It should, however, be divided as follows, viz.:—

M. P. Davis	$5,909 40
The St. Lawrence Power Co., Limited	3,825 31
Total	$9,734 71

The certificate will then stand:

M. P. Davis	$5,909 40
Less amount charged as per accounts rendered	4,099 24
	$1,810 16
The St. Lawrence Power Co., Limited	$3,825 31
Less amount charged as per accounts rendered	2,653 73
	$1,171 58

I thank you for having drawn my attention to the matter.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M. & C.E.*

AUDIT OFFICE, OTTAWA, January 20, 1905.

SIR,—Let me acknowledge receipt of your letter of January 17, in answer to mine of January 6, concerning the claim of the St. Lawrence Power Company to be paid for 180 horse-power instead of 125.

Two subjects were discussed in my letter, namely: the fact that M. P. Davis is the creditor for all services before May 1, 1904, and not the St. Lawrence Power Company; and the fact that several of the motors were disconnected for lengthened periods, and should have been removed from the pay-roll.

Your letter of January 17 does not take up the second subject. Please have this omission rectified at an early date.

I am, sir, your obedient servant,

The Deputy Minister Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, January 24, 1905.

SIR,—I have the honour to acknowledge the receipt of your communication of the 20th instant, regarding the claim of the St. Lawrence Power Company, to be paid for 180, instead of 125 horse-powers of electricity in connection with the Cornwall canal.

In reply, I have to say that, as required by the terms of the contract in the matter, I have certified to certain motors as having been installed by Mr. M. P. Davis, which, on the basis I have given, yield 180 horse-powers, and I have certified accordingly.

With regard to your remarks respecting the disconnecting of some of these motors, I may state that, as a precautionary measure, some of these motors are disconnected by the canal officials and removed, every year, to prevent their destruction by the ice on the incoming of spring; this action by the department, in its own interests, does not in any way affect the contractual obligations of the government.

I am, sir, your obedient servant,

The Auditor General, Ottawa. COLLINGWOOD SCHREIBER, *D.M.*

AUDIT OFFICE, OTTAWA, February 7, 1905.

SIR,—Let me acknowledge receipt of your 136968 of January 24, holding that we are under contract to pay $63 a year per horse-power for 180 horse-power supposed to be available for the motors now installed on the Cornwall canal, whether the mechanism for interpreting that power is in function or not.

I shall probably submit this question for legal advice at an early date. It however is not the only reason which is now delaying payment.

Even should it be decided that the monthly outlay is fixed and undiminishable, no matter how small the service may be, we are at least entitled to full particulars of what that service is.

It is on this ground that I still have to ask for the dates of any prolonged hiatus in the electrical connection; and for summaries of the traffic of 1904 through the old locks. For details see my letter of January 6, 1905.

As Superintendent Stewart will probably have this information on record, the further delay in settlement need not be long.

The offer is renewed, of paying for 125 horse-power in the meantime, for any period on which that amount has not yet been released.

I am, sir, your obedient servant,

The Deputy Minister Railways and Canals. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, March 2, 1905.

SIR,—Let me call your attention to my letters of January 6 and February 7, 1905, asking for further information concerning the charge for 180 horse-power of electricity supplied or available for motors on the Cornwall canal.

The information asked for and not yet received, is: 1st, dates of any prolonged hiatus in the electrical connection for the old locks mentioned; and 2nd, summaries of the traffic of 1904 through the old locks.

As stated in two previous letters, payment for 125 h.p. can be released in the meantime, if you make application therefor.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, March 14, 1905.

SIR,—I would like to have, at the earliest possible date, an answer to my letters of January 6, February 7, and March 2, 1905, concerning the electrical operation of the old locks on the Cornwall canal, and the traffic through them.

You know my reasons for pressing for an answer on this point. If the additional electrical apparatus is in constant use, there can be no ground for withholding the payment at $63 per horse-power. If it is not in use, it probably ought to be different. You have likely asked for the information from Cornwall. Perhaps you think that I have no right to get the information, and, if so, you had better appeal to the Treasury Board. I have had inquiries from Mr. Davis on this subject, and I am unable to give him a definite answer until I hear from you.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, July 19, 1905.

SIR,—Let me call your attention to some information which has repeatedly been asked for by me concerning the St. Lawrence Power Company's accounts for electrical energy for the Cornwall canal—which information you have not yet forwarded to me.

At the end of my letter of January 6, 1905, you will find the paragraph: 'I would like to be supplied with summaries of whatever statistics are on record in your department, showing the actual number of lockages through old locks 15, 16, 17, 18, 19 and 20 during the navigation season of 1904.' Your answer of January 17 to the rest of my letter did not discuss this section.

Under date of February 7, 1905, I wrote to you thus:—

'—— Even should it be decided that the monthly outlay is fixed and undiminishable, no matter how small the service is, we are at least entitled to full particulars of what that service is. It is on this ground that I still have to ask for the dates of any prolonged hiatus in the electrical connection, and for summaries of the traffic of 1904 through the old locks. For details see my letter of Jan. 6, 1905. As Superintendent Stewart will probably have this information on record, the further delay in settlement need not be long.' This was not answered by you.

On March 2, 1905, I wrote: 'Let me call your attention to my letters of January 6 and February 7, 1905. ———— The information asked for and not yet received is: 1st, dates of any prolonged hiatus in the electrical connection for the old locks mentioned; and 2nd, summaries of the traffic of 1904 through the old locks. As stated in my two previous letters, payment for 125 h.p. can be released in the meantime, if you make application therefor.' No answer has been received from you to this letter.

On March 14, 1905, I wrote again to you: 'I would like to have, at the earliest possible date, an answer to my letters of January 6, February 7 and March 2, 1905, concerning the electrical operation of the old locks on the Cornwall canal, and the traffic through them. Perhaps you think I have no right to get the information; and if so you had better appeal to the Treasury Board.' No answer has been received to this letter.

On May 5, 1905, I returned to you all the applications, and asked that they be divided; one group to show 125 h. p. and the other group the excess over that number. I then went on to say: 'It will be necessary for this office to be supplied with the information asked for in previous letters, before the $1,861.99 (for excess over 125 h.p.) can be released. Please supply the information at an early date; or let me know what difficulties are in the way of obtaining it.' No answer has been received to this letter.

As I shall be leaving the Audit Office at the end of this month, I should like to have this matter closed up immediately. Please let me have at once the dates of hiatus in electrical connection, and statistics of 1904 traffic through the old locks, as requested in previous correspondence, with explanations of the delay in not answering my letters sooner.

I would like to examine Superintendent Stewart on these two subjects. I am summoning him (under the Audit Act) to come to Ottawa with the necessary papers.

I am, sir, your obedient servant,

Deputy Minister of Railways and Canals. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, July 31, 1905.

SIR,—I regret to have to state that I think it advisable to mention some circumstances in connection with applications made by you month by month for payments during last fiscal year to the St. Lawrence Power Company for Electric Energy furnished for the working of the Cornwall canal.

I asked you, as the applications began to come in for a higher payment than was due on a basis of 125 horse-power, for certain information the purport of which may be learned by considering my letter to you of the 19th instant.

I have failed to obtain an answer to that letter, as I did to any of those to which it refers.

I feared from information which reached me that all the motors which were treated as money-earning in connection with electric energy supplied were not constructed with any prospect of their early service in the working of the canal.

For the purpose of obtaining otherwise if possible the information which you did not supply, I caused to be subpœnaed Mr. W. A. Stewart, your superintendent of the Cornwall canal, who presented himself before me on Tuesday last to give information on this subject, but who said that he required to return to the works to obtain the information desired. He hoped to return on Friday and has not returned since.

My experience with Mr. Stewart has not tended to lessen the disquietude which arose from my failure to obtain information from yourself.

I am, sir, your obedient servant,

The Deputy Minister Railways and Canals. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, August 21, 1905.

SIR,—Among the few subjects which my predecessor, Mr. McDougall, was unable to settle finally before his retirement from office, the principal one appears to be that of payment for electrical power on the Cornwall canal. The reason for his failure in this instance appears to have been, that his several letters to your department, asking for information concerning the increase from 125 to 180 horse-power, were not answered by Deputy Minister Schreiber.

Progressive Installation of Motors.

The installation of motors has been charged at three different quantities of line-load, as follows:—

(1) October 23, 1901, to August 31, 1904: 125 horse-power, for new locks, bridges and weirs.

(2) September 1, 1904, to April 30, 1905: 180 horse-power, a new item being 65 horse-power for the old locks.

(3) From May 1, 1905: 397 horse-power; new items being 177 horse-power for 12 winches, and 44 horse-power for the workshops.

All the bills up to August 31, 1904, for 125 horse-power, have been paid. None of the bills for 180 horse-power have yet been passed, although this office was willing to pay for 125 horse-power on account, pending further discussion. This arrangement was not accepted by your department.

Functions of the Different Officials.

It seems advisable at this point to make a clear statement of the duties of the different persons concerned in this transaction, as understood by the present Auditor General.

(1) The executive, under its general authority from parliament, has entered into a contract with Mr. M. P. Davis, running to 1979, with the power of expropriation at any time. Whether so long a contract could legally be made, is not here discussed.

(2) The chief engineer certifies, from time to time, that the terms of the contract are fulfilled by the Contractor, and he applies for payment.

(3) The Auditor General, after haxing obtained satisfactory certificates from the chief engineer, approves the payment; and he publishes in his report, for the information of parliament, whatever details he considers germane and expedient. The Auditor General is not concerned, officially, with the wisdom or expediency of an executive contract, at the time when it is made.

(4) Parliament, having before it the expenditure under the contract, and such other information as may be given in the Auditor General's Report, gives or withholds its endorsement of the executive action.

Application to the Present Instance.

(1) The Davis contract, as made by the executive, has been before parliament for two sessions, and has been very fully commented on, with no unfavourable action. Its legality cannot therefore be questioned by the permanent staff, and its provisions must be carried out. It is for the executive to determine, at any time, whether or not the power of expropriation shall be exercised.

(2) The chief engineer, under the terms of the contract, has ordered the successive steps of the installation; he certifies that the power is available, if wanted; and that the rates are those of the contract. It might become the duty of the chief engineer, at some time in the future, to recommend the government to expropriate. With one exception, this seems to complete his share of the transaction. The exception is, that there may be room for discussion as to the payment for any particular motor which has been installed in advance of the machinery which it is to operate—such as the item of 44 horse power line-load for the workshops.

(3) With the same exception, there seems no further reason for the Auditor General to withhold payment, after he has obtained the chief engineer's certificates that the contract has been fulfilled: provided that satisfactory arrangements are made for furnishing him with the information which he considers necessary to report to parliament from time to time.

Cost of Installation for 397 Horse-power Line-load.

The present installation, for 397 horse-power line-load at $63 per horse-power, will cost $25,011 a year. Dividing this by proportion among the different structures to be moved, we have the following approximate annual charge for each:—

6 new locks: gates	$4,463	
6 new locks: winches	5,579	
		$10,042
6 old locks: gates	$4,463	
6 old locks: winches	5,579	
		10,042
Guard gate		372
2 bridges: $139, $93		232
6 weirs: 66 openings		1,534
Workshop		2,789
Total		$25,011

All of these items, except the third and fourth, are connected with 14-foot navigation; the 6 old locks have only 9-foot navigation.

Limits of Navigation through Old Locks.

At page W—322 of the Auditor General's Report for 1903-04 will be found a careful study by Mr. Hayter, of this office, of the limitations to the usefulness of the old locks. A copy of his letter is attached hereto.

It is there shown that traffic is not yet of a magnitude to overflow from the new lock into the old; that it could not so overflow, even if large enough, on account of the single lock at the head of the canal; that some of the motors on the old locks were detached for lengthened periods; and that the present staff can handle only one lock at a time; so that an old lock cannot be worked simultaneously with the contiguous new lock.

Two other very important limitations have developed since, namely:—

1st. If the new lock were out of order, it would need no electric current; and its current could be diverted to the old lock, thus obviating entirely the necessity of paying for a second separate current for the old lock.

2nd. The old locks are only 9 feet deep, and 200 feet long; while the new locks are 14 feet deep and 270 feet long. With the exception of the mail boats, the most of the St. Lawrence shipping has (I believe) enlarged and deepened up to the 14-ft. facilities of recent years; and there can only be a small remainder left which is capable of floating through a 9-ft. channel. Similarly for the increase in length from 200 feet up to 270 feet.

Motors installed before they could be used.

At pages 34 to 36 of the preface to the Auditor General's Report for 1902-03 will be found discussed the fact that electrical energy for the new locks was charged from the date of October 24, 1901, while the contract for the necessary gate-machinery was not made till May 20, 1902, and the machinery was to be completed only by August 15, 1902.

Any probable uncertainty in the date of gate-machinery installation should have been provided for by stipulating that the full rate of $63 per h.p. should at least not accrue before it was possible to use the current. Liberal interest on his outlay in the meantime would be the most that Mr. Davis could have expected.

Notwithstanding the full discussion of 1902 on this point, the same difficulty has recurred in connection with the workshop. A current of 44 h.p. (or $2,789 a year) is charged from May 1, 1905; while my information is, that the workshops have not reached (and will not reach for some time) such a state of completion as to enable the government to utilize this current. Some good reason should be given by the Chief Engineer for having ordered this installation at such an early date; in the absence of such reason, it seems to have been unwarranted.

Additional Information Desired by the Auditor General.

To enable parliament and the government to pronounce intelligently at any time on the advisability of expropriating the whole plant, or of continuing to pay $25,011 a year for its operation, and particularly $10,042 for working the old locks : I would like to be supplied, by the end of every year, with the following statistics:—

(1) The number of lockages through the new locks in each direction, showing separately the number drawing less than 9 feet;

(2) The number of lockages through the old locks, with the reasons therefor, whether excess of traffic, or disablement of the new locks;

(3) The line-load (or horse-power) found to be necessary for the operation of the workshops.

Traffic Returns not Supplied by Department.

Mr. McDougall asked the Department of Railways and Canals, in several letters, for information as to the number of lockages through the old locks; but no notice was taken of his questions, possibly because accurate statistics may not have been preserved. From the considerations just quoted, and from other facts which have come to my knowledge, it may safely be inferred (I think) that the traffic through the old locks was relatively small, if not absolutely *nil.*

I would, therefore, ask the government to consider, at the present time, the advisability of making use of the power of expropriation, in order to save paying $10,042 annually for the operation of the old locks; or at least to obtain a more favourable arrangement for this part of the service, as an alternative of expropriation.

Attention is also called to the recommendation of Messrs. Herdt, Dion and Parke, at the foot of page 47 of the Auditor General's Report for 1902-03, namely:— 'Any compromise that may be effected should provide for the readjustment of charges by mutual agreement or arbitration, at stated intervals not exceeding twenty-one years.'

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, August 29, 1905.

SIR,—Let me call your attention to the contract with Mr. M. P. Davis, dated August 13, 1903, shown at pages 40 and 43 of the Auditor General's Report for 1902-3: this contract being for supply of electric light and power to the Cornwall canal.

At the foot of page 41 it reads: 'The said M. P. Davis shall supply such electric power, not exceeding 400 h. p. to the satisfaction of the Chief Engineer of Railways and Canals, as may by the said Engineer be from time to time required in writing.'

Please furnish me with certified copies of the different written orders by the Chief Engineer, requiring the successive installations corresponding to the totals of 125, 180 and 397 h. p. line-load which have been charged in the accounts.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. FRASER, *A.G.*

Soulanges Canal: Filling in Rear of Walls.

AUDIT OFFICE, OTTAWA, July 27, 1905.

SIR,—After further consideration of Manning & Macdonald's final estimate for section 13 of the Soulanges canal, and after examination of Engineer Grant yesterday, I am now ready to certify further payment as follows:

1. Foundation-excavation, balance $572.34—$15.42	$ 556 92
8. Stone for backing, not used	4,165 00
18. Boulder-stone in cribs	2,189 60
	$6,911 52

Application No. 627 for $21,182.52 is returned herewith. Please divide it into two parts, thus:

Items 1, 8, 18, for payment	$ 6,911 52
Item 17, stone filling in rear of walls	14,271 00

The latter item, $14,271, I do not see my way clear to releasing.

At the foot of page W—341 of my report for 1903-04, Mr. Grant said: 'All other filling in rear of the masonry walls is composed of all classes of material arising from the excavation on the section, and was dumped in place from cars, wagons or carts, without any other labour spent on levelling it down, other than what would be necessary to keep the tip-end of any high bank flattened out. Payment for this large quantity is now demanded at the contract schedule rate of 50 cents per cubic yard, no work on which was carried out according to paragraph 74 and 23 of the specifications. The claims should, therefore, not be allowed.'

The allowance, as made subsequently by yourself, and concurred in by Mr. Grant, seems to rest on the wording of section 74: 'The filling in behind walls shall be executed with broken stone, quarry-waste, or other selected material arising from the excavations, placed in layers and well rammed or otherwise compacted from bottom to top.'

Mr. Grant now explains that the material, gathered up wet when cleaning the canal prism, and dropped from a height, became compact when dry; and he, therefore, holds that it comes under the wording 'otherwise compacted' of section 74. Moreover he explains that the material (mixed clay and stone) is the same as was accepted for 'selected material' elsewhere on the section, and can therefore be classed as 'selected material' itself.

I differ from him on both points. Since the material was gathered up from the canal bottom indiscriminately, there was no 'selection,' and consequently no 'selected material;' and since any 'compactness' was caused by natural forces, and not by the contractors' efforts, the latter should not get the benefit of the increased price.

Under section 10, 'The prices bid for dredging and earth excavation must include the cost of hauling any proportion of the excavation from any part of section 13 to any other part thereof, either for the purpose of filling at the entrance, throwing the stuff to spoil, or for any other object connected with the works.' No work seems to have been done in the present instance, which would remove the item from this category, and full payment under section 10 has already been made.

The application for $14,271 will therefore be held.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, August 5, 1905.

SIR,—A difference of opinion has arisen between this office and the Department of Railways and Canals *in re* a claim of Manning & Macdonald, amounting to $14,271, in connection with their contract on section 13, Soulanges canal. I inclose herewith a copy of Minutes of Evidence taken before J. Lorn McDougall, Esq., Auditor General, on July 28, 1905, and also the opinion of Mr. McDougall *in re* this claim as expressed in a letter written by him to the Deputy Minister of Railways and Canals, dated July 27, 1905, and have to request that you will be good enough to examine both the evidence of Mr. Alexander Joseph Grant and the letter of Mr. McDougall, and advise me as to the correctness of the conclusions arrived at by Mr. McDougall, and the justness of the claim of Messrs. Manning & Macdonald. If there is any further information you require, I shall be glad to place at your disposal all the material in this office in connection with the matter.

I shall be much obliged by your giving me your reply at as early a date as possible.

I am, sir, your obedient servant,

C. H. Keefer, Esq., C.E., Ottawa, Ont. J. FRASER, *A.G.*

OTTAWA, August 17, 1905.

SIR,—In accordance with the instructions contained in your letter of the 15th instant, that I should advise you as to the claim of Manning & Macdonald, amounting to $14,271, in connection with their contract on section 13, Soulanges canal, I beg to report as follows:—

I have carefully examined the documents you have furnished me with in connection with the above-mentioned claim.

I am of the opinion that the contractors are entitled to some payment for this material, but not under clause 74 of the specifications, which clause is as follows: 'The filling in behind all masonry walls or other structures shall be executed with broken stone, quarry waste, or other selected material arising from the excavations, placed in layers and well rammed or otherwise compacted from bottom to top, and to the entire satisfaction of the inspector or person in charge; the refuse or stone for the purpose shall be taken from any part of section 13 which may be pointed out; no claim for extra haul on this account will be allowed.' The specification provides that the material to be paid for under clause 74 of the specification, and clause 23 of the schedule of prices shall be 'selected, placed in layers and well rammed or otherwise compacted.' The evidence and statements show that the material was not selected, placed in layers, or rammed, and that therefore the conditions required by clause 74 of the specification for payment under clause 23 of the schedule of prices were not fulfilled. Mr. Grant explains in his memorandum of June 23, 1905, that 'from 2 to 4 feet of dry stone was placed behind the retaining walls, the balance of the selected material on completion of the lock walls, was taken in cars from the bottom of the canal, being a mixture of boulder clay and rock excavation in a wet condition, which caused it when dropped from the cars to consolidate and form a compact mass from top to bottom, as called for by the specification, paragraph 74," and in his evidence, page 3, says: 'It is selected material in the sense that it was a mixture of clay and stone which we would have taken in any event, only if we had taken it in a dried condition we would have put it in in layers,' and in evidence, page 4, in answer to Mr. McDougall's question, 'Was it selected?' 'It was, because I compelled them in the early part of the work to leave enough material in the bottom of the canal instead of taking it to the river at the dump where they had been taking it, and they had to move their tracks to the other side; that was the only material they had and they took it indiscriminately.'

My understanding of the intention of clause 74 in the specification is that the material was to be selected, placed behind the walls in a dry condition in layers, rammed and consolidated in that way, or after being so placed that water might be used to 'otherwise consolidate it.' Instead of ramming, what was done evidently was that the material was taken from the excavation, as Mr. Grant says, 'indiscriminately,' and simply dumped into place, relying on its saturation with water and the force of gravity to otherwise compact it.

Mr. Grant's evidence and statements show that the contractors were put to extra expense over and above what would have been required had the material been deposited behind the walls during the time that excavations were being made by the steam shovel, and are entitled to some compensation on that account. I would suggest that a settlement of this item might be arrived at by obtaining from Mr. Grant a valuation of this unselected material in the work, taking into account the increased cost of excavation by hand, instead of by machinery, and the cost of moving tracks, &c., in order to do the work.

I am, sir, your obedient servant,

The Auditor General. CHAS. H. KEEFER, *C.E.*

AUDIT OFFICE, OTTAWA, August 18, 1905.

SIR—Concerning the claims of Manning & Macdonald for extra work on section 13 of the Soulanges canal, and the only item now outstanding, namely, $14,271, for 'earth filling behind walls.'

In his letter of July 27, 1905, Mr. McDougall raised the objection that this material was not 'selected,' and that the benefit of 'compacting' by natural forces should enure to the government and not to the contractor.

I have submitted all the papers concerning this claim to Engineer Chas. H. Keefer, and have just received an opinion from him, a copy of which I inclose herewith.

Mr. Keefer does not support the contractors' claim for selection and compacting; but he thinks some allowance should be made for excavation, originally contemplated as steam-shovel work, but subsequently performed by picks under the resident engineer's order.

Mr. Engineer Grant, who has the best local knowledge of the transaction, might be asked to discuss the amount of work which comes under this category; and to suggest a fair extra price therefor, to be approved by the Chief Engineer.

I am, sir, your obedient servant,

The Deputy Minister Railways and Canals. J. FRASER, *A.G.*

OTTAWA, August 23, 1905.

MY DEAR SIR,—*Re* claim of Manning & Macdonald, section 13, Soulanges canal, and letter of Auditor General of the 18th instant, inclosing a report from Mr. Charles H. Keefer, C.E., I have most carefully read Mr. Keefer's report, and in reply I beg to state that I do not agree with Mr. Keefer in his conclusions, nor in the reasoning by which he reaches them.

I beg to say that the material was reserved by the contractor from the main excavation at my request, and that subsequently it was placed in the work under my direction, that the end aimed at by the specification was secured, and therefore, it was selected material suitable for the purpose and that in fact it was fairly good puddle, which material was better than that contemplated under the strict letter of the specification.

Yours faithfully,

Deputy Minister Railways and Canals. ALEX. J. GRANT.

AUDIT OFFICE, OTTAWA, August 26, 1905.

SIR—Let me acknowledge receipt of your communication of yesterday's date, inclosing Mr. Grant's report on Mr. Keefer's opinion *re* Manning & Macdonald's claim on section 13 of the Soulanges canal, for 'earth filling behind walls.'

Mr. Grant does not agree with Mr. Keefer, and adheres to his own second certificate.

Whatever payment is made to Messrs. Manning & Macdonald from the vote of 1904-5 should be passed before August 31, if possible, when the accounts for that year will be closed; and I would prefer that the payment should be based on the ruling made by Mr. Keefer in the meantime.

Please have the figures prepared as explained in my previous letter, to show the difference in value between steam-shovel and pick excavation. This sum can then be paid at once, and the discussion can proceed on the rest of the claim.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. FRASER, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, August 30, 1905.

SIR,—I have the honour to acknowledge the receipt of your communication of the 26th instant, with further reference to the claim for 'Earth Filling behind Walls' of Messrs. Manning and Macdonald arising out of their contract for section No. 13 of the Soulanges canal, in which you ask to be furnished with figures prepared to show the difference in the value between steam-shovel and pick excavation.

In reply, I have to say that, on reference of the matter to Mr. A. J. Grant, who was employed on the canal at the time of the construction of the section in question, he has replied to the effect that no record was kept by the canal officials of the difference in cost between steam-shovel and pick excavation, and that, at this late date, it is impossible for him even to form an opinion on the subjet.

I am, sir, your obedient servant,

The Auditor General. L. K. JONES, *Act'g D.M.*

Welland Canal: Port Colborne Elevator: Architect.

AUDIT OFFICE, OTTAWA, February 7, 1905.

SIR,—Let me acknowledge receipt of your application No. 329 for $13,250 in favour of Mr. J. A. Jamieson, C. E., of Montreal, for plans, specifications and estimates, for the Port Colborne elevator, as follows:—

Preparing preliminary drawings; making calculations of the necessary dimensions, storage capacity, power, machinery and equipment; also preparing preliminary estimates of cost for a 2,000,000-bushel elevator to be built at Port Colborne: 1 p.c. on $1,100,000...	$11,000 00
Preparing general and detail plans and specification of foundation, also bill of quantities and estimate of cost: 2½ p.c. on $90,000..	2,250 00
	$13,250 00

The voucher is certified '53 plans in blue print, with specifications and estimates for a 2,000,000-bushel elevator have been received, and plans and specifications of foundation of elevator: Collingwood Schreiber.' There is also a reference to an Order in Council of January 31, 1905.

I do not find that Mr. McGee has sent me a copy of the Order in Council just mentioned. Please have this omission rectified.

The architect's fee is so large that I would like to be supplied with some information as to his standing and experience; also some approximate estimate of the time required to prepare the plans—separating Mr. Jamieson's own time from those of his draughtsmen.

Is there any constituted authority which can regulate engineers' and architects' fees, in the same manner as lawyers' fees are regulated by the taxing-officers of the courts, and printers' charges by the King's Printer ?

I am, sir, your obedient servant,

Deputy Minister of Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, February 14, 1905.

SIR,—I have the honour to acknowledge the receipt of your communication of the 7th instant, relative to the application that has been made to you by the department for the issue of a cheque in favour of Mr. J. A. Jamieson for the sum of $13,250, being for certain plans, specifications and estimates furnished by him for the grain elevator proposed to be erected by the government at Port Colborne, on the Welland canal, in which you ask for certain further information in the matter.

In reply, I inclose herewith, for your information, a copy of the Order in Council, dated the 31st ultimo, granting authority for entry into an agreement with Mr. Jamieson in the matter, and fixing the rate of remuneration to be paid to him, together with a copy of the contract in question, which is dated the 31st ultimo. The Clerk of the Hon. the Privy Council has been requested to furnish you, as desired, with a certified copy of the above mentioned order.

With regard to your further remarks, I would say that Mr. Jamieson is an architect and engineer of special experience in this class of work, and will not only prepare plans of buildings, but also of the machinery. Further, he will supervise and test at the shops, and see that the working of the machinery, when erected, is satisfactory. In addition, he allows the department, free of charge, the use of his several patents bearing on this machinery.

However, on persual of the Order in Council and of the agreement with him, you will, no doubt, find yourself in possession of the information you require. I may add, in answer to the last paragraph of your letter, that I am not aware of the existence of any constituted authority for the regulation of engineer's or architect's fees.

I am, sir, your obedient servant,

L. K. JONES, *Secretary.*

Order in Council, January 31, 1905.

On a memorandum dated January 23, 1905, from the Minister of Railways and Canals, representing that in connection with the work of grain elevator construction at Port Colborne in contemplation, the services of Mr. J. A. Jamieson, of Montreal, a specialist engineer in this class of work, have been employed in the preparation of the necessary general and detail plans and calculations for the complete structure, its machinery and equipment.

The minister further represents that it is further proposed and Mr. Jamieson agrees, that he should, in addition, give full engineering superintendence to the work during construction, and should inspect the machinery while in the shops, supervise and test it while being erected in the elevator, and during the early stages of its operation.

In addition, Mr. Jamieson has agreed to allow the Department of Railways and Canals or the contractor employed by the department, without charge, to use in connection with this elevator a number of his patents, covering improvements in elevator bins, improvements in bearings, and improvements on belt conveyors, conveyor rollers, and automatic grain shovelling machines, also all his other patents and inventions with respect to construction and equipment of grain elevators.

That the rate of remuneration claimed by Mr. Jamieson for these services is five per cent upon the total cost, the estimated cost being $1,100,000.

The minister has obtained from the Chief Engineer of the Department of Railways and Canals a report dated January 20, dealing with this question of remuneration, a copy of which is hereto attached.

The Chief Engineer of the Department of Railways and Canals has procured information from the Grand Trunk Railway and the Canadian Pacific Railway Companies as to their usage in such matters and has, further carefully explained the requirements of the case, pointing out that the work is one of special and highly technical character, involving exceptional knowledge and experience, which Mr. Jamieson undoubtedly possesses.

The conclusion he draws is that in view of the work required, and of the additional undertaking of Mr. Jamieson to supervise, inspect and test, and further to give the Department of Railways and Canals the advantage of the free use of his patents, that the rate of remuneration asked for by Mr. Jamieson, namely, five per cent of the total cost, is a reasonable charge for these services, and that the Department of Railways and Canals will be acting wisely in disposing of the matter on those terms.

The minister recommends that authority be given for entry into an agreement with Mr. Jamieson for the preparation and delivery by him of the plans and specifications for this elevator and of the necessary equipment and machinery, and for his superintendence, inspection and testing of the construction, equipment and preliminary operation of the said elevator, Mr. Jamieson to receive for such services remuneration at the rate of five per cent on the cost of the work, to be paid in such instalments as the work progresses, as may be deemed proper by the Department of Railways and Canals.

The Committee submit the same for approval.—JOHN J. MCGEE, *C.P.C.*

Welland Canal: Port Colborne Elevator: Foundation.

AUDIT OFFICE, OTTAWA, July 14, 1905.

SIR,—Let me acknowledge receipt of a copy of your contract No. 15916 with Larkin & Sangster, being a modification of contract No. 15871 for construction of the foundation for grain elevator at Port Colborne.

Contract No. 15871 provides a lump-sum payment for specified work, and contract 15916 describes a change in part of the work, for the same lump-sum payment.

There should be an engineer's certificate that the new work is at least as expensive as that for which it is substituted. Otherwise there should be a deduction from the amount of the original contract.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. MCDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, July 18, 1905.

SIR,—I have to acknowledge the receipt of your letter of the 14th instant, relative to the contract (No. 15916) with Messrs. Larkin and Sangster, being a modification of contract No. 15871 with them for the construction of the foundation for grain elevator

at Port Colborne. You say that there should be an engineer's certificate to show that the new work is at least as expensive as that for which it is substituted.

In reply, I have to state that, in my opinion, the proposed change in the work is more costly than that comprised in the original design. The contractors, however, for some reason, appear to think otherwise, but before the works are completed they will, I fear, discover their mistake.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M. & C.E.*

Williamsburg Canals: Alterations of Slopes.

AUDIT OFFICE, OTTAWA, July 31, 1905.

SIR,—Let me call your attention to an item in Wm. Davis & Sons' Estimate No. 61 on Cardinal section, for 'Alteration of Slopes' from 1-to-1 to 1¼-to-1, as follows.—

Cast: 38,767·44 c.y. at $1.11		$43,031 86
Less: paid at schedule rates:		
30,950·51 c.y. at 19¼c	$5,957 97	
7,816·93 c.y. at 24¾c	1,934 69	
		7,892 66
Extra cost now paid		$35,139 20

A similar charge was made on some of the sections of the Soulanges canal, after it was found that the specification slopes were too steep to stand.

Apparently, the same difficulty will recur in future works, unless you specify a slope sufficiently flat to hold in any kind of material.

Would it not be well to have a separate schedule item for 'Alteration of Slopes, if found necessary'?

Had there been such an item in the present schedule, it is possible that the contractor might have bid a lower price than the $1.11 which he finally received.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

Williamsburg Canals: Quarry-waste on Slopes.

AUDIT OFFICE, OTTAWA, July 31, 1905.

SIR,—Let me acknowledge receipt of two applications to pay the final estimate of Wm. Davis & Sons on the Cardinal canal, as follows:—

No. 653	$19,710 00
No. 706: drawback	13,738 09

The calculation of Application 653 is this:

Normal quarry-waste in rear of protection stone facing, 1 ft. thick, hand-laid; 16,718·51 c.y. at $2.75	$45,975 90
Less, paid in previous estimates: 16,718·51 c.y. at $1.50.	25,077 76
	$20,898 14
Allowance on account of change of slope: 4,000 c.y. at 25c	1,000 00
	$21,898 14
Less 10 per cent drawback	2,188 14
	$19,710 00

After reading the evidence several times carefully, the salient point appears to be—the possibility or impossibility of laying the quarry-waste by shovels, or otherwise than by hand.

At page 33 of the evidence, Engineer Sargent testifies: 'It is hand-laid; it could not be done in any other way; you could not hold it on the slope; I demanded it to be built in that way.'

At page 34 Mr. Sargent says: 'I always supposed it was quarry-waste, and it was returned in all the estimates as quarry-waste. Mr. Rubidge looked at it, and acknowledged that it would bear more than the specification called for, and agreed that it could not be built in any other way. The inspector demanded that it should be built the way it was; I instructed him; Mr. Rubidge instructed me.'

At page 36 Mr. Sargent says: 'It could not have been put in otherwise than as hand-laid, for the purpose of putting the wall on it, and making the wall stay there. It could have been thrown down the slope, but it would not have stayed where it was placed. It would have rolled to the bottom.'

At page 38 Mr. Sargent says: 'I would not have allowed that foot of quarry-waste behind that 3-foot wall to be shovelled in, because it would not hold the wall. It was necessary to hand-lay it.'

Moreover, the contractors, in trying to establish a claim for a masonry rate, or $4.50 a yard, stated that it was not possible to place quarry-waste upon the slope without being hand-laid.

Chief Engineer Schreiber, in his award, says: 'The engineer in charge ordered the work to be hand-laid, and special stone was quarried for it. The quarry-waste without doubt could have been placed in the ordinary way. I have no hesitation in making this statement, having had reason to execute work of this nature under the circumstances.' Holding, therefore, that the contractors' specification-option was interfered with by the engineer's order unneessarily, Mr. Schreiber allows the hand-laying as an extra.

This case is a marked instance of the wisdom of adhering rigidly to the general contract-provisions for written orders, and prompt presentation of claims.

Had the local engineer ordered 'hand-laying' in writing, the written order would have come before the Chief Engineer for confirmation; the latter would have decided at that time (within his own experience) that 'the quarry-waste could have been placed in the ordinary way'; and the extra expense would have been stopped at once.

Had the contractors been forced to state their written claim when the extra service began, it would similarly have reached the Chief Engineer without delay; and his adjudication would have settled the discussion finally, when only a small part of the work had been done.

I trust that the department will see its way clear to bringing into active operation these valuable sections of the contract at an early date.

I am, sir, your obedient servant,

The Deputy Minister Railways and Canals. J. L. McDOUGALL, *A.G.*

Williamsburg Canals: Pumping at Iroquois.

AUDIT OFFICE, OTTAWA, October 17, 1904.

SIR,—I have read the correspondence relating to Estimate 57 A, for $34,990 in favour of Larkin & Sangster, being extra allowances for their work on the Irquois section of the Galops canal, as per schedule attached; and I now beg to offer the following remarks on some of the items:—

14—REPAIRS, &C., TO GOVERNMENT DAM, $8,931.74.

The items which make up this amount are as follows:

E—Repairing cribs, sheet-piling, &c.; bal. of $2,274.50...	$ 646 50
H—Removing ice, &c., Feb. 6 to 21, 1898..	1,302 65
I—Removing ice, March 6 to 21, 1898.....	330 75
J—12-in. pump, Oct. 26 to Nov. 22, 1897; 1,176 hours at $5.33..	6,268 08
J—12-in. pump, Mar. 15 to 18, 1898; 72 hours at $5.33....	383 76
	$8,931 74

The rate of $5.33 an hour, or $128 for a 24-hour day, would appear to the lay-mind high, where the period is long. Please let me have the details of the calculation by which this rate was fixed. What is the purchase price of a pump similar to that used for this work? How long will it last? And what are the daily running-expenses, for wages and fuel?

25-12—WINTER WORK AT OLD BANK; PUMPING, $9,660.

This is for work of 6-inch pumps at $3 an hour, pumping from November, 1898, to April, 1899, as follows:

One 6-inch pump; 1,420 hours at $3....	$4,260
One 6-inch pump; 1,420 hours at $3....	4,260
One 6-inch pump; Jan., Feb.; 380 hours at $3....	1,140
	$9,660

As with the previous entry for 12-inch pumps at $5.33, the rate per hour makes a very large total, when continued for a long period. Should not some more favourable arrangement have been made, say by the month, when it was known that the service would last throughout the winter season?

I would also like to have, in this instance, some figures as to the probable first cost of the pumps, and their running expenses.

I am, sir, your obedient servant,

The Deputy Minister Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, October 31, 1904.

SIR,—I have the honour to acknowledge the receipt of your letter of the 17th instant, relative to estimate No. 57 A in favour of Messrs. Larkin & Sangster, being for extra work, under their contract of May 20, 1897, for the enlargement of the Iroquois section of the Galops canal, in which you take exception to certain items of such estimate, namely:

14. Repairs, &c., to government dam..	$8,931 74
25-12. Winter work at Old Bank; pumping..	9,660 00

With regard to item No. 14, your objection to which lies in the amount set down as payable for pumping, I have to draw your attention to the fact that the contract, which was the result of public competition, fixed, by item 79 of the schedule, the price for the 'use of steam centrifugal pump with 6-inch to 9-inch discharge, including superintendence and use of tools, for executing work not measured in any item paid for otherwise,' at $3 per hour. The price being so fixed, there is, of course, no possible evasion of liability for its payment in the case of the use of a pump of the dimensions named. As a matter of actual fact, however, the pump used was a 12-inch pump, and

the price set down in the estimate and approved by me, $5.33 per hour, is simply an increase of the rate proportionate to the area of the discharge, the calculation being as follows:

Area of discharge of 9 inch = 81 inch.
" " 12 " = 144 inch x $3 ÷ 81 = $5.33 per hour.

25-12. This item is for the work of 6-inch pumps at $3 per hour, and, as above stated, the price is fixed by the contract schedule for such extra work, and cannot, of course, be disputed.

It is true that the prolonged use of these pumps has resulted in the incurrence of considerable expense for this item of pumping. The pumping requirements, however, were governed by the extent of the leakages in the government dam, and these developed to a greater degree than had been anticipated.

With regard to your further question, I have to say that the department has not been purchasing any centrifugal pumps.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M. & C.E.*

AUDIT OFFICE, OTTAWA, January 9, 1905.

SIR,—In further discussion of my letters of October 17 and December 8, and your letter of October 31, 1904, all concerning the claims of Larkin & Sangster under estimate 57 A on the Iroquois section of the Galops canal:

As far as I understand the subject of pumping, a very large part of the expense is the purchase and installation of the plant. A contractor, when tendering on schedule, would naturally put a high daily figure on this item, to protect himself in case the period of time happened to be a short one. If he were sure of a longer period, a much lower rate might be named. Could not the specification schedule contain two items for pumping: one for a period not to exceed a given number of days, and the other for any days in excess of that period? The contractor could then venture to make a lower offer on the second item, and this would cause smaller entries for pumping than those which have been so large and numerous in recent claims for extras.

I am, sir, your obedient servant,

Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, June 7, 1905

SIR,—I have the honour to acknowledge the receipt of your suggestion that in future the schedules attached to contracts entered into by the department should contain two items for pumping: one for a period not to exceed a given number of days, and the other for any days in excess of that period, and state that the contractor could then 'venture to make a lower offer on the second item, and this would cause smaller entries for pumping than those which have been so large and numerous in recent claims for extras.'

In reply, I have to say that I see no difficulty in meeting your wishes, and that the matter will be kept in view in the future.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M.R. & C.*

AUDIT OFFICE, OTTAWA, June 9, 1905.

SIR,—Let me acknowledge receipt of your letter of June 7, accepting the suggestion that future contract-schedules should contain two items for pumping,—the second being for pumping in excess of a given number of days.

The same object might perhaps be attained by having a lump-sum item for 'installation of pumping-plant,' and a day-item 'for work of pumps.'

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, June 12, 1905.

SIR,—I have the honour to acknowledge the receipt of your communication of the 9th instant, in which, in connection with my letter of the 7th instant, accepting your suggestion that in future the schedules attached to contracts entered into by the department should contain two items for pumping, namely, one for a period not to exceed a given number of days, and the other for any number of days in excess of that period, you state that, perhaps, the same object might be attained by having a lump-sum item for 'installation of pumping plant,' and a day item 'for work of pumps.'

In reply, I have to say that I am afraid that your suggestion would not work out satisfactorily, and that your previous suggestion in the matter appears to me to be the better of the two.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M.R. & C.*

Intercolonial Ry.: Quality of Coal.

AUDIT OFFICE, OTTAWA, January 25, 1905.

SIR,—Let me acknowledge receipt, for audit before payment, of vouchers for coal supplied to the Intercolonial Railway in December as follows:

Cumberland Railway and Coal Co.	$53,528 51
Intercolonial Coal Mining Co.	7,416 98
Acadia Coal Co.	24,007 06
Inverness Railway and Coal Co.	7,519 90
Minudie Coal Co.	8,188 32

The certificates on the vouchers are: 'the materials have been supplied,' and 'the prices are according to contract.'

I would like to be furnished also with a periodical certificate that the quality of the coal delivered by the companies continues satisfactory.

It is evident that a price which might be reasonable for a good article might be very high for a poor one.

Please have this matter taken up at the earliest possible date, to avoid inconvenience to the creditors.

I am, sir, your obedient servant,

The Gen. Mgr. Govt. Rys., Moncton, N.B. J. L. McDOUGALL, *A.G.*

MONCTON, N.B., January 28, 1905.

C. R. PALMER, Esq., General Storekeeper, Moncton, N.B.

DEAR SIR,—Herewith I send you a copy of a letter from the Auditor General, dated January 25. You will notice that the Auditor General asks to be furnished with a periodical certificate that the quality of the coal delivered by the companies continues satisfactory.

I wish you would let me know if you can properly give such a certificate, and if so, let me have it.

Yours truly,

D. POTTINGER, *Gen. Mgr.*

STORES DEPT., MONCTON, N.B., January 30, 1905.

PERIODICAL CERTIFICATE *re* QUALITY OF COAL.

D. POTTINGER, Esq., General Manager, Canadian Government Railways.

DEAR SIR,—In reply to your letter of the 28th instant, accompanied by a copy of a letter from the Auditor General, dated the 25th inst., with reference to a number of coal accounts unpaid, and asking 'to be furnished with a periodical certificate that the quality of the coal delivered by the companies continues satisfactory,' if this certificate is to be definite I do not see how I a mgoing to give it. Drivers sometimes make complaints about delays to trains from the best of our coal, caused, as they say, by bad coal. I am not prepared to say whether it is bad coal, bad firing or bad engines. For instance, on the special running to Halifax some time ago with the Ottawa officials the train lost time between Campbellton and Dalhousie; the report was on account of bad coal. I have ample evidence that the coal was Dominion screened, which is considered one of the best coals produced for steaming purposes.

I have sent Mr. Clarke, who has handled coal here for a good many years, on engines to find out what was the real trouble, when it has proved to be the fault of the steaming qualities of the engine, through leakage of tubes and other causes. The Cumberland Railway and Coal Company have coal equally as good for steaming purposes as the Dominion, and yet we have complaints against it. We have had a number of complaints also from the Intercolonial Coal Mining Company's coal from No. 4 slope; also from the Acadia Coal Company's when supplied from the Vale mines, and coal supplied by the Inverness Railway and Coal Company, and quite a number of complaints from coal supplied by the Minudie Coal Company, and so from every other mine supplying us with coal.

I think if such a certificate is necessary to ensure payment of the coal accounts, it had better be from the mechanical department, who have a travelling fuel inspector and handle the drivers. We have two fuel inspectors in our department, but to enable them to make such a report so as to enable us to sign such a certificate, each would have to remain all the time at one mine. If the Auditor General would accept some qualified term that would cover some such cases as I have noted, say such as 'generally good' or 'fairly good,' I may be able to meet his wishes.

Yours truly,

C. R. PALMER, *General Storekeeper.*

OTTAWA, February 11, 1905.

DEAR SIR,—I have your letter dated January 30, with reference to certificates with regard to the quality of the coal, and I send you herewith all the papers. You

might consult the superintendent of motive power and see who can give a certificate that will meet the views of the Auditor General. Perhaps Mr. Clarke or the travelling fuel inspector could do so.

Yours truly,

D. POTTINGER, *Gen. Mgr.*

C. R. PALMER, Esq., General Storekeeper, Moncton, N.B.

MOTIVE POWER DEPT., MONCTON, N.B., February 21, 1905.

Memo. to Mr. C. R. Palmer.

We do not get coal from any province which is uniformly satisfactory, and I do not think it can be mined. We receive average quality coal, some days very good, other days poor, and the different mines in the same province produce grades of coal differing very much from each other, and differing in the manner in which they ought to be used on the locomotives. It seems, at first sight, quite impracticable to give such a certificate. We handle the coal question in about the same way as most other railways.

G. R. JOUGHINS, *S.M.P.*

STORES DEPT., MONCTON, N.B., February 22, 1905.

DEAR SIR,—In reply to your letter D 2/2464, *re* certificate on vouchers for coal, I referred the matter to Mr. G. R. Joughins, superintendent of motive power, and attach herewith his letter. He evidently does not wish to assume the responsibility, and in the face of his attitude, on this question, I do not see how Mr. Clarke can do so; but if the Auditor General will accept some qualified statement, as stated in my letter of January 13, I would have no objection to certifying to the general quality of the coal received.

I wish you would ask him for such a statement as would be satisfactory to him, and we will see if we can possibly meet his wishes.

Yours truly,

C. R. PALMER, *General Storekeeper.*

D. POTTINGER, General Manager, Ottawa, Ont.

OTTAWA, April 3, 1905.

DEAR SIR,—Referring to your letter dated January 25, in regard to a certificate on the vouchers for coal that the quality of the coal delivered by the companies continues satisfactory, I inclose you the correspondence that has taken place between the general storekeeper and myself in regard to this. Will you please look it over and let me know whether any other form of words will be satisfactory.

In addition to what the general storekeeper states in one of his letters, I may explain that after the coal has been received by the railway from the mines it is generally unloaded from the cars either into sheds or into piles out of doors, and in that operation the lumps become to a considerable extent separated from the finer coal and sometimes the complaints of the enginemen in regard to the coal arise from the fact that they have received from the persons who are delivering coal to the engines a lot of the fine coal that has become separated from the round coal, and while this fine coal will be real coal it does not make steam as well as the larger pieces of coal would do, as it is more apt to be blown through the tubes of the engine by the draft without being fully burned. This accounts sometimes and to some extent for the complaints of en-

gines receiving bad coal. In the winter season the matter is still further complicated by the coal becoming mixed with snow, and in that case the engineman will probably say that he was delayed by bad coal.

Yours truly,

D. POTTINGER, *G.M.*

J. L. McDougall, Esq., C.M.G.,
Auditor General, Ottawa, Ont.

Intercolonial Ry.: House destroyed by Fire.

Audit Office, Ottawa, May 6, 1905.

Sir,—Inclosed please find the correspondence relating to a claim by Mr. Thomas Poiré, of St. Charles de Bellechasse, for $1,200, as compensation for a house destroyed by a fire said to have been started by sparks from an Intercolonial Railway locomotive.

You will notice at page 29, that the Justice department expressed an opinion that the Crown is not legally liable for the loss.

At page 27 you will find my opinion that only parliament, and not the executive, can authorize payment as a matter of grace.

Please let me have your view on this subject at an early date.

The case is important, as a fair type of such claims, if perhaps not so from its own amount.

Yours sincerely,

Hon. A. B. Aylesworth, K.C., Toronto. J. L. McDOUGALL, *A.G.*

Toronto, May 30, 1905.

Dear Sir,—Upon the facts shown in the correspondence, it appears that Mr. Thomas Poiré was owner of a house which, with its contents, was destroyed by fire on June 28, last. He claims that this fire was started by sparks from a locomotive on the Intercolonial Railway.

On the back of a letter in the Department of Railways there appears to be a memorandum stating that the only evidence to connect the railway with the fire is that a train went by a few minutes before the fire was seen in the roof of the house, but that no one saw any spark alight on the house. In September last the department of Justice seem to have had the papers submitted to them, including probably the memorandum above referred to, and on September 10, 1904, the Deputy Minister of Justice wrote to the Secretary of the Railways and Canals Department that he could not find anything in the papers to connect the fire with the passing trains except the statement that the fire was noticed shortly after the passing of two trains and that there was no fire in the stoves in the claimant's house. He adds that there is no evidence of any negligence on the part of any of the railway officials, and no doubt the engines were fitted with the best known practical means of preventing fires.

Under these circumstances he expressed the opinion that the Crown would not be legally liable, and, upon the facts as there stated, I should be entirely of the same opinion.

But as I understand the law the Crown is liable for any injury to or loss of property caused by a public work, if such injury or loss is the result of negligence on the part of the officials or servants of the government acting within the scope of their respective duties. Accordingly, if loss is occasioned by negligence of the railway officials, whose duty it was to see that the engines were properly equipped and in proper repair, the Crown would in my opinion be liable for damages that might be so caused; and the liability of the Crown in this case would therefore seem to me to depend entirely on the facts of the case, and whether or not the fire could be shown to be the result of any negligence on the part of those in charge of the railway and of its engines.

Among the papers is a letter from the Minister of Railways to the General Manager of the Intercolonial, dated October 8 last, in which the minister says that after looking carefully into the claim he has decided to allow $1,200 as compensation.

I take it for granted, therefore, that before this date, on the full facts of the matter being investigated, there appeared to the minister to be reasonable danger that the Crown might be held liable for the full amount of the claim, and that it was wiser in the public interest to compromise the claim than to resist with the possibility that the Crown should have to pay the whole. Since then, on January 23 last, on Order in Council has been passed for payment of above amount upon Mr. Poiré executing a proper deed of release in the matter, and you ask my opinion whether under the circumstances the executive would have power to authorize payment of this amount without special authority from parliament.

There being a claim against the Crown for which legal liability to pay would exist if the claimant could establish negligence, it would seem to me of necessity that the minister in the proper department must be the one to decide whether or not, in the public interest, it would be advisable to defend or to compromise, and if upon his recommendation it was in any case decided by the government that it would be more prudent to compromise a claim than to litigate, I would not entertain any doubt but that the power to make such decision properly rested with the government. I would not consider such a payment a matter of grace. It is a matter of business, and surely in the interests of the public that payment of a claim should not be defended where the defence is not likely to succeed, and where defending will certainly occasion expense and might involve payment of a substantially larger amount.

Under such circumstances, it is ordinary business prudence to compromise, and in my opinion the power so to compromise must in any case rest with the minister and with the government. I would not suppose a special Act or vote of parliament would be necessary in such a case.

Yours truly,

The Auditor General. A. B. AYLESWORTH.

AUDIT OFFICE, OTTAWA, June 30, 1905.

SIR,—In further discussion of the claim of Thos. Poiré, of St. Charles de Bellechasse, for $1,200 compensation in full settlement for house destroyed by fire, said to have been caused by sparks from an I.C.R. locomotive:—

Although the Justice Department holds that the Crown is not legally liable, I am advised by Mr. Aylesworth that the minister has a right to offer a compromise to avoid litigation.

I therefore inclose the voucher for $1,200 approved for payment.

I am, sir, your obedient servant,

The Gen. Mgr. Govt. Rys., Moncton, N.B. J. L. McDOUGALL, *A.G.*

Intercolonial Ry.: Invitations to Tender.

AUDIT OFFICE, OTTAWA, January 9, 1905.

SIR,—Let me call your attention to my letters of June 11, 1903 and January 5, 1904 (shown at pages W—295 and 296 of my report for 1902-3), which letters asked for information as to the manner in which you make up lists of persons to whom are sent the circular invitations to tender.

I do not find that any reply has ever been received to the two letters mentioned.

Please take up this matter at an early date. My report is now in course of publication.

I am, sir, your obedient servant,

The Gen. Mgr. Govt. Rys., Moncton, N.B. J. L. McDOUGALL, *A.G.*

Intercolonial Ry.: Kingston Locomotive Works.

AUDIT OFFICE, OTTAWA, January 11, 1905.

SIR,—Let me call your attention to the Order in Council of December 7, 1904, giving authority for contracting with the Kingston Locomotive Works for twenty-five locomotives as follows:—

Passenger engines, Pacific type, 12 at $23,950	$287,400 00
Freight engines, 10 at $20,300	203,000 00
Shunting engines, 3 at $17,500	52,500 00
	$542,900 00

Please inform me as to any prices which were obtained from other locomotive works, such as the Montreal factory or those in the United States, or any other knowledge as to prices.

In the absence of public competition your locomotive-expert should certify 'prices fair and just.'

The two vouchers now in hand, for $108,117.60 and $30,240, will be passed in the meantime, as they are only progress estimates for materials. I would prefer to have full information before additional payment is made.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

MOTIVE POWER DEPT., MONCTON, N.B., January 24, 1905.

DEAR SIR,—Returning departmental papers No. 75874 in regard to the twenty-five locomotives that have been ordered from the Canadian Locomotive Company for this railway, I would state that no competitive prices were received, but they were based on previous figures covering cost of locomotives.

Yours truly,

G. R. JOUGHINS,
Sup't Motive Power.

D. POTTINGER, Esq.,
General Manager,
Moncton.

AUDIT OFFICE, OTTAWA, February 4, 1905.

SIR,—Let me acknowledge receipt of your 76129 of February 1, inclosing letters from Messrs. Pottinger and Joughins, wherein it is stated that no competitive prices were received for the 25 locomotives in question, but that the prices were based on previous figures covering the cost of locomotives.

I would like to be supplied with details of the calculations connecting the two sets of figures. These calculations will of course take into account any rise or fall in the prices of construction materials.

Have you on record any opinions from railway experts, as to the comparative efficiency of Kingston and American locomotives of the same cost?

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, February 23, 1905.

SIR,—I beg to call your attention to my letter of February 4, 1905, which reads as follows:—'Let me acknowledge receipt of your 76129 of February 1, inclosing letters from Messrs. Pottinger and Joughins, wherein it is stated that no competitive prices were received for the 25 locomotives in question, but that the prices were based on previous figures covering the cost of locomotives. I would like to be supplied with details of the calculations connecting the two sets of figures. These calculations will of course take into account any rise or fall in the prices of construction materials. Have you on record any opinions from railway experts, as to the comparative efficiency of Kingston and American locomotives of the same cost?'

No answer has yet been received to this letter. Please have the subject taken up at an early date.

Mr. Pottinger has just sent in two final vouchers in favour of the Canadian Locomotive Company, for audit before payment, namely:—3 Consolidation Loco. Engines at $20,300 each, $60,900; and 3 six-wheel switching locomotives at $17,500 each, $52,500.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

MOTIVE POWER DEPT., MONCTON, N.B., Feb. 22, 1905.

DEAR SIR,—Returning departmental papers 76258 relative to 25 locomotives that have been ordered from the Kingston Locomotive Company, and giving the further information asked for by the Auditor General in regard to the price of them. The locomotives previously purchased from the Canadian Locomotive Company cost $20,270. A contract was made with the same company, June 7, 1904, for 22 engines of the same style and weight as the ones above referred to at a price of $1,000 less, viz.: $19,270, the lower price being to cover the reduced cost of material.

It was afterwards considered that the class of engine that we were buying hitherto should properly be made larger and heavier, and the increase in price was made in accordance with the increased weight and the cost of some special material not applied to the other locomotives. The tenders were increased from 3,500 gallons capacity to 5,000 gallons, involving extra material amounting to 10,000 pounds. The passenger engines were made very much heavier and altered throughout.

Attached is a statement of details of calculation covering cost of these locomotives.

Opinions from railway experts as to the comparative efficiency of Canadian and American locomotives at the same cost were not obtained, but the last lot of locomotives received from the Kingston Company compare favourably with those of American manufacture.

Yours truly,

G. R. JOUGHINS, *Supt. Motive Power.*

D. POTTINGER, Esq., General Manager, Moncton.

Passenger Engines.

Light weight of ten-wheeled passenger engine and tender, same as has been supplied, 175,800 lbs.

Price as per contract, $19,270.00 equal to 10.96c. per lb.

Light weight of proposed Pacific type engine and tender, 216,500 lbs. at 10.96c. per lb.	$23,728 00
Extra for Westinghouse engine truck brake	30 00
For fitting up headlight	15 00
Extra for Taylor staybolt iron	177 00
	$23,950 00

Freight Engines.

Price as per contract	$19,270 00
Extra for	
Applying Elvin grease cellars	10 00
Bell ringer	10 14
Safety valves, McAvity make	49 86
Two 9½-inch air pumps instead of one 11-inch	110 00
Brake-slack adjuster	10 00
Straight air brake attachment	30 00
Extra piping	50 00
Increased size of tender, extra weight of material 10,000 lbs.	760 00
	$20,300 00

MOTIVE POWER DEPT., MONCTON, N.B., February 27 1905.

DEAR SIR,—Referring to your telegram of even date, I beg to certify that the freight locomotives delivered by the Canadian Locomotive Co., this winter, are satisfactory and fully equal in every way to those which we purchased from the United States some years ago of the some size and at about the same price delivered in Montreal, duty paid. We have not yet received any of the passenger engines now on order.

Yours truly,,

G. R. JOUGHINS,

Sup't. Motive Power.

D POTTINGER, Esq.,
General Manager, Moncton.

AUDIT OFFICE, OTTAWA, March 15, 1905.

SIR,—Let me acknowledge receipt of the correspondence relating to your contract with the Kingston Locomotive Works, for the building of 25 locomotives.

Your attention is called to section 11 of the Railways and Canals Act (shown at page A-8 of my report for 1903-04) namely : 'The minister shall invite tenders, by public advertisement, for the execution of all works, except in cases of pressing emergency, in which delay would be injurious to the public interest; or in which, from the nature of the work, it can be more expeditiously and economically executed by the officers and servants of the minister.'

From the correspondence, the price for the present order of 25 locomotives appears to have been based on the price for a previous order, by allowing for changed plans and additions. This does not satisfy the wording of the section of the Act which is quoted above.

It may be that you can make an explicit certificate that 'Delay would be injurious to the public interest.' Otherwise, I regret my inability to pass the vouchers as they now stand.

I am, sir, your obedient servant,

The Gen. Mgr. Gov. Railways, Ottawa. J. L. McDOUGALL, *A.G.*

OTTAWA, April 5, 1905.

DEAR SIR,—With reference to the interview that Mr. Harty and yourself had with me this morning about the engine contract with the Canadian Locomotive Company. That company has a contract for 25 locomotives for the Intercolonial; three of these are switching engines at $17,500 each, ten are consolidation freight engines at $20,300 each, and 12 are heavy passenger engines of the Pacific type at $23,950 each.

Of these the three switching engines were received some time ago, and you have a voucher now in your office for them. Of the ten freight engines three have been paid for, and you have in your office a voucher sent to you a few days ago for three others. The other four freight engines have been delivered to the Intercolonial and are now at work on the line, but they are not yet ready to be paid for, as one clause of the specification in the contract provides that each locomotive must run a trial mileage of 2,000 miles in actual service before it can be finally accepted and paid for. An amount of $123,000 has been audited and paid on account of the twelve passenger engines. One or two of the passenger engines have also been received recently

The price of the locomotives was arrived at by the railway department in accordance with the memorandum that is inclosed in file No. 2714—$19,290 each. This is the price mentioned in the Order in Council dated June 6, 1904. This price was for locomotives built according to the same specification as the previous lot of 25 locomotives built by the same company for the Intercolonial. In the meantime the Minister had re-employed Mr. G. R. Joughins as superintendent of motive power, and Mr. Joughins wished to increase the weight of the engines, and to introduce various improvements in their construction. These were considered and authorized by the Minister and are explained in detail in a letter of Mr. Joughins dated October 17, 1904, addressed to me, which is in file No. 2714; and the increased prices, due to the increased weight and improved construction, were authorized by the Order in Council of December 7, 1904, a copy of which is in the file.

Yours truly,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

AUDIT OFFICE, OTTAWA, April 12, 1905.

SIR,—Let me acknowledge receipt of the correspondence relating to the Canadian Locomotive Company, as asked for by me over the telephone.

In Mr. Harty's letter of December 7, 1903, I notice the following paragraph: 'The price at which we had contracted to furnish the locomotives covered by contract of June 16, 1902, was $20,270, which was arrived at by the Minister obtaining prices from all other leading builders; and he gave the contract to us at the above price, which was $500 less per engine than they could have been laid down for if purchased from the lowest competing bidder.'

I would like to have from the department, full information as to the proceedings in 1902, which Mr. Harty describes : including a list of the companies invited to tender, and a copy of the circular and specification as sent out. This report should be made by the officer who was in charge of the transaction, if he is still in the service.

I am, sir, your obedient servant,

The Deputy Minister Railways and Canals. J. L. McDOUGALL, *A.G.*

KINGSTON, ONT., December 7,1904.

DEAR MR. FIELDING,—Confirming my conversation with you of the 4th inst. I beg to state as follows :—

In June, 1902, we entered into a contract with the Department of Railways and Canals to furnish twenty-five simple consolidation locomotives.

Subsequently, we learned that Mr. Muhlfield, Superintendent of Motive Power of the Intercolonial Railway had made a report to the department stating that the railway immediately required—in addition to the twenty-five engines on contract—at least, forty-five more, and I applied to the Hon. Mr. Blair to increase our contract by that number. He replied that he could not approve of asking parliament for an appropriation for forty-five locomotives at one time, but that an additional twenty-five was as much he would care to ask for, and that he would be disposed to increase the existing contract, or give me a new contract for that number, provided that such would meet with the approval of some of the other members of the government.

The price at which we had contracted to furnish the locomotives covered by contract of *June 16, 1902, was $20,270, which was arrived at by the minister obtaining prices from all other leading builders, and he gave the contract to us at the above price, which was $500 less per engine than they could have been laid down for if purchased from the lowest competing bidder.

In accordance with Mr. Blair's suggestion, a meeting was arranged at which were present the Rt. Hon. Sir R. J. Cartwright, Sir William Mulock, Hon. Mr. Blair and the writer. Sir Richard and Sir William Mulock took the position that the order should not be increased unless some consideration was given the government for such increase, as in their opinion the price might possibly be lower by the time the order was completed. To meet this objection, and after considerable exchange of views, I agreed to reduce the price by one thousand dollars, for an additional order of twenty-five locomotives, whereupon, all three ministers present agreed, and Mr. Blair undertook to give the contract to my company. I have no doubt that the formal contract confirming Mr. Blair's undertaking would have been immediately made out and executed, were it not that Mr. Muhlfield was at that time urging upon the department to make certain changes in the engines, and while the matter was in abeyance it was impossible to draw a binding specification to be attached to the contract. Mr. Muhlfield proposed to change the specification not only on the twenty-five engines which the minister promised us, but also on the twenty-five for which we had contract. In confirmation of this I beg to quote from a letter of Mr. Pottinger's addressed to me and dated November 4, 1902, as follows :—

'In regard to the 20 consolidation freight locomotives for which a price was arranged a considerable time ago, and for which a contract was drafted, which contract has not been executed by your company, because Mr. Muhlfield desired to introduce a number of changes increasing the cost of the engine, I have looked over all the papers and I have read the memorandum that Mr. Tandy delivered to Mr. Aird on October 24, and I have come to the conclusion that as we are in need of these engines, and as you have all the material on hand to complete them in a manner similar to the simple consolidation freight engines that you built for us before, that it would be better for all concerned if you went forward and completed these twenty engines on this basis, as I presume this will enable you to deliver these engines quicker to us, and there will be no complication in regard to prices.'

You can see from the above that Mr. Muhlfield's proposed changes were never approved, but their consideration resulted in delaying the preparation and execution of the contract. You will doubtless admit that this delay was one for which neither I nor my company was in any way responsible; that it was occasioned simply by the then Superintendent of Motive Power endeavouring to force the adoption of certain radical changes upon the management of the railway, and I most respectfully submit

that we should not now be penalized because of the action of an official of the Intercolonial Railway who is no longer in its employ.

We, relying on the good faith of the government, and having no question but that a duly executed contract would follow in due course, announced that we had received an order from the government for twenty-five additional engines, and regarding it as an obligation both upon the part of the government and upon our part, we subsquently refused to contract with the Canadian Pacific Railway to build twenty engines for them, as we believed by doing so it would prevent us making sufficiently prompt delivery to the government of the twenty-five engines promised us by Mr. Blair.

The matter has now become one of extreme urgency and importance to us, as we expect to complete all the orders now upon our books by May 1, or earlier, and as a great deal of the work on these orders has already been completed, we will probably have to begin laying off our force within two or three weeks from this date, unless we receive additional work. You can readily understand that we shrink very much from having to discharge men in mid-winter.

I trust that, on consideration of these facts, you will agree with me that this undertaking, entered into in good faith between Mr. Blair, representing the government, and myself, representing my company, should be carried out in good faith; as a failure upon the part of the government to carry it out would inflict upon us and our employees a very grevious loss and hardship.

Yours faithfully,

Hon. W. S. Fielding, Wm. HARTY.

Acting Minister of Rys. and Canals, Ottawa.

Audit Office, Ottawa, May 22, 1905.

Sir,—Let me acknowledge receipt of two progress estimates in favour of the Canadian Locomotive Company, on account of twelve passenger engines, as follows:—

Estimate No. 2	$55,936 64
Estimate No. 3	47,478 48

In a previous letter, I asked for information concerning the manner of letting this contract. Not having yet heard from you, I am obliged to hold the present estimates in the meantime.

I am, sir, your obedient servant,

The Gen. Mgr., Govt. Rys., Moncton, N.B. J. L. McDOUGALL, *A.G.*

Moncton, N.B., May 19, 1905.

Sir, —Referring to your telegram of May 4, in regard to Mr. Harty's request about the contract for 25 locomotives, and your telegram of the 16th, I cannot find among our records here any document relating to the last contract with the Canadian Locomotive Company for 25 locomotives, excepting copies of the Order in Council; and I do not know anything about the transactions which led to the making of that contract excepting as they are shown in the file of papers belonging to the department in Ottawa, which I have looked over, and which file of papers was sent by me to the Auditor General for his perusal.

In searching our papers in regard to this matter, I found among Mr. Russell's papers a copy of a letter he addressed to the Honourable Mr. Blair on September 20, 1901, with regard to his visit to the United States, according to Mr. Blair's instructions, to inquire into the price of locomotives at that time, and I send you a copy of this letter. It may be of use in connection with this question of locomotive contracts, and there is no copy of it in the Ottawa file as far as I remember.

I am, sir, your obedient servant,

The Secretary, Railways and Canals, Ottawa. D. POTTINGER, *Gen. Mgr.*

MONCTON, N.B., September 20, 1901.

DEAR SIR,—As per your instructions to go to New York and ascertain what a locomotive of the class we required for the operation of the Intercolonial could be purchased at, I did as directed, and beg to report to you, as follows:—

I called at the general offices of the American Locomotive Company, met Mr. Seigue there, one of their important representatives, and the only man in at the time who could give me information on the subject. I told him we were in the market for a locomotive that would handle 1,200 tons over a 1 per cent grade, that it would want to be of the consolidated type, an up-to-date locomotive, first-class in every respect, and asked him if he would make me a price upon it. He left his office, presumably to get the necessary information, and upon returning questioned me very closely on what we wanted, and then gave me a price of $15,500 per engine. I asked him if he would make any reduction in case we placed an order for 20. He replied that possibly there would be a reduction of $200 per engine. Later on in our conversation, he cancelled this and stated that we had better let the figures stand at $15,500. I then proceeded to find out what this engine would probably cost us delivered on our own rails, in order to add to the $15,500. I incidentally learned, although I am not positive, that the American government would allow them $1,500 rebate for some reason that I am not thoroughly posted upon, and could not get posted upon in the limited time:—

Locomotive	$15,500
Duty on same, 33 per cent	5,166
Freight to our line	250
Rebate	1,500
Making a total of	$22,416

I assume that if the government did not give this rebate of $1,500 on engines exported from the United States, that we would have to pay $17,000 for this $15,500 engine; then if it is the wish of the government in order to foster home industry that they give works in this country the benefit of the duty, there would be added to that amount $5,166; and inasmuch as the locomotive company did not say anything about making delivery in Montreal, I assume that we would have to pay the freight, $250, making a total of $22,416 per engine.

I believe that our relations with the Canadian Locomotive Works are so good that they will be very largely governed by the recommendations of our new superintendent of machinery. Therefore I have no hesitation in believing that for what we could give them of the knowledge of our superintendent of machinery, he could in return get from them excellent work, better work than we would be prepared to get from many of the shops (not all of them however) of the American Locomotive Company, because I think some of their shops cannot be beaten in the world.

In our conversation I understood you to say that there were 20 locomotives that had been promised, and you were prepared to place an order for 20 or 25 more. I would strongly recommend making the order for 45 engines; we will probably build 5 engines on operation; that will make 50, which should put us in pretty good shape, and I have no hesitation, if the department desires to consider the United States rebate and the Canadian duty and the freight in favour of the Canadian Locomotive Works, to recommend a price of $21,000 per engine, provided the Canadian Locomotive Works will agree that our new superintendent of machinery shall go over all the specifications, and that the new 45 engines shall be built on his specification, under his instructions and subject to his inspection.

Yours very respectfully,

The Auditor General. E. G. RUSSELL, *Mgr.*

NOTE.—This letter was accepted by the Auditor General as satisfactory. May 27, 1905.

MONCTON, N.B., May 25, 1905.

DEAR SIR,—I have your letter dated May 22, with regard to payments to the Canadian Locomotive Company.

You wrote me on March 15 on the subject, and I sent that letter on the 16th to Mr. Schreiber, the Deputy Minister. I also sent over to you at your request, the whole file of papers that were in the railway department in Ottawa, in connection with these locomotives. Subsequently, on April 5, you saw me at Ottawa, and Mr. Harty was with you, and the matter was gone over again, and I wrote you on April 5, after that interview. Subsequent to this, on my return to Moncton, I had the office papers searched to see if there was any record of a report from Mr. Russell of the visit that he made to the United States on the instructions of Mr. Blair, and the letter was found and I sent a copy of it to the secretary of the department on May 19. The letter in question is dated September 20, 1901.

I cannot find among our records here any other document relating to the contract with the Canadian Locomotive Company for 25 locomotives, excepting copies of the Orders in Council, and I do not know anything about the transactions which led to the making of that contract excepting as far as they are shown in the file of papers belonging to the department in Ottawa, which I have looked over, and which file of papers was sent to you by me for your perusal.

Yours truly,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

Intercolonial Ry.: Steel Rails.

AUDIT OFFICE, OTTAWA, July 17, 1905.

SIR,—In further discussion of the account of the Algoma Steel Company for steel rails delivered for Intercolonial Railway at the following places:

10,000 tons at $29.15: O.C. May 31, 1905.
10,000 tons at $31.50: O.C. May 31, 1905.

With interest at 5 per cent on unpaid balances.

The Orders in Council explain that these prices were arrived at by taking English quotations at certain dates, and adding duty and freight thereto, to obtain Montreal prices to offer to the Algoma Steel Company.

The only favours which we can extend to a Canadian rail company are those fixed by parliament, namely the bounty on pig iron, that on steel ingots, and the bounty on steel rails, if the latter is proved ultimately to be legal. When these are paid, the manufacturers have to take care of themselves in all further competition.

Now the $29.15 and $31.50 include, beside current English rates and freight, an item of $5.20 for duty. Had we paid $29.15 for English rails delivered in Montreal, we would have received $5.20 into our revenue pocket, which we do not get by dealing with Algoma. The net cost of English rails would therefore be $23.95, and this is the only sum which I am prepared in the meantime to recognize in auditing the first delivery; similarly $26.30 for the second delivery.

If you conclude to maintain the full claim as it stands at present, please divide the application into four parts, namely:

10,000 tons at $23.95, and 10,000 at $26.30.
(Balance unpaid) 20,000 tons at $5.20.
Balance of interest on the first application.
Interest on the second application (that for $5.20 a ton).

I would like to know whether the Justice Department was consulted as to the legality or necessity of paying interest on overdue balances. Please send me a copy of their opinion.

I am, sir, your obedient servant,

Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, August 9, 1905.

SIR,—In connection with your applications (still on file in this office) for payment of balances to the Algoma Steel Company for 10,000 tons of steel rails at $29.15, and 10,800 tons at $31.50, supplied under contracts of September 20 and October 21, 1904, respectively: I have reviewed the correspondence between your department and my predecessor, Mr. McDougall, and have given the subject careful thought, as demanded by the magnitude of the figures.

Prices as arranged by Order in Council.

The original arrangement with the Algoma Steel Company was, to pay them the same price as English rails would cost, delivered in Montreal with all charges paid, including $5.23 duty.

Subsequent Orders in Council described the department's efforts to ascertain the current English prices, and went on to fix payment at $29.15 and $31.50 for the two deliveries, $5.23 duty being included in each of these amounts.

Objections raised in letter of July 17, 1905.

The late Auditor General held that these prices should be reduced by $5.23, as an English purchase would have produced $5.23 revenue per ton as an offset.

Mr. McDougall thought the Steel Bounty Act prescribed all the consideration that can be shown to a Canadian rail factory, and that parliament must have intended the bounty (of $6 a ton) to replace any arrangement which might legally have been made in the rail factory's favour before the Bounty Act was passed. He, therefore, subtracted the $5.23 duty on English rails, from the price as established by Council.

The object of the bounty (to be given to any Canadian rail factory) was to encourage the manufacture of steel rails in Canada; and the interpretation given above might render the bounty ineffective, by merely substituting one assistance for another equally valuable.

It appears to me more probable that the bounty was given as an addition to previous facilities; and that it is therefore not to be treated as a factor in the present discussion.

Only Canadian competition invited.

Your letter of June 13, 1905, states that the Dominion Iron and Steel Company and the Algoma Steel Company, both Canadian firms, were the only ones invited to tender for the rails in question. Had there been other Canadian factories, it is presumed that invitations would have been sent to them.

The government of course had a right to make any specification, and the offer was probably open to any person who could comply with its requirements. It is true that there was only one Canadian factory which could tender for early delivery; and the practical result was, that by its specification the government was aiding the Algoma Steel Company to establish its business in Canada—such aid being $5.23 a ton, the amount of duty on English rails.

But it appears to me that this question, by itself, is a matter of policy, with which the Auditor General is not concerned, except in reporting the expenditure fully to parliament.

For greater security, however, I would like you to obtain an opinion from the Department of Justice, that the Minister of Railways and Canals had power to make the contracts in their present terms. Upon receipt of such an opinion, I will pass the certificates without further delay.

Similarly with the third contract, for 10,000 tons at $33.

Another difficulty re Public Call for Tenders.

Section 11 of the Railways and Canals Act (page A—8 of 1903-4 Auditor General Report) reads as follows: 'The minister shall invite tenders by public advertisement,

for the execution of all works', except in two cases not here of interest. Further, by section 12, 'In all cases where it seems to the minister not to be expedient to let such work to the lowest tenderer, he shall report the same and obtain the authority of the Governor in Council before passing by such lowest tender.'

It is held by some that the expression 'works' in section 11 is to be construed literally, and that the restriction of public advertisement is not imposed on purchases of moveable supplies or commodities, no matter how large their value. Mr. Aylesworth gave an opinion in this sense, at page W—349 of the report of 1903-4.

While this may be the letter of the law, it does not appear to me to be its spirit. No reason suggests itself for making the arbitrary distinction between Works and Supplies: for advertising the one, and not advertising the other. The object of this section of the Act being Economy, its natural field of action must be that in which Economy would have its greatest effect, that is to say, in large purchases, whether Works or Supplies: the necessity for Advertising being fixed by the magnitude of the transaction, independently of all other extraneous circumstances. This view is supported by a recent amendment to the Public Works Act, giving greater departmental latitude in transactions under $5,000, and this limit was also recognized by a previous Order in Council in both departments.

If the government is in accord with this latter opinion, it would be well to have a clearer definition made in the sections of the Acts which treat of this subject, when Parliament meets again, to show that the magnitude of a transaction is the main criterion of the necessity for public advertisement.

Effects of unrestricted competition.

If the rail-purchase had been considered as coming under the Advertising Clause, the specification could have been submitted to all rail-manufacturers, Canadian, English and American; and authoritative foreign prices would thus have been obtained at first hand, for comparison with Canadian rates.

Had the lowest not been Canadian, the same policy could still have been followed if thought expedient, and the Algoma Steel Company chosen, (in strict accordance with law), by obtaining a special Order in Council, as provided in Section 12, quoted above.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. FRASER, *A.G.*

JUSTICE DEPT., OTTAWA, August 12, 1905.

SIR,—I have the honour to acknowledge receipt of your letter of this day's date with respect to the claim of the Algoma Steel Company to payment for steel rails furnished to the Intercolonial Railway under the contracts of September 30, 1904, and October 3, 1904.

At the suggestion of Mr. Fraser, the Auditor General, you submit the case to this department for advice as to whether the Minister of Railways had power to enter into these contracts in their present terms with regard to the price to be paid, which terms are set out in your letter.

The late Auditor General, Mr. McDougall, took the objection to these terms, that the Steel Bounty Act prescribes all the consideration that can be shown to a Canadian rail factory; and that Parliament must have intended the bounty of six dollars a ton on rails to replace any arrangement which might legally have been made in the rail factory's favour before the Bounty Act was passed. He, therefore, subtracted the $5.23 duty on English rails from the contract price.

I concur in the view suggested by Mr. Fraser that the bounty given by Parliament is not a factor to be considered in connection with this question, and I am of

opinion that the circumstance that in fixing the price the amount of the customs duty was to be added to the market price does not invalidate the contract. Notwithstanding the Bounty Act, which, as I have stated, I do not consider to be an element in the discussion, the minister had a right to make the contract in these terms.

I do not understand that any opinion is asked as to the necessity for advertisement for tenders. Papers returned herewith.

I am, sir, your obedient servant,

The Secretary, Rys. and Canals. A. POWER, *Acting D.M.J.*

P.E.I. Ry.: Interest on Land-purchases.

AUDIT OFFICE, OTTAWA, May 4, 1905.

SIR,—Let me acknowledge receipt, for audit before payment, of 27 vouchers for land taken for extension from Murray River to Murray Harbour, as follows:—

37·6 acres, at average of $205.52..	$7,727 45
5 per cent interest, April 1, 1904, to January 31, 1905..	323 77

Please inform me as to your general rules for allowing interest. They are, I hope, of universal applicability, leaving to the departmental officers no power of discriminating between one creditor and another.

Have you had an opinion from the Justice Department that interest either may or should be paid in similar circumstances?

The vouchers are held in the meantime, pending the present discussion.

I am, sir, your obedient servant,

The Gen. Mgr. Govt. Rys., Moncton, N.B. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, June 12, 1905.

SIR,—Let me call you attention to my letter of May 4, 1905, concerning 27 vouchers for land taken for extension to Murray Harbour, being $7,727.45 for 37·6 acres purchased, and $323.77 for 5 per cent interest between April 1, 1904, and January 31, 1905.

My letter went on to say. 'Please inform me as to your general rules for allowing interest. They are, I hope, of universal applicability, leading to the departmental officers no power of discriminating between one creditor and another. Have you had an opinion from the Justice Department, that interest either may or should be paid in similar circumstances?'

I would like to know what progress you have made in the preparation of an answer to the letter above quoted.

As mentioned previously, the vouchers are all held in the meantime. Also two later arrivals, namely: David Murdoch, $408 + $17.10; and Robt. Saunders, $328.70 + $13.77.

I am, sir, your obedient servant,

The Gen. Man. Govt. Rys., Moncton, N.B. J. L. McDOUGALL, *A.G.*

MONCTON, N.B., June 16, 1905.

DEAR SIR,—I have your letter dated June 12, with further reference to the payment of interest on land taken for the Murray Harbour branch. On receiving your letter of May 4 on the subject I wrote to the department at Ottawa to ascertain whether there was any general rule in regard to the payment of interest, as I was not aware that any opinion had been procured from the Department of Justice in regard to such payments, and I have not yet received an answer.

The custom that has been followed in regard to the payment of interest is that it is only paid when instructions are received to pay it; these instructions are sometimes from the Railway Department at Ottawa, sometimes by an Order in Council and sometimes by an order of a Court of Law.

I have taken the matter up with our Chief Engineer and he informs me that on all the judgments of the Exchequer Court in connection with the Murray Harbour branch that interest was allowed by the court and that he took it for granted that interest would be allowed on the other purchases of land for that branch, and when the different sums were offered to the owners he offered the owners 5 per cent interest, and he says that in most cases this was accepted.

I inclose you a copy of his letter dated May 30, 1905.

Yours truly,

The Auditor General. D. POTTINGER, *G.M.*

CHARLOTTETOWN, May 30, 1905.

The General Manager, Moncton, N.B.

DEAR SIR,—Replying to your letter of the 22nd instant, regarding interest allowed on payments for land between Murray River and Murray Harbour, I have to say that it has been customary to pay interest where a considerable time elapsed between the taking of the land and the payment. Interest was paid at St. John; on the Rivière Ouelle branch, and on all the Exchequer Court cases on the Murray Harbour branch and elsewhere.

There were no instructions regarding interest on the extension from Murray River to Murray Harbour. I took it for granted that the usual custom would be followed, and when the different sums were offered 5 per cent interest was offered by me, and, in most cases, accepted by the land owners.

Valuations are now being made on the Montague branch and the Vernon River branch; and when the time comes for making the offers, if interest is not to be allowed, I would thank you to instruct me accordingly.

Yours truly,

W. B. McKENZIE, *Chf. Eng.*

AUDIT OFFICE, OTTAWA, June 19, 1905.

SIR,—Let me acknowledge receipt of your D—58237 of June 16, concerning intesest on land purchased for the Murray Harbour extension.

I find therein sufficient information to release the vouchers which started this phase of the discussion.

It would be preferable, however, to have general rules formulated, whereby the awarding or withholding of interest would become automatic, and independent of departmental discretion.

Please continue to exert your efforts in this direction.

I should like to hear from you in reply, giving methods of doing this.

I am, sir, your obedient servant,

The Gen. Mgr. Govt. Rys., Moncton, N.B. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, June 28, 1905.

SIR,—I have to acknowledge the receipt of your communication of the 13th instant, with which you transmit a copy of a letter addressed to you by the Auditor General, relative to the payment of interest in cases of land taken for the Murray Harbour Branch of the Prince Edward Island Railway, in which he asks whether an

opinion has been obtained from the Department of Justice that interest either may or should be paid in similar cases; you ask for instructions in the matter.

In reply, I am directed to say that, on advice received from the said department, the minister has decided that interest at the rate of 4 per cent is to be allowed in such cases from the date of expropriation.

I am, sir, your obedient servant,

The Gen. Mgr. Gov. Rys., Moncton, N.B. L. K. JONES, *Secy.*

AUDIT OFFICE, OTTAWA, July 6, 1905.

SIR,—I have received from Mr. Pottinger a copy of your 78224 of June 28, stating that interest was allowed on Murray harbour land purchases on advice received from the Department of Justice.

Please let me have copies of the correspondence with the Justice Department referred to in your letter.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, July 12, 1905.

SIR,—Referring to your letter of May 4 last, addressed to the General Manager of Government Railways, relative to certain vouchers (27 in all) for lands taken for the extension of the Prince Edward Island Railway from Murray river to Murray harbour, which you are holding, pending a discussion of the question as to whether the interest included in such vouchers should be paid, I have the honour, by direction, to say that on reference of your communication to the Department of Justice for their opinion on the point, as suggested by you, they replied, under date the 20th ultimo, advising that, although there is no legal liability, it seems only proper and reasonable that, where a considerable delay occurs in paying the compensation, interest should be allowed from the date of the expropriation to the date of payment. They added that this is a matter for the department to consider and decide on.

The minister has decided, accordingly, on this advice, to allow interest at 4 per cent on the amounts to be paid for the lands in question, and the general manager has been so informed.

I send you a copy of the letter of the Department of Justice, and it is trusted that there will be no further delay in passing these vouchers, as their non-payment is causing considerable discontent.

I am, sir, your obedient servant,

The Auditor General. L. K. JONES, *Secretary.*

JUSTICE DEPT., OTTAWA, June 20, 1905.

Murray Harbour Branch Railway.

SIR,—I have the honour to acknowledge the receipt of your letter of the 16th instant, 111362/3751, submitting for an opinion a letter from the Auditor General with respect to the interest allowed on compensation to the owners of lands taken for the above railway. In the absence of any agreement as to the payment of interest, the Crown is not liable to pay the same. I may add, however, that where the amount of compensation is left to the determination of the Exchequer Court the invariable practice of the court is to allow interest on the award from the date of expropriation to the date of the delivery of the judgment. Although there is no legal liability, it seems only proper and reasonable that where a considerable delay occurs in paying the com-

pensation, interest should be allowed from the date of the expropriation till the date of payment. This, however, is a matter for the department to consider and decide. I presume the compensation agreed upon in such cases is the value of the land at the time of expropriation, and it seems unreasonable not to pay interest where long delay occurs before a cheque is issued for the compensation.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. E. L. NEWCOMBE, *D.M.J.*

AUDIT OFFICE, OTTAWA, July 17, 1905.

SIR,—Let me acknowledge receipt of your letter of July 12 (referring to mine of May 4), on the subject of delayed payments for land on the Murray harbour branch of the P. E. I. Ry.

You inclose an opinion from the Justice Department, that it is proper and reasonable to pay interest between expropriation and settlement, and that it is a matter for the department to consider and decide; and you say 'The minister has decided accordingly on this advice to allow interest at 4 per cent on the amounts to be paid for the lands in question, and the general manager has been so informed. It is trusted that there will be no further delay in passing these vouchers, as their non-payment is causing considerable discontent.'

The vouchers in question were certified and forwarded to Mr. Pottinger on June 19, after receipt of the necessary information from him at that time. Please explain to the discontented creditors that the delay is elsewhere than in this office.

We do not appear yet to have obtained the result asked for in my letter of June 19 to Mr. Pottinger, namely: 'It would be preferable to have general rules formulated whereby the awarding or withholding of interest would become automatic, and independent of departmental discretion.'

I would like to have your co-operation in endeavouring to reach this end.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

P.E.I. Ry.: Hillsboro Bridge; Spikes paid as Extra.

AUDIT OFFICE, OTTAWA, March 28, 1905.

SIR,—Let me acknowledge receipt, for audit before payment, of a voucher for $13,844.98 in favour of Mr. M. J. Haney, being estimate No. 37 to March 14, 1905, for substructure of bridge over Hillsboro river at Charlottetown, P.E.I.

Item Outside of Contract.

The 15th line of the voucher reads: 'Pressed and galvanized Spikes, 114,321 lbs. at 12 cents, $13,718.52.' There is no item for this service in the contract-schedule, although spiking is described in the specification.

In a previous similar instance, quoted at page R—307 of my report for 1896-7, Mr. Lash gave an opinion that the prices contained in the schedule to a contract are full payment for all the works described in the specification.

Following Mr. Lash's opinion, in the absence of a spike item in the schedule, the spiking would perhaps be covered by the rates tendered for woodwork in place; but I am not at present convinced that such a ruling would be equitable.

One copy of the voucher is returned herewith, not approved.

I am, sir, your obedient servant,

The Gen. Mgr. Govt. Rys., Moncton, N.B. J. L. McDOUGALL, A.G.

CHIEF ENGINEER'S OFFICE, MONCTON, N.B., April 6, 1905.

DEAR SIR,—Referring to the Auditor General's letter to you dated March 28, I beg to reply as follows :—

Pressed and galvanized spikes.

Pressed and galvanized spikes (being the same class of work) really belong to item 21 of the contract schedule. The spikes were of a special design, necessitated by the hazardous nature of the work, and special dies had to be prepared for their manufacture. The labour required to place them in the work was, if anything, more difficult and costly than for the screw bolts, where the holes in the wood were all bored by machinery in the mill. A hole had to be bored by hand for each spike, located so as to avoid coming into contact with the numerous washers and bolts under the sheathing. Clause 8 of the contract seems to cover this case.

Yours truly,

WM. B. MACKENZIE, *Chief Engineer.*

D. POTTINGER, Esq., General Manager.

AUDIT OFFICE, OTTAWA, April 29, 1905.

SIR,—In further discussion of Mr. Haney's progress-estimate No. 37, for substructure of Hillsboro Bridge, and with special reference to the following item:—

Pressed and galvanized spikes, 114,321 lbs. at 12c.....$13,718.52

In view of there being no spike item in the schedule of prices attached to the contract, I intimated in my letter of March 28, that an objection might be taken under a previous opinion by Mr. Lash, 'that the prices contained in the schedule to a contract are full payment for all the works described in the specification.'

Page 3 of the specification, after describing the timber and lumber, goes on to say: 'Each layer of plank inside and outside shall be spiked with two 6-inch wrought iron spikes to each lineal foot of plank, spikes in outer layer to be galvanized.' The contract schedule gives an item for the lumber price, but none for the spike price. The inference is that the price for the lumber was to cover the cost of fixing it in place, including spikes as well as fitting.

Please let me know whether you have obtained an opinion from the Department of Justice, to the effect that the Engineer can fix a separate price for the spikes.

All the tenderers had an equal opportunity of reading the specification for spiked lumber, and of seeing that only the lumber-in-place was entered in the schedule, with no separate mention of the spiking or of any other minor accessory.

When writing to the Justice Department, if you have not already done so, please send my letter of March 28, containing references to Mr. Lash's opinion.

I am, sir, your obedient servant,

The Gen. Mgr. Govt. Railways. J. L. McDOUGALL, *A.G.*

DEPT. RAILWAYS AND CANALS, OTTAWA, June 7, 1905.

SIR,—I have the honour to ask that your opinion may be given on an objection raised by the Auditor-General to a certain progress estimate made under the contract of Mr. M. J. Haney for the substructure of the Hillsboro river bridge at Charlottetown.

The contract is dated October 8, 1900; it is a schedule contract. The item to which the Auditor takes objection is 'pressed and galvanized spikes, 114,321 lbs. at 12 cents, $13,718.52.' The Auditor takes the ground that there is no spike item in the schedule prices attached to the contract, and in view of an opinion given to him by Mr. Lash, K.C.—'that the prices contained in the schedule to a contract are full payment for all the works described in the specification,' objection might be taken to this item.

On page 2 of the specification, the following provision is made: 'each layer of plank inside and outside shall be spiked with two 6-in. wrought iron spikes to each lineal foot of plank, spikes in outer layer to be galvanized.' He observes that as the contract-schedule gives an item for the lumber price, but none for the spike price, the inference is that the price for the lumber was to cover the cost of fixing it in place, including spikes as well as fitting. Mr. Mackenzie, the Chief Engineer of the Intercolonial Railway, who is controlling the work, has fixed the price at 12 cents per pound for these spikes, and the Auditor desires to know, from you, whether it is in his competence to do so. By a letter dated April 6 last, Mr. Mackenzie explains as follows:—

'Pressed and galvanized spikes (being the same class of work) really belong to item 21 of the contract schedule. The spikes were of a special design, necessitated by the hazardous nature of the work, and special dies had to be prepared for their manufacture. The labour required to place them in the work was, if anything, more difficult and costly than for the screw bolts, where the holes in the wood were all bored by machinery in the mill. A hole had to be bored by hand for each spike, located so as to avoid coming into contact with the numerous washers and bolts under the sheathing. Clause 8 of the contract seems to cover this case.'

Clause 8 of the contract, to which Mr. MacKenzie refers, contains the provision that if it be found that anything has been omitted or misstated in the list or schedule or specification which is necessary for the proper performance and completion of any part of the works, the contractor shall execute the same as though it had been properly described and be paid therefor as for extra work, and in case of dispute as to what work, labour, material, tools and plant are or are not so included, omitted or misstated in said list or schedule, the decision of the engineer shall be final and conclusive.

Clause 1 of the contract defines the word 'engineer' as meaning the 'Chief Engineer for the time being having control over the work.'

I inclose the papers bearing on the matter, together with the contract, and have to ask that you will be pleased to advise on the point raised by the Auditor-General.

I have the honour to be, sir,

Your obedient servant,

The Auditor General. L. K. JONES, *Secretary.*

JUSTICE DEPT., OTTAWA, June 13, 1905.

SIR,—I have the honour to acknowledge the receipt of your letter of the 7th instant—77914—and inclosures, and of the accompanying file of papers relating to the contract of Mr. M. J. Haney for the substructure of the Hillsborough river bridge at Charlottetown.

In reply I beg to state that in my opinion the question whether or not there has been an omission in the list of prices in respect of the pressed and galvanized spikes referred to in your letter is one the decision of which is committed by clause 8 of the contract to the engineer, and under that clause his decision is final and conclusive. The provision of these spikes is necessary for the performance of the works, and there is in the list no price for them, although in the specifications there is the provision which you quote with respect to them. It is for the engineer to decide whether a price should be allowed for them and the contractor paid therefor as for extra work.

I am, sir, your obedient servant,

The Secretary, Railways and Canals. E. L. NEWCOMBE, *D.M.J.*

RAILWAYS AND CANALS DEPT., OTTAWA, June 20, 1905.

SIR,—I have to acknowledge the receipt of your letter of the 13th instant relative to the contract with Mr. M. J. Haney for the substructure of the Hillsborough river bridge at Charlottetown.

In view of my letter to you of the 7th instant not quite accurately setting forth the contents of clause 8 of the said contract, I am instructed to call your attention again more particularly to the wording of that clause in order that there may be no doubt as to your opinion that the engineer has power to decide whether a price should be allowed to the contractor for the spikes in question as for an extra.

The portion of clause 8 to which I am particularly to call your notice, as being inaccurately described, is as follows:—

'But if it be found that anything has been omitted or misstated in said *list or specification* which is necessary for the proper performance and completion of any part of the works included in said *list or schedule.*'

You will observe that in the first part of the sentence the words 'list or specification' are used, and later the words 'list or schedule,' no mention being made of the specification.

It would appear that the only meaning to be obtained from the sentence is that the omission must not only be in the list, but also in the specification, before the engineer has power to act.

I inclose the contract and papers in the case, and am instructed to ask for your further consideration and advice in the matter.

I am, sir, your obedient servant,

The Deputy Minister of Justice. L. K. JONES, *Secretary.*

JUSTICE DEPT., OTTAWA, June 22, 1905.

SIR,—I have the honour to acknowledge the receipt of your letter of the 20th instant, and in reply beg to state that I do not understand your suggestion as to the meaning of clause 8. It appears to me that under the language of that clause, as quoted by you, if there is an omission in either the list of prices or the specification of anything which is necessary for the proper performance and completion of any part of the works included in the list, a case arises for the consideration of the chief engineer under the clause. There was here an omission in the list of prices for the spikes; the spikes were necessary for the proper performance and completion of the planking. It is for the engineer to decide in the first place whether the planking is included in the list or schedule, and in the second place whether there should have been in the list of prices an item with respect to the spikes.

I am, sir, your obedient servant,

The Secretary, Railways and Canals. A. POWER *Acting D.M.J.*

RAILWAYS AND CANALS DEPT., OTTAWA, June 30, 1905.

SIR,—Referring to the letter addressed by you on the 28th of April last to the General Manager of Government Railways with reference to the item of Mr. Haney's Progress Estimate, No. 37, under his contract for the substructure of the Hillsborough river bridge on the Murray harbour branch of the Prince Edward Island Railway, namely 'pressed and galvanized spikes 114,321 pounds, $13,718.52', which price has been fixed by the Chief Engineer of the railway in the absence of a spike item in the schedule of prices attached to the contract: in which letter you ask whether an opinion has been obtained from the Department of Justice to the effect that the Chief Engineer can fix a separate price for the spikes: I have the honour, by direction, to say that the matter has been submitted to the Department of Justice, who have advised, under date the 13th instant, that 'the provision of these spikes is necessary for the performance of the works, and there is in the list no price for them, although in the specifications there is the provision which you quote with respect to them, it is for the Chief Engineer to decide whether a price should be allowed for them, and the contractor paid there-

for as for extra work.' In a further communication, they have advised, under date the 22nd instant, practically repeating their former opinion.

I inclose herewith copies of the correspondence had with the Department of Justice in the matter.

I am, sir, your obedient servant,

The Auditor General. L. K. JONES, *Secretary.*

Railway Subsidies: Lindsay, Bobcaygeon and Pontepool Ry.

AUDIT OFFICE, OTTAWA, April 26, 1905.

SIR,—In further discussion of the subsidy to the Lindsay, Bobcaygeon and Pontepool Railway, and with reference this time to your opinion about the powers possessed by the Governor in Council.

I do not think that Parliament would give to the Executive a discretion to allow an item to one railway which it would refuse to another railway.

The Executive's scope must surely be limited to the interpretation of the Subsidy Act in general terms from time to time; and an apparently wrong interpretation may therefore be commented on by an auditor, and a reconsideration asked.

Please let me know whether these views agree with yours; or whether you interpret the prerogative of council as including arbitrary allowances, not regulated by consistent general principles.

Then it should be recollected that under our system ministers collectively in council are not provided with the means of determining details with accuracy, and necessarily have too many important general principles to investigate to permit on their part a devotion of much time to details. An auditor who has had much experience naturally finds it extremely unpleasant to see accounts go to those who are not likely to bring to bear upon them careful industry.

I am, sir, your obedient servant,

Hon. A. B. AYLESWORTH, K.C., Toronto. J. L. McDOUGALL, *A.G.*

TORONTO, April 27, 1905.

Re Lindsay, Bobcaygeon and Pontepool Railway.

DEAR SIR,—I have your letter of yesterday as to the powers of the Governor in Council under Subsidy Acts.

My view is that Parliament in passing these statutes recognized the necessity that there should be some tribunal vested with the authority to determine the amount of the actual necessary and reasonable cost of the road upon which the amount of the subsidy was to depend. Parliament was supreme in the matter, but it has delegated the power to determine this question of actual, necessary and reasonable cost to the Governor in Council upon the recommendation of the minister and report of the chief engineer.. Once the Governor in Council upon such recommendation and report has determined the actual cost, my view is that such determination is final for all subsidy purposes, and I would think the duty of the Auditor General's office in the premises was limited to seeing that nothing more was paid than the amount which, in view of such determination as to the actual cost, was under the statute payable.

I would think such determination by the Governor in Council of the amount of the actual cost was for all subsidy purposes final, and that no court or officer would have any right to inquire behind it, or to investigate how the determination was arrived at.

In entrusting such power to the Governor in Council, I would think Parliament assumed the executive never would allow to one railway an item it would refuse to an-

other railway, unless good reason for doing so appeared in some circumstances special to the particular case. It may be that the Governor in Council is not the best tribunal which could have been selected for this work, but it seems to me the language of the statute plainly shows that Parliament has seen fit to entrust that power and duty to the Governor in Council, and Parliament of course is supreme.

I am not suggesting that comment and report to Parliament on the part of the Auditor is not his right, and it may be his duty; but it certainly would seem to me, under the wording of the Subsidy Act, that after the Governor in Council had determined what amount was the actual necessary and reasonable cost of a road, the Auditor has not been given by Parliament any power to question that determination, or to inquire behind it, to ascertain how it was arrived at.

I am, sir, your obedient servant,

The Auditor General. A. B. AYLESWORTH.

AUDIT OFFICE, OTTAWA, May 4, 1905.

SIR,—In further discussion of the subsidy-claim of the Lindsay, Bobcaygeon and Pontepool Railway:—

Legal Services.

The bill of $20,562 from Clark, Bowes & Swabey has been submitted to Hon. A. B. Aylesworth, K.C., of Toronto, who holds that eleven items are connected with right-of-way in Lindsay, and are therefore to be omitted from 'cost of construction.'

These eleven items have been valued by Taxing-Officer Thom at $815.52. Half of this amount should be deducted from the application in favour of the railway. Application and copy of taxation inclosed herewith.

Difference Between Engineer and Accountant.

The total cost, according to Accountant Shannon, was $703,981.94; and the total value, according to Engineer Johnson, is $622,595.07—a difference of $81,386.87.

Mr. Johnson's statement, however, does not include $27,034.05 of legal expenses reckoned in by Mr. Shannon. This would leave the difference $54,352.82.

On other items easily comparable, in the way the two statements are made up, Mr. Shannon shows $111,822.58 for 'rails, bolts and spikes,' while Mr. Johnson's figure is $123,062.51—a difference of $11,239.93 to add to $54,352.82, making $65,592.75.

Also, Mr. Shannon shows $25,352.85 for 'engineering,' while Mr. Johnson values 'engineering and superintendence' at $62,000. If these two items cover approximately the same service, they give a further difference of $36,647.15 to add to $65,592.75, making $102,239.90.

Mr. Shannon's statement of 'expenditure by contractor' shows $31,899.54 for ties; Mr. Johnson estimates 108,332 ties at 35 cents each, or $37,916.20. The difference, $6,016.66, added to $102,239.90, gives a total of $108,256.56.

This last sum is the difference to be explained, between the accountant and the engineer, on items other than those compared as shown above. Please try to have the most of the discrepancy cleared up, if possible. The reports from two officers of the same department should show a closer agreement than 15 per cent of the larger amount.

It would be well to have a statement from Engineer Johnson, as to the sources from which he drew his information about quantities and prices.

I am, sir, your obedient servant,

Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, May 18, 1905.

SIR,—I have the honour to acknowledge the receipt of your letter of the 4th instant, relative to the subsidy to the Lindsay, Bobcaygeon and Pontepool Railway Company, and to the application made to you, under date of February 18, last, for the payment of a balance set down as $61,740.82.

You observe that you are advised that eleven items of the bill of Messrs. Clarke, Bowes & Swabey are connected with the right of way in Lindsay, and should, therefore, be omitted from 'cost of construction'; further, that these eleven items have been valued by Taxing Officer Thom at $815.52, and that half of this amount should be deducted from the application in favour of the railway.

Your request has been now complied with, and I forward herewith a revised application for a balance of $61,333.06, accordingly.

You draw attention to differences between the Inspecting Engineer and the Accountant of the Department in regard to the cost.

In reply to this, I am to say that Mr. Johnson gives merely his view of the probable cost, based upon *estimated* quantities of work and on prices regarded by him as reasonable therefor, while the accountant's statement shows the *actual* cost of the work. It is to be observed with regard to the accountant's item for engineering, that it only covers part of the inspecting engineer's estimate for engineering and superintendence. The other differences between the accountant and the inspecting engineer, to which you draw attention, are simply those due to an *actual* as against an *estimate* statement.

Both the Chief Engineer and the Department, I am to say, in all these cases, hold, as has been, on other occasions, stated to you, that it is the *actual* reasonable cost that must govern, and not a mere theoretical estimate, however ably prepared.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D. M. & C. E.*

AUDIT OFFICE, OTTAWA, June 7, 1905.

SIR,—Let me acknowledge receipt of your 77574 concerning the subsidy account of the Lindsay, Bobcaygeon & Pontepool Railway.

You now inform me that Mr. Johnson makes up his valuation on estimated quantities. I have always supposed, in previous cases, that he took the actual quantities from the railway companies' books, and made test audits of them from the profiles. If this were possible, would it not be more reliable? How does he estimate the probable quantities, and wherein lies the weakness of his method?

The defect in Mr. Shannon's calculation is, that the item 'expenditure by contractor—$718,090.53,' while classified into 15 different sub-heads, is supported only by receipts from the contractor; there is no proof from the latter that the money was expended by him. Did Mr. Shannon see and examine the accounts rendered by the contractor to the company, for the sum of $718,090.53?

The circumstances so far are parallel with those of the Sorel bridge, where $149,000 was entered as paid to the contractor; when subsequent investigation showed the entry to be fictitious. Although a repetition of this artifice is improbable in the present instance, we have to guard against the possibility of its recurrence.

In the last paragraph of your letter, you refer to the fact that it is the 'actual and reasonable cost' that must govern. Given a mere book-keeping statement, like that rendered by Contractor Fauquier and the company,—how do you know that it is 'reasonable' except by an engineer's valuation, such as might be made by Mr. Johnson after the work was done? And if the engineer's estimate is to receive attention in case of a discrepancy, the present discrepancy seems large enough to call for such action.

Please ask Mr. Johnson to show 'engineering' and 'superintendence' separately when making up his new estimate on the plan above suggested.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, June 13, 1905.

SIR,—With reference to your letter of the 7th instant, relative to the subsidy claim of the Lindsay, Bobcaygeon & Pontepool Railway, in which you take exception to the accountant's audit of the accounts rendered by the contractor to the company, amounting to $718,090.53, and ask if he examined the accounts so rendered, I herewith inclose a copy of Mr. Shannon's letter of explanation, dated the 8th instant, which speaks for itself.

With regard to Mr. Johnson's estimates of cost, I do not consider that there is any 'weakness' about them; they are *approximate* estimates of cost only, being as near as to value as it is possible for him to calculate. The books, accounts, &c., are scrutinized in order to ascertain the actual cost, and, as I before stated, the cost must be the reasonable cost and that only. I believe that Mr. Shannon's report in the present case represents the reasonable cost.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M. & C.E.*

RAILWAYS AND CANALS DEPT., OTTAWA, June 8, 1905.

Lindsay, Bobcaygeon and Pontepool Railway.

SIR,—Referring to the paragraph in the Auditor General's letter of the 7th instant, in connection with the cost for subsidy purposes of the above railway, in which he states the defect in my calculation is that the item 'expenditure by contractor, $718,-090.53' while classified into 15 different subheads is supported only by receipts from the contractor; there is no proof from the latter that the money was expended by him'; I beg to state that I examined in detail every payment made by the contractor, having not only the voucher but the retired bank cheque with which the contractor paid each voucher placed before me for my inspection and that I have no hesitation in stating that this money was expended by him.

I am, sir, your obedient servant,

LEONARD SHANNON, *Accountant.*

The Deputy Minister, Dept. Railways and Canals.

AUDIT OFFICE, OTTAWA, June 19, 1905.

SIR,—Let me acknowledge receipt of your 77982 of June 13, concerning the Lindsay, Bobcaygeon and Pontepool Railway Subsidy.

My letter of June 7, requested that engineer Johnson be asked to make up a statement of the probable cost of the railway, by using the actual quantities, instead of those originally estimated from the preliminary profiles. Your answer of June 13 does not discuss this suggestion. Please let me know whether any progress has been made in this direction.

Also it would be preferable, I think, to make in this office a test-audit of the statement which was submitted to accountant Shannon. I would like you to have the necessary materials supplied to me.

The wording of the Supply Bill is: 'The expression "cost" means the actual, necessary and reasonable cost.' Now, an accountant's examination is directed only towards ascertaining the 'actual' cost, and to preparing statements by which an engineer can judge as to 'necessary' and 'reasonable' cost: on these latter two points neither an accountant nor an auditor can pronounce. This is why an engineer's certificate is necessary in his professional capacity: either your own certificate from personal examination of the work after its completion, or a certificate from one of your duly qualified assistants under similar circumstances.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. L. McDOUGALL, *A.G.*

Re *Bobcaygeon and Pontepool Railway.*

RAILWAYS AND CANALS DEPT., OTTAWA, June 21, 1905

SIR,—I have to acknowledge the receipt of your further letter of the 19th instant, in the above matter.

In reply, I may say that I am familiar with the country traversed by the railway; I have examined the plans and profiles, and have satisfied myself that the cost of the road as given by Mr. Shannon is the fair and reasonable cost; but I am pleased to forward to you, as desired, the statement which was submitted to him, asking, at the same time, that you will be pleased to return it when your audit is completed.

With regard to Mr. Johnson's estimate, I would say that it is an approximate one, but, as such, will bear criticism. I do not consider that a further estimate by him is necessary.

I am, sir your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M.R. & C.*

AUDIT OFFICE, OTTAWA, July 17, 1905.

SIR,—In further discussion of the subsidy to the Lindsay, Bobcaygeon and Pontepool Railway and the nature of the examination to be made by the inspecting engineer:—

Let me call your attention to the certificates made at the inception of the system of paying on a basis of actual cost.

In the case of the Ottawa and Parry Sound Railway, in a report dated October 14, 1897, Engineer F. J. Lynch certified as follows: 'I made a careful examination and measurement, on the ground, of such portions as were necessary to verify quantities, and a critical examination of the company's receipted vouchers in this connection to ascertain payments. The cost of this 51·13 miles I find to be $1,181,185.42, equal to the sum of $23,101.61 per mile. I am quite satisfied from the measurements taken, and documents examined, that this amount has been actually expended. I attach hereto details of items with notes.'

It has always been understood in this office that a similarly rigid examination into the actual quantities was always held by the inspecting engineer, before payment of subsidies to other railways.

You now inform me that the quantities given in the inspecting engineer's reports are only estimates, calculated (I suppose) from the profiles before the work is done.

Please let me know the date at which the requirements of the previous system were relaxed; and have them restored for all subsequent payments.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, July 21, 1905.

SIR,—In further discussion of the subsidy to the Lindsay, Bobcaygeon and Pontepool Railway, and the necessity of an engineer's report, let me call your attention to some correspondence in March, 1898, on the subject of the St. Lawrence and Adirondack Railway.

My letter of March 7, 1898, said: 'Since the calculated cost of $28,967.16 a mile is so much above the $21,400 which earns $6,400, I have passed the application on the report of the chief engineer. It does not appear clear to me, however, that the cost of a railway can always be verified satisfactorily within the department. If it cannot, the report of the inspecting engineer will be necessary. He will have examined the works minutely for their quality and cost, and will know prices as they vary by locality. (Sgd) J. L. McDougall.'

Your answer, dated March 10, 1898, was as follows: 'I have the honour to acknowledge the receipt of your communication of the 7th instant, relative to the subsidy of $42,240, payable to the St. Lawrence and Adirondack Railway Company. In reply, I would say that I quite concur in the views you have expressed on the matter. (Sgd) Collingwood Schreiber.'

My views are the same now as then.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, July 25, 1905.

SIR,—In further discussion of the subsidy account of the Lindsay, Bobcaygeon & Pontepool Railway:

Under section 56 of the Audit Act, I have taken the sworn evidence of Mr. E. V. Johnson, inspecting engineer of your department. A copy of his evidence is forwarded to you herewith.

In addition to Mr. Johnson's former estimate of cost, amounting to $622,595.07, he has since seen reasons for additional allowances as follows:—

Original estimate, dated January 11, 1905	$622,595 07
Rails and angle-bars, 4,200 tons at $4 additional	16,800 00
Timber, 117,545 feet at $4 additional	470 18
	$639,865 25
To this is to be added:	
Legal services, $27,034.05—$815.52	26,218 53
	$666,083 73
Subtract, 38·7 miles at $15,000	580,500 00
	$ 85,583 78
Divide by two	42,791 89
Application 406 now in hand	61,333 06
Difference to hold	$ 18,541 17

Please divide application 406 (returned herewith) into two parts: one for $42,791.89, which will be passed without further delay, and one for $18,541.17, which I cannot see my way to pass.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, July 26, 1905.

Re *Subsidy Claim of the Lindsay, Bobcaygeon and Pontepool Railway Co.*

SIR,—I have the honour to acknowledge the receipt of your communication of the 17th instant, with further reference to the above matter.

In reply, I have to say that Mr. E. V. Johnson, the inspecting engineer, informs me that he followed the same course in checking the work as Mr. F. J. Lynch did in the case of the Ottawa, Arnprior & Parry Sound Railway, to which you refer. His estimate must, however, necessarily, be an approximate one, and I am satisfied that $18,190.75 per mile is a fair and reasonable cost for the road, and any person who examines it will be of the same opinion. Mr. Johnson's approximate estimate gives $16,346 as the cost per mile. If, however, you are of the opinion that $18,190.75 a mile is excessive, I would suggest that you should send an engineer to examine the road.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M. & C.E.*

AUDIT OFFICE, OTTAWA, July 31, 1905.

SIR,—I beg to acknowledge the receipt of the application through you of the Department of Railways and Canals for the overruling of my decision on the claim of the Lindsay, Bobcaygeon & Pontepool Railway Company for its balance of the subsidy claim of $18,541.17. The claim was originally $61,333.06, of which there was passed here $42,791.89.

The department has recognized in full the claim as presented by the company.

I have gone upon the report made by Mr. Johnson, the inspector of the Department of Railways and Canals, made after the railway was completed.

As might be expected, the claim of a railway company on which subsidy is to be based in proportion to cost ought to be looked upon with more suspicion, particularly as the subsidy comes from the government, than ought the valuation of an old experienced government official.

My objection is taken under section 32, subsection (*c*), on the ground that the money is not justly due.

I am, sir, your obedient servant,

The Secretary, Treasury Board. J. L. McDOUGALL, *A.G.*

FINANCE DEPARTMENT, OTTAWA, August 22, 1905.

DEAR SIR,—Referring to your letter of the 26th ultimo requesting that a ruling of the Treasury Board be obtained in respect to the application made to the Auditor General for payment of the sum of $61,333.06, to the Lindsay, Bobcaygeon and Pontepool Railway Company, by direction of the Minister of Finance I beg to return herewith to your department the file of papers with your letter, and to say that before submitting the matter to the Treasury Board the minister suggests that the matter be made a subject of further conference between the engineers of the Railway Department with the view to securing a report as to the cost of the above road in which all may join.

I am, sir, your obedient servant,

L. K. JONES. Esq., Secretary, Railways and Canals. T. C. BOVILLE, *for M.F.*

RAILWAYS AND CANALS DEPT., OTTAWA, September 23, 1905.

SIR,—In the matter of the subsidy to the Lindsay, Bobcaygeon and Pontepool Railway, after further investigation into the circumstances governing the construction of this road and having received satisfactory explanation from the Contractor of what, in my former estimation, was an excessive cost in certain of its features, I am satisfied that the actual expenditure, as reported by the accountant of this department represents the fair and reasonable cost of this work.

I am, sir, your obedient servant,

M. J. BUTLER, Esq., Chief Engineer, Railways and Canals. E. V. JONHSON, *Inspecting Engineer.*

RAILWAYS AND CANALS DEPT., OTTAWA, Sept. 26, 1905.

SIR,—I have the honour, by direction, to inform you that in accordance with the suggestion made in your letter of the 22nd ultimo, relative to the request of this department for a ruling of the Treasury Board in the matter of certain objections on the part of the Auditor General for payment of moneys to the Lindsay, Bobcaygeon and Pontepool Railway Company, a further investigation has been made into the circumstances governing the construction of this road, and as the result the Inspecting Engineer has reported under date the 23rd instant, stating that he has received a satisfactory explanation from the contractor in regard to certain features of cost which, according to his previous estimation, were excessive. He states that he is now satisfied that the actual expenditure as reported by the accountant of this department represents the fair and reasonable cost of the work.

I inclose a copy of this report, which, it is trusted, will facilitate the settlement of this long outstanding difficulty.

I am, sir, your obedient servant,

The Secretary, Treasury Board. L. K. JONES, *Secretary.*

TREASURY BOABD, OTTAWA, September 27, 1905.

SIR,—I have the honour to inclose herewith file of papers (T. 35386 B), in reference to the subsidy to the Lindsay, Bobcaygeon and Pontepool Railway, to the payment of which objection has been taken.

It will be found that the inspecting engineer has reported that he has received a satisfactory explanation from the contractor in regard to certain features of cost which, according to his previous estimation, were excessive. I presume, under these circumstances, the payment can be arranged.

I am, sir, your obedient servant,

The Auditor General. J. M. COURTNEY, *Sec. Treas. Board.*

AUDIT OFFICE, OTTAWA, October 2, 1905.

SIR,—In further discussion of the balance of subsidy claimed by the Lindsay, Bobcaygeon and Pontepool Railway:—

A letter has been received from the Treasury Board, inclosing recent departmental correspondence, among which is a report from the inspecting engineer, Mr. Johnson, to the effect that his later investigations have convinced him that the accountant's statement represents the fair and reasonable cost of this work.

The Subsidy Act seems to me to prescribe the chief engineer as the officer who is to determine the actual, necessary and reasonable cost of the railway; and his report,

when confirmed by council, must be accepted. This is the substance of an opinion given by Mr. Aylesworth, under date of April 27, 1905 (copy inclosed).

The Auditor General's function, under existing subsidy legislation, appears to lie more in the direction of examining the nature of the evidence upon which the chief engineer bases his valuation. The Auditor is to report to Parliament if he considers the chief engineer's system to be defective; and he (the Auditor) is then freed from further responsibility, whether parliament acts or not.

In the present instance, the chief engineer's two sources of information were conflicting, and he took the larger valuation, that made by the accountant, Mr. Shonnon; Mr. McDougall thought that the smaller should have been taken, that made by the engineer, Mr. Johnson. The discussion on this subject was very thorough, and nothing is to be gained by protracting it. The inspecting engineer now alters his certificate in general terms, and accepts the accountant's total. It would have been better if Mr. Johnson could have located the precise spots in his former calculation, where he now thinks either the quantities or the rates should be increased.

Subject to this last remark, which will be reported to Parliament with the rest of the correspondence, the payment of $18,541.17 is now released, and the company will thus receive the balance of its subsidy. The responsibility is left with the chief engineer, Mr. Schreiber, who has assumed it so explicitly.

If Parliament thinks that the Auditor General should have, in connection with railway subsidies, other duties than those described above, the present wording of the Subsidy Acts can be varied in that direction.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, October 3, 1905.

SIR,—I have the honour to acknowledge the receipt of your letter of the 27th ultimo, inclosing a file of papers (T. 35386 B) in reference to the subsidy to the Lindsay, Bobcaygeon and Pontepool Railway, to the payment of which objection has been taken.

In reply, I beg to inform you that after a careful study of the matter, I have signed a certificate for payment of $18,541.17.

I inclose a copy of my letter to the Deputy Minister of Railways and Canals, and also return herewith the file in connection with the matter.

I am, sir, your obedient servant,

The Secretary, Treasury Board. J. FRASER, *A.G.*

Re **Audit of Stations.**

AUDIT OFFICE, OTTAWA, February 20, 1905.

SIR,—In your letter of February 8, 1904, you state that it is desirable to have the stations audited twice each year, which you thought could be accomplished if the travelling auditors could be kept at that work entirely. But owing to circumstances of guarantee, it is necessary that an auditor should replace the paymaster or the cashier in case of the absence of either. You conclude by stating that you will consider the question of appointing another auditor.

The returns of the auditors just to hand indicate that one or other of them is still acting as paymaster, and presumably the work of auditing the stations is falling still further in arrears.

You do not seem to have had a fourth auditor appointed.

Auditor Burns was engaged at Halifax freight from November 1 to 26, and Auditor Wallace at the same work from October 31 to December 10. If it is necessary to have two officers to audit the larger stations, would it not be advisable to have it done by one of the auditors and an assistant?

The auditing of the stations which you say should be done twice each year, is of so much importance, that I would ask your attention to the present condition of the question.

I am, sir, your obedient servant,

The Gen. Mgr. Govt. Rys. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, April 7, 1905.

SIR,—Referring to our conversation of a few days ago, when I called your attention to the unsatisfactory condition of the auditing of stations, I would now beg to submit a memo compiled from the return for January (form 182) showing the date of last audit of all stations not audited since June 1904:—

2	Stations	not	audited	since 1899.
1	"		"	1900.
17	"		"	1901.
11	"		"	1902.
65	"		"	1903.
96	"	"	for more than 1 year.	
16	"	"	since January, 1904.	
4	"	"	"	February, 1904.
17	"	"	"	March, 1904.
4	"	"	"	April, 1904.
15	"	"	"	May, 1904.
32	"	"	"	June, 1904.

The cash receipts at some of the stations not audited for more than one year, are not very large, but quite a number are important stations. As I pointed out in my letter of February 20 last, one or other of the travelling auditors has been employed as acting paymaster for more than a year past.

You will realize that this is a matter calling for early attention.

I am, sir, your obedient servant,

The Gen. Mgr. Govt. Rys. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, November 14, 1905.

SIR,—I have to call your attention to a letter from this office dated April 7 last, in reference to the large number of stations that had not been audited for some time.

I shall be glad to know what steps have since been taken to remedy the matter.

No returns of the travelling auditors have been received later than those for June last. Up to that date one or other of the travelling auditors has been employed as acting paymaster.

I am, sir, your obedient servant,

The Gen. Mgr. Govt. Rys. J. FRASER, *A.G.*

MONCTON, N.B., December 26, 1905.

DEAR SIR,—You wrote me on November 14 with regard to the auditing of stations, and I inclose you herewith a letter from the treasurer, Mr. Williams, dated November 22, on the subject, inclosing a memorandum of the stations audited. A paymaster was appointed on October 1, and since that time the travelling auditors have been able to attend to their proper duty of auditing the stations. Previous to that one or other of these auditors was required to act as paymaster each month. As the appointment of the paymaster has been comparatively recent, we have not yet received the full benefit of it in the work of the travelling auditors, but I expect that they will catch up with the work now very soon.

Yours truly,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

Re **Prince Edward Island Railway, Murray Harbour Branch.**

AUDIT OFFICE, OTTAWA, March 7, 1905.

SIR,—The Honourable the Minister of Railways and Canals stated in the House yesterday that the Murray Harbour branch of the Prince Edward Island Railway was handed over to the government by the contractor on November 5, 1904.

I have to inquire if the government have since been operating this branch.

I do not find that any revenue has come to account from it.

I am, sir, your obedient servant,

The Supt. Prince Edward Is. Ry J. L. McDOUGALL, *A.G.*

CHARLOTTETOWN, P.E.I., March 14, 1905.

DEAR SIR,—I beg to acknowledge receipt of your letter dated March 7, and in reply I have to say that we have not been operating the Murray harbour branch, and will not likely be doing so until the Hillsborough bridge is completed, which will form a connection between the branch and the existing line. I do not expect the bridge will be completed for traffic before July 1 next, perhaps not then.

I am, sir, your obedient servant,

The Auditor General. G. A. SHARP, *Supt. P.E.I. Ry.*

CHARLOTTETOWN, P.E.I., November 7, 1905.

DEAR SIR,—I beg to acknowledge receipt of your letter of 4th inst, in *re* revenue derived from the Murray harbour branch of the P. E. Island Railway. I find by my file that I replied to your letter of March 7 on March 14, a copy of which I send you herewith.

We began operating the Murray harbour branch on the first of the present month, and the revenue will be shown from that branch henceforth.

I also inclose you a copy of a mileage table, and time table in effect for that branch.

I am, sir, your obedient servant,

The Auditor General. G. A. SHARP, *Supt. P.E.I. Ry.*

Re **Arrears due—Canals, Hydraulic and other Rents.**

AUDIT OFFICE, OTTAWA, April 20, 1905.

SIR,—The inclosed statement of arrears due for hydraulic and other rents on the canals, shows an increase on June 30, 1904 of $16,408.04 over the amount due June 30, 1903, of over 20 per cent.

I shall be glad to have your explanation of this large increase, and to be informed what steps you are taking in reference thereto.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. L. McDOUGALL, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, May 22, 1905.

SIR,—I have the honour to acknowledge the receipt of your communication of the 20th ultimo, asking for an explanation in regard of the increase in the amount of arrears due for hydraulic and other rents on the Dominion canals.

In reply, I have to say that there has been an increase in the arrears of rental on the Grenville canal of $5,018, of which one year's rent under the lease granted to Mr. J. P. Mullarkey amounts to $5,000, and that there were the following increases in arrears of rents on the undermentioned canals, viz.:—

On the Beauharnois canal, $2,403.50, $1,915 of which was paid after September 30 last.

On the Chambly canal, $200, $26 of which was paid after September 30 last.

On the Cornwall canal, $1,960.73, $1,812 of which was paid after September 30 last.

On the Lachine canal, $437.52, and payments of $2,099.27 on account of arrears were made after September 30.

On the Rideau canal, $582.44, $19 of which was paid after September 30 last.

On the Trent canal, $669.95.

On the Welland canal, $4,959.90, $2,392 of which was paid after September 30 last.

On the Williamsburg canal, $161.

On the Sault Ste. Marie canal, $10.

On the Murray canal, $5, which was paid after September 30 last.

With regard to your further request for information as to what steps are being taken for the collection of these arrears, I have to say that, short of instituting legal proceedings, every possible means are being taken by the department to collect the said arrears.

I am, sir, your obedient servant,

The Auditor General. COLLINGWOOD SCHREIBER, *D.M.*

Re **Canal Revenue.**

AUDIT OFFICE, OTTAWA, September 9, 1905.

SIR,—The harbour dues usually collected at Montreal amounted to $3,048.86 for the year 1903-04. Nothing came to account during the last fiscal year from this source.

The receipts at the same port for storage fell from $1,246.08 in 1903-04 to $203.36 in 1904-05; and for wharfage from $1,113.92 in 1903-04 to $54.28 in 1904-05.

I have to ask for an explanation.

I am, sir your obedient servant.

The Deputy Minister, Railways and Canals. J. FRASER, *A.G.*

RAILWAYS AND CANALS DEPT., OTTAWA, 20 January, 1906.

SIR,—With reference to your letters of the 9th of September last and the 12th ultimo, in which you call attention to the absence of any receipts for wharfage dues at the port of Montreal during 1904-05, and to the large reduction in the receipts for storage and wharfage, and ask for information, I have the honour, by direction, to inform you that, owing to a misunderstanding of instructions with regard to coal, no wharfage dues were collected on that article. The Canal officers have, however, kept a record of all coal unloaded on Government property, and instructions have gone forward to them to endeavour to collect all amounts due thereon as soon as possible.

With regard to the storage receipts compared with those of the previous year, I have to state that certain leases of space in sheds have expired since the previous year; also that the sum of $1,200 for space in sheds is outstanding against one of the transportation lines.

I am, sir your obedient servant.

The Auditor General. L. K. JONES, *Secretary.*

JUSTICE DEPARTMENT, OTTAWA, 20th March, 1905.

SIR,—In view of the circumstances connected with a recent payment through your office of bounty upon steel rails, I am directed to write as follows:—

By the Act respecting the Department of Justice, R.S.C., Chapter 21, it is provided that the Minister of Justice shall see that the administration of public affairs is in accordance with the law, and that he shall generally advise the Crown. He is also, in his capacity as Attorney General, to advise the heads of the several departments of the Government upon all matters of law connected with such departments.

Not infrequently claims are submitted to you for audit or payment in respect of which you doubt the legal responsibility of the Government, or wish to be advised upon the law. While it is my view that all such cases should be governed by the advice of this department, my present object is not to disapprove your practice of taking advice from outside counsel, but to point out the impropriety of your admitting liability, or making payment upon such advice, where it does not accord with that of the Minister of Justice, or where the advice of the Minister has not been obtained.

I am directed to state that in the Minister's opinion you should in any case of doubt require the department which submits a claim to you to obtain the opinion of this department, and you should not in any such case make any payment either upon your own view or upon the advice of outside counsel without the opinion of this department having been obtained, and unless the right of such payment is upheld by this department.

You will I think readily see that any other course of procedure would to that extent deprive the Minister of Justice of the opportunity of exercising his constitutional functions, and affect his responsibility in the administration of public affairs.

I am, sir, your obedient servant,

The Auditor General. E. L. NEWCOMBE, *D.M.J.*

AUDIT OFFICE, OTTAWA, March 30, 1905.

DEAR MR. NEWCOMBE,—I have just received your letter dated the 20th instant. It seems to me that your conclusion is a correct one, as I said to you in conversation. If an application is made to this office for payment and I doubt the legality of making the payment applied for, it appears to me that I should decline to pay unless the Department is provided with an opinion from the Justice Department that the payment can be legally made and then only when my legal adviser gives the opinion that the payment would be a legal one. I have written to the Trade and Commerce Department stating that I cannot see my way to pass an application which is now before me for bounty on steel rails until that Department is provided with an opinion from the Department of Justice that a payment can be legally made. I cannot see your conclusion that this office should be guided in its legal views by those of any executive department. On the other hand I have thought it wise to get the opinion of a person in political sympathy with the Government—a view which I have always followed in practice.

Sincerely yours,

E. L. NEWCOMBE, Esq., Deputy Minister of Justice. J. L. McDOUGALL, *A.G.*

AUDIT OFFICE, OTTAWA, November 14th, 1905.

Re Inspection of Staples—Winnipeg.

SIR,—I would call your attention to previous correspondence in reference to the fees and other revenues from Inspection of Staples at Winnipeg. It was pointed out that as there was no means furnished for making any audit of the inspections and weighings, the statements should be certified.

It was also claimed that receipts should be issued for all payments and the counterfoils furnished to this office.

The receipts for Warehouse Commissioner License fees in 1904-05 amounted to $2,634, of which the only details given are the dates and amounts of the payments.

In connection with the audit of revenue it is desirable to determine (1) that revenue has been collected in every case in which it should have been collected, (2) that the amounts collected are the amounts which should have been collected, (3) that all the revenue collected has come to account and as promptly as it should.

To cover the first two points, the statement should be certified by the Inspector and officer immediately in charge; and when these statements are examined and audited in the department the fact should be entered thereon. To determine the third point regulations authorized by the Treasury Board should be followed. See Audit Report, 1903-04, page A—25.

I trust you will have these regulations enforced.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

TRADE AND COMMERCE DEPT., OTTAWA, 15th November, 1905.

SIR,—I have yours of yesterday's date *re* Inspection of Staples at Winnipeg. I fear you do not fully appreciate the situation, and I will have to have a little talk with you upon the subject. There is one item you mention, the receipts from Warehouse Commissioner License fees, the details giving the dates and amounts of payments, you already have. We can give you the counterfoils. They came in two or three days ago, and as soon as we get them checked over, I will send them forward to you; but as for counterfoils of other revenue, I think you would have to double your staff if you undertook to check them.

I am, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D. M. T. & C.*

DEPARTMENT OF TRADE AND COMMERCE, OTTAWA, Oct. 13th, 1905.

Re Chinese Immigration.

SIR,—Referring to yours of yesterday's date asking for the usual statement covering Chinese Immigration Account for the year 1904-5.

I beg to hand you herewith the Account showing a gross revenue of $6,080, and refunds to the amount of $10,000.

In explanation of this, I beg to state that anticipating last year that the refunds to individuals under the provisions principally of sub-section 3 of section 6, would exceed the revenue, an amount equal to $5,150, was reserved and not distributed to provinces from the collections of the year 1903-4. This amount with the amount of collections this year, you will notice, aggregates $11,230, leaving still a balance to the good of $1,230.

In so far as regards the Appropriation Account, you will note that the expenditure for salaries and contingencies was $2,926.78 as against an appropriation of $4,000, leaving a balance not expended of $1,073.22.

I am, sir, your obedient servant,

The Auditor General. W. G. PARMELEE, *D. M. T. & C.*
